The structural solution developed by the WSP team does have a pleasing simplicity, though this belies the extensive testing and refinement that went into developing it. 432 Park Avenue is made of two high-strength concrete tubes. The interior tube forms the building's core, measuring 30ft x 30ft, containing the elevators and exit stairs.

432 Park Avenue, New York | WSP

Here, I will present solve problems typical of those offered in a mathematical economics or advanced microeconomics course. The problems were originally compiled by Dr. Charles N. Steele and are reprinted with his generous permission. The solutions to the problems are my own work and not necessarily the only way to solve the problems.
