New York State Stormwater Management Design Manual Chapter 5: Green Infrastructure Practices Section 5.1 Planning for Green Infrastructure: Preservation of Natural Features and Conservation Design ... Use clustering, conservation design or open space design to reduce impervious cover, preserve more open space and protect water resources.

Chapter 5: Green Infrastructure Practices

Chapter 5: Design of Open Channels. Open channels are designed to carry a design discharge in a safe and economical way. For flood control channels the design discharge represents the peak discharge expected to result from a flood event of a specified return period. Normally, the design discharge is obtained from the hydrologic study of upstream watersheds.
