Off-Camera Flash Tips for Beginners - Digital Photo Mentor

Off-camera flash, as the name suggests is the technique of taking your external Speedlight/flash unit and mounting it off-camera. This results in the light falling on the subject at an angle, rather than straight on. The second thing to understand is that the off-camera flash needs to fire in sync with the camera shutter release.

How To Use Off-Camera Flash: An Essential Guide to Off ...

If you do not have a light meter, but your flash can talk to the camera when it is off-camera (again check your manual for remote firing settings) you can use the TTL (Through the Lens) metering options for your flash. If you want the flash equal to the natural light, leave it set to "0" or slightly less like "-0.6".

How to use Off Camera Flash for Portraits | Outdoor ...

The main use of shutter speed when using off-camera flash is that you can darken or lighten the ambient light. This includes your background and any other light sources, such as room lights and candles, etc. By using your shutter speed, you can alter the amount of ambient light in the shot without altering any other variable.
