of pain and pain  
management from a  
psychological  
perspective, and  
places recent

developments in an  
historical context. The  
experience of pain  
cannot be captured in  
physiological terms,  
and treatments based  
on physical models are  
often inadequate.

## Research And

The theory stated that any somesthetic sensation occurred by a specific and

particular pattern of neural firing and that the spatial and temporal profile of firing of the peripheral nerves encoded the stimulus type and intensity. Goldschneider (1920) proposed that there is no separate system for perceiving pain, and the receptors for pain are shared
