ences. Thus, in the political economy view, peasants are not strongly committed to the status quo. Peasants understand the logic of investment and accepting risk, and they may be willing to promote change in the social and political order to increase their own welfare. It is conceivable that peasants support the institutional changes required to re-

the assumption of rational political behavior? The paper examines two important models: a neo-Marxist model which attempts to understand peasant rebellion as a manifestation of class conflict, and a local-politics model which analyzes peasant rebellion as a manifestation of local strategies of survival.

Local Politics and Class Conflict Daniel Little Center for ...

We find that peasant households allocated labor to non-farm work only after subsistence needs were met. We also observe that peasants generally responded to local and regional opportunities but that political capital, human capital, and cohort effects accounted for differences in household responses.
