Your best approach is to use the Eclipse Update Manager. More experienced plug-in developers — and sometimes lazy plug-in publishers — have learned to find the eclipse/plugins directory and install their plug-ins there manually. This obviously is a more dangerous approach, as no certification takes place about the suitability of the plug-in; it may rely on other plug-ins not available in your installation.

### FAQ How do I install new plug-ins? - Eclipsepedia

Start Eclipse and select menu item 'Help > Instal New Software...'. Then selec common software repository or if you need to install Subversive only, you can directly add Subversive update site by pressing 'Add' button. On the 'Add Repository' form enter the URL to the Subversive update site.
