Hi, I want to get started with stm32f4 mcus, but somehow I'm not able to find some code examples for this mcu series.

There should be some stm32f4xx.h lib, which is available for the stm32f0. Could anyone direct me to the code examples? Thank you «

Discovery Keil

I've been trying to make my own C code style and coding rules approach, to be used in all my libs. From my first coding experience till today, I changed style many times, from first STM32F4 Library to latest projects, such as ESP_AT_Lib, onewire_uart and others.. Code style rules are published and regularly updated on my Github account, under `c_code_style`
