This is just one of the solutions for you to be successful. As understood, carrying out does not suggest that you have astonishing points.

Photosynthesis Test Answer Key - vrcworks.net

6CO₂ + 6H₂O + light → C₆H₁₂O₆ + 6O₂. The reactions of photosynthesis can be categorized as light-dependent reactions and dark reactions. Chlorophyll is a key molecule for photosynthesis, though other cartenoid pigments also participate. There are four (4) types of chlorophyll: a, b, c, and d.

Photosynthesis Study Guide - Key Concepts

Photosynthesis occurs in the green tissue of plants. This is primarily in the leaves, although photosynthesis also occurs in stems. Roots aren't exposed to light, so there's no point for a plant to put chlorophyll in them. Flowers serve a reproductive purpose, so again, there's no reason for plants to use them for photosynthesis.

Photosynthesis Quiz - Do You Know How Plants Make Food?

The online practice tests are not available for printing or scoring. If you would like to score your student's online practice test, you should direct your student to record his or her answers on a separate sheet of paper.
