Although only a small part of the Moon is directly illuminated by the Sun at the start of the Waxing Crescent Moon, the rest of the Moon is sometimes also faintly visible. This is because Earth also reflects sunlight as a dull glow onto the Moon. This phenomenon is called earthshine or Da Vinci glow, and it is most noticeable in April and May.

Waxing Crescent Moon - Time and Date

When the crescent Moon appears in early twilight, a strange but famous feature becomes visible: The dark portion of the Moon (the area unlit by the Sun) seems to glow. Historically called "the new Moon in the old Moon's arms," the phenomenon is now aptly known as earthshine. Learn more about Earthshine !
