Water and Sanitation Logframe

A logical framework matrix (or logframe) is the output of a program design process where you work out how the program activities will lead to the immediate outputs, and how these will lead to the outcomes and goal. In an ideal world, a logframe should be flexible and updated frequently. Unfortunately, these days most donors require you to complete a logframe in their own rigid format, and this then becomes an unchangeable standard against which your program is assessed.
