"Limp Mode" or "Limp Home Mode" is a condition that can affect turbocharged diesel vehicles. Your Sprinter's ECU senses something malfunctioning in the turbocharger system--either reading too much boost, too little boost, etc.--and decides puts the van into low power or "limp home mode". Limp home mode has little to no turbocharger pressure and vastly...

The injector solenoid wiring can be easily checked for continuity and insulation to ground by removing the injector connectors and metering out the wires directly to the ECU under the dash. The injectors connections are the large gauge wires on the push in connector to the far right looking at the ECU under the dash.
