Register Transfer Level (RTL) is an abstraction for defining the digital portions of a design. It is the principle abstraction used for defining electronic systems today and often serves as the golden model in the design and verification flow. The RTL design is

# Download Free Digital Design With Rtl Design Vhdl And Verilog

usually captured using a hardware description language (HDL) such as Verilog or VHDL.

## **Register Transfer Level (RTL) - Semiconductor Engineering**

In digital circuit design, register-transfer level (RTL) is a design abstraction which models a synchronous digital circuit in

# Download Free Digital Design With Rtl Design Vhdl And Verilog

terms of the flow of digital signals between hardware registers, and the logical operations performed on those signals.
