Flight control of a drone. This tuto was performed with the CPGE toolbox for control systems teaching in French preparatory classes: <https://atoms.scilab.org/toolboxes/CPGE/1.6.0>. It was based on the following practical course in french: <http://tsi.ljf.free.fr/ATS/docs/S2I/TP/TP-CY5-D2C/index.html>. The objective of this tutorial is to analyse and improve the performance of the speed control of a drone along the pitch axis, by acting on the direct powerchain, or on the feedback loop.
