Protagoras

Protagoras was born in Abdera, Thrace, opposite the island of Thasos (today part of the Xanthi regional unit). According to Aulus Gellius, he originally made his living as a porter, but one day he was seen by the philosopher Democritus carrying a load of small pieces of wood he had tied with a short cord.

The Protagoras is a strangely disjointed text. On a first reading, the different sections of the dialogue may seem to have little to do with each other. In fact, connections do exist between these apparently disparate parts, although they tend not to be on the level of narrative, explicit argumentative theme, or literary style.

Protagoras: General Summary | SparkNotes

Protagoras was one of the earliest sophists; as presented in Plato's Protagoras (one of our principal sources for Protagoras' life and activities as a teacher) he says (317c) that he is old enough to be the father of anyone present, who included rival sophists Hippias and Prodicus, while another Plato passage (Meno 91e) says that he practised as a sophist for over forty years till his death at about seventy (probably about 420 BC).

The Sophists (Stanford Encyclopedia of Philosophy)

Protagoras was a distinguished pre-Socratic Greek philosopher, teacher, and thinker who was marked by Plato as one of the sophists. Plato also credits him with having originated the role of the professional sophist.
