### The Bronze Age | Teaching Resources

The Bronze Age was a time in early human history when people first began to use tools made of bronze. Bronze is a hard, yellowish alloy, or mixture of metals. People make it by melting copper and tin together. The Bronze Age began in some places about 5,000 years ago.

### Bronze Age - Kids | Britannica Kids | Homework Help

The Bronze Age is the time period when people made tools from an alloy (a mixture of metals) called bronze. Bronze is a mixture of mainly copper and tin: usually nine parts copper to one part tin. Materials like wood and stone were also used for tools, but bronze was better for cutting and chopping, and was easy to shape.

### Life in the Bronze Age | The Story of Britain | BBC Teach

Not much is known about Bronze-Age beliefs but objects from the time suggest that the Bronze Age brought about big changes in religious practices. One of the greatest was that people stopped building large ritual monuments, such as stone circles. People also placed metal items, thought to be offerings to gods, in watery places, such as rivers, lakes, and bogs.

### Bronze Age Beliefs | The Nebra Sky Disk | DK Find Out

The Bronze Age began in around 4000 BCE when people in what is now Turkey, and other parts of South Eastern Europe discovered how to make a metal called bronze. The use of bronze spread throughout Europe, and to other parts of the world by 2000 BCE.

### What was the Bronze Age?

Use of the metal bronze became widespread in Europe during the Bronze Age, in around 2000 BCE. Bronze was made by heating the metals tin and copper and mixing them together. As the two metals melted, they combined to form liquid bronze. This was poured into clay or sand moulds and

allowed to cool.
