Use of proper naming conventions is considered good practice. Sometimes programmers tend to use X1, Y1, etc. as variables and forget to replace them with meaningful ones, causing confusion. It is usually considered good practice to use descriptive names.

Best coding practices - Wikipedia

Best practices are a set of Human Resources Management processes and actions that work universally. In HRM research, there are two schools of thought on how to manage people. The first one is best fit, the second is best practices. The best fit school states that in order to add value, human resource policies should align with business strategy.
