## **Earth Moon And Sun Phases**

## Download Ebook Earth Moon And Sun Phases Eclipses And Tides

The moonlight we see on Earth is sunlight reflected off the Moon's grayish-white surface. The amount of Moon we see changes over the month — lunar phases — because the Moon orbits Earth and Earth orbits the Sun. Everything is moving. During a lunar eclipse, Earth comes between the Sun and the Moon, blocking the sunlight falling on the

## Download Ebook Earth Moon And Sun Phases Eclipses And Tides

When the Earth comes between the full moon and the Sun along the ecliptic, a lunar eclipse occurs. Observing the Moon from Earth, there is a sequence of phases as the side facing us goes from completely darkened to completely illuminated and back again every 29.5 days. As the Moon orbits Earth, tides align with its gravitational pull.
