Demonstrating the evolution of arterial lesions from the clinically silent to the clinically relevant, An Atlas of Atherosclerosis Progression and Regression is a teaching aid and diagnostic tool for recognizing changes in lesion progression, stabilization, or regression. About the author: Dr. Stary is Professor of Pathology at the Louisiana State University Health Sciences Center in New Orleans.

An Atlas of Atherosclerosis Progression and Regression ...

LXR is a transcription factor that induces the expression of genes involved in cholesterol transport and efflux [151,152] and is essential for retarding atherosclerosis progression and promoting atherosclerosis regression. [84,153] Additionally, the nonspecific efflux molecule, cyclodextrin, promotes atherosclerosis regression via LXR-mediated ...

Macrophages in Atherosclerosis Regression ...

The earliest visualizable lesion of atherosclerosis is the fatty streak, which is an accumulation of lipid-laden macrophages in the vascular intima (FIGURE 12.1, FIGURE 12.2). Fatty streaks can be appreciated grossly as focal yellow areas of discoloration of intimal surface. These lipid-laden macrophages are often referred to as foam cells because of their foamy appearance.

Pathophysiology of Atherosclerosis - ScienceDirect

Objective: To investigate the relationship between chemerin and progression of atherosclerosis in ApoE^{-/-} mice and its mechanism. Methods: 8-week-old ApoE^{-/-} mice were fed with high-fat diet to induce the atherosclerosis model. Adenoviruses were transfected for knockdown or overexpression of chemerin gene into aorta.

Adipokine Chemerin Stimulates Progression of ...

Metformin is a widely used antidiabetic drug that exerts cardiovascular protective effects in patients with diabetes. How metformin protects against diabetes-related cardiovascular diseases remains poorly understood. Here, we show that metformin abated the progression of diabetes-accelerated atherosclerosis by inhibiting mitochondrial fission in endothelial cells.
