Traditional conceptions of cognitive development have failed to account for changes in adult cognition as well as more subjective and intuitive features of human experience. This paper reviews recent theories and research in cognitive development and spirituality with the aim of providing connections between the two domains. Neo-Piagetian and postformal theories of cognitive development ...

Cognitive Developmental Theory and Spiritual Development ...

Piaget also believed that intellectual development occurs in four distinct stages. The sensorimotor stage begins at birth, and lasts until the child is approximately two years old. At this stage, the child cannot form mental representations of objects that are outside his immediate view, so his intelligence develops through his motor interactions with his environment.
