## The Sustainable City XII

**WIT Press** Grouping a selection of papers from the 12th International Conference on Urban Regeneration and Sustainability, this book refers to all aspects of urban environment and provides solutions that lead towards sustainability. The series maintains its strong reputation and a substantial number of contributions have been made from a diverse range of transnational delegates, resulting in a variety of topics and experiences. Urban areas face a number of challenges related to reducing pollution, improving main transportation and infrastructure systems and these challenges can contribute to the development of social and economic imbalances and require the development of new solutions. The challenge is to manage human activities, pursuing welfare and prosperity in the urban environment, whilst considering the relationships between the parts and their connections with the living world. The dynamics of its networks (flows of energy matter, people, goods, information and other resources) are fundamental for an understanding of the evolving nature of today's cities. Large cities represent a productive ground for architects, engineers, city planners, social and political scientists able to conceive new ideas and time them according to technological advances and human requirements. The multidisciplinary components of urban planning, the challenges presented by the increasing size of cities, the amount of resources required and the complexity of modern society are all addressed. The published papers cover the following fields: Urban strategies; Planning, development and management; The community and the city; Infrastructure and society; Eco-town planning; Spatial conflicts in the city; Urban transportation and planning; Conservation and regeneration; Architectural issues; Sustainable energy and the city; Environmental management; Flood risk; Waste management; Urban air pollution; Health issues; Water resources; Landscape planning and design; Intelligent environment; Planning for risk and natural hazards; Waterfront development; Case studies.

## A Contemporary Archaeology of London's Mega Events From the Great Exhibition to London 2012

**UCL Press** A Contemporary Archaeology of London's Mega Events explores the traces of London's most significant modern 'mega events'. Though only open for a few weeks or months, mega events permanently and disruptively reshape their host cities and societies: they demolish and rebuild whole districts, they draw in materials and participants from around the globe and their organisers self-consciously seek to leave a 'legacy' that will endure for decades or more. With London as his case study, Jonathan Gardner argues that these spectacles must be seen as long-lived and persistent, rather than simply a transient or short-term phenomena. Using a novel methodology drawn from the subfield of contemporary archaeology - the archaeology of the recent past and present-day - a broad range of comparative studies are used to explore the long-term history of each event. These include the contents and building materials of the Great Exhibition's Crystal Palace and their extraordinary 'afterlife' at Sydenham, South London; how the Festival of Britain's South Bank Exhibition employed displays of ancient history to construct a new post-war British identity; and how London 2012, as the latest of London's mega events, dealt with competing visions of the past as archaeology, waste and 'heritage' in creating a vision of the future.

## Mega-events and Urban Image Construction Beijing and Rio de Janeiro

**Taylor & Francis** While societies shape the way their cities look and are represented, urban images, in turn, nurture and structure social relations in multiple ways. Nowhere is this dialectical relationship between social processes and urban representations more visible than in the hosting of global spectacles such as the FIFA World Cup and the Olympic Games, which both embody some of

society's deepest dreams and desires. The focus of this book is the image of cities. It is not only interested in the mechanisms of urban image construction but also in the politics of such a phenomenon, especially its social impacts in terms of representation and right to the city. The book investigates the complex power relationships that underscore the production of the urban landscape and the construction and diffusion of urban images, especially in the context of urban mega-events. It uses the notion of urban image construction as a lens through which to examine the mega-event spectacle, with chapters exploring the physical, social and political dimensions of the imagineering process as well as emerging resistance to controversial initiatives. Through an analysis of event-related urban construction efforts in Rio de Janeiro and Beijing, this book examines the effects of mega-events upon the construction of an exclusive vision of urbanity. It demonstrates how mega-events are increasingly utilized by local political and economic elites to reconfigure power relations, strengthen their hold upon the urban territory and exclude vulnerable population groups. The book thus offers a critical analysis of the practice of urban image construction, and will be of interest to those working in geography, urban studies, tourism, sport studies, development studies and politics.

## Mega Quakes: Cascading Earthquake Hazards and Compounding Risks

**Frontiers Media SA** Large-scale earthquake hazards pose major threats to modern society, generating casualties, disrupting socioeconomic activities, and causing enormous economic loss across the world. Events, such as the 2004 Indian Ocean tsunami and the 2011 Tohoku earthquake, highlighted the vulnerability of urban cities to catastrophic earthquakes. Accurate assessment of earthquake-related hazards (both primary and secondary) is essential to mitigate and control disaster risk exposure effectively. To date, various approaches and tools have been developed in different disciplines. However, they are fragmented over a number of research disciplines and underlying assumptions are often inconsistent. Our society and infrastructure are subjected to multiple types of cascading earthquake hazards; therefore, integrated hazard assessment and risk management strategy is needed for mitigating potential consequences due to multi-hazards. Moreover, uncertainty modeling and its impact on hazard prediction and anticipated consequences are essential parts of probabilistic earthquake hazard and risk assessment. The Research Topic is focused upon modeling and impact assessment of cascading earthquake hazards, including mainshock ground shaking, aftershock, tsunami, liquefaction, and landslide.

## Handbook of Emerging 21st-Century Cities

**Edward Elgar Publishing** The majority of the world's population now live in cities, nearly a quarter of which boast populations of one million or more. The rise of globalisation has granted cities unprecedented significance, both politically and economically, leading to benefits and problems at national and international levels. The Handbook of Emerging 21st-Century Cities explores the changes that are occurring in cities, and the impacts that they are having, at the local, national and global scale.

## The London Olympics and Urban Development

## The Mega-Event City

**Routledge** As London sought to use the Olympics to achieve an ambitious programme of urban renewal in the relatively socially deprived East London it attracted global attention and sparked debate. This book provides an in-depth study of the transformation of East London as a result of the 2012 Summer Olympic and Paralympic Games. Government and event organisers use legacies of urban renewal to justify hosting the world's leading sports mega-event, this book examines and evaluates those legacies. The London Olympics and Urban Development: the mega-event city is composed of new research, conducted by academics and policy makers. It combines case study analysis with conceptual insight into the role of a sports mega-events in transforming the city. It critically assesses the narrative of legacy as a framework for legitimizing urban changes and examines the use of this framework as a means of evaluating the outcomes achieved. This book is about that process of renewal, with a focus on the period following the 2012 Games

and the diverse social, political and cultural implications of London's use of the narrative of legacy.

## Stranger in the Shogun's City

## A Japanese Woman and Her World

**Scribner** A vivid, deeply researched work of history that explores the life of an unconventional woman during the first half of the 19th century in Edo—the city that would become Tokyo—and a portrait of a great city on the brink of a momentous encounter with the West. The daughter of a Buddhist priest, Tsuneno was born in a rural Japanese village and was expected to live a traditional life much like her mother's. But after three divorces—and a temperament much too strong-willed for her family's approval—she ran away to make a life for herself in one of the largest cities in the world: Edo, a bustling metropolis at its peak. With Tsuneno as our guide, we experience the drama and excitement of Edo just prior to the arrival of American Commodore Perry's fleet, which transformed Japan. During this pivotal moment in Japanese history, Tsuneno bounces from tenement to tenement, marries a masterless samurai, and eventually enters the service of a famous city magistrate. Tsuneno's life provides a window into 19th-century Japanese culture—and a rare view of an extraordinary woman who sacrificed her family and her reputation to make a new life for herself, in defiance of social conventions. Immersive and fascinating, Stranger in the Shogun's City is a revelatory work of history, layered with rich detail and delivered with beautiful prose, about the life of a woman, a city, and a culture.

## 1974 - The Promotion Man - New York City

## The Morrell Archives

**CreateSpace** 1974 - The Promotion Man - New York City, the second volume in the memoirs of longtime record company executive and Beatles collector Dave Morrell, will be published in October. The book picks up where Volume 1 - the high energy Horse-Doggin' - left off. When Morrell was just barely 21, he was plucked from a low-level job at Warner-Elektra-Asylum's New Jersey warehouse, relocated to Manhattan and given a plum assignment as Warner Bros. Records' East Coast promotion man. Dave takes readers along on this wild ride - getting high with Ron Wood in the back of a limo between stops at radio stations, crossing English rock act Jethro Tull over to a mainstream pop radio audience with the smash hit "Bungle in the Jungle," breaking new artist Maria Muldaur despite resistance from radio stations that deemed "Midnight At The Oasis" too steamy, witnessing David Geffen's meltdown at the Planet Waves listening party when he finds out the label's Bob Dylan ad ran too soon in Billboard, introducing KISS to audiences with a Times Square kiss-a-thon judged by Kenny Rogers, getting Alice Cooper to speak at a PTA meeting and being whisked away to the Bahamas by Deep Purple, who had rented the Starship (a former United Airlines Boeing 720 jet), for an impromptu meet-and-greet with radio programmers. Although employed by a major record label, Morrell resisted becoming one of the "suits" and remained a fan at heart.

with a pure love of music - something that's abundantly clear in Chapter 14, when he and friend Ron Furmanek are invited to John Lennon's apartment to screen some rare Beatles footage that Ron had acquired - and Lennon reciprocates by playing them an unreleased Beatles recording. Elsewhere in 1974 The Promotion Man New York City, Morrell recounts how he witnessed the final moments of Lennon recording the Rock N Roll album at the Record Plant East and was pulled into Electric Lady Studios to listen to tracks recorded by Jimi Hendrix that the label later declined to release.

## Advances in Prevention, Assessment, and Management

**Plural Publishing** The term 'tinnitus' is searched over 110,000+ times every month. Unfortunately, much of the information readily available through internet searches is inaccurate, whereas most evidence-based information is only available through peer-reviewed

journal articles often containing dense scientific jargon. Tinnitus: Advances in Prevention, Assessment, and Management aims to bridge this gap by providing up-to-date and evidence-based information on tinnitus prevention, assessment, and management. Presented in a quick, easy-to-read format, this text offers a practical and handy resource for busy practitioners and health profession students, as well as individuals with bothersome tinnitus. Each section contains short chapters providing accessible overviews of research related to tinnitus and hyperacusis. Section I delves into various approaches for prevention of hearing loss and tinnitus. Section II covers tinnitus assessment, while Section III introduces readers to a range of tinnitus management solutions. Section IV focuses solely on recent advances in assessment and management of hyperacusis and other disorders of decreased sound tolerance. Authors of Section V review recent tinnitus-related developments, including social media use and COVID-19. The final section consists of interesting real-life case studies involving patients with bothersome tinnitus. Key Features: \* Interesting real-life tinnitus-related case studies puts new research into context \* More than 50 illustrations and tables help clarify and expand on key concepts covered throughout the text, enabling clinicians and students to more easily understand and apply complex material \* Each chapter opens with a brief introduction and background on a tinnitus-related topic, followed by up-to-date, evidence-based, peer-reviewed research on the topic \* All chapters contain ideas for future research on the topic as well as clinical implications of the research \* Chapters end with key messages and references for further review of the topic \* Audio samples included for Chapter 20

## Narratives of New Netherland

**Cosimo, Inc.** Narratives of New Netherland reads like a small anthology on the discovery, origins, and history of the United States, but from a Dutch, rather than traditional English, perspective. A collection of excerpts from works spanning the years 1609 to 1664, a historical picture is painted through books, letters, journal entries, and commentaries. Works focus on Henry Hudson's voyage across the Atlantic and down the Hudson River, as well as on settlers' experiences in the New World. Readers with an interest in American History will be reminded of similar stories from English settlers first experiencing the east coast. John Franklin Jameson was born in Somerville, Massachusetts in 1859. He attended Amherst College, where he graduated valedictorian and studied with several influential historians, as well as John Hopkins University, where he received the first doctorate ever awarded in the field of history in 1882. Jameson went on to become a history teacher, author, journalist and editor. He was the first professional historian to become president of the AHA, and had much influence on historians in the early 20th century. In 1928, he became the head of the Division of Manuscripts at the Library of Congress. Jameson died in 1937.

## Archive\_Belfast

**Hatje Cantz Pub** In his photographic projects Claudio Hils explores controversial themes, such as the surreal scenery of war at an army training ground or the inhumanity of urban architecture in the new metropolitan mega-conurbations. In this volume he documents the evidence left by years of violence in Belfast. The experience of conflict is deeply embedded in Belfast's collective consciousness. Evidence of conflict is contained within information archives throughout the city, where photography is employed as a means of interpreting, objectively, the effects of violence. Medical x-ray technology registers the body as site of trauma, police forensic photography particularises scenes of crime, surveillance cameras militarise civic spaces. These archives are extensive, systematically organized, and primarily contingent on use. In contrast, private and semi-public stores of conflict-related memorabilia are presently being formulated into official public archives. As collections of objects (uniforms, propaganda) become redundant, they are recontextualized and transformed into historical artifacts. Archive\_Belfast observes a history under construction. Book jacket.

## Marx as Politician

**Carbondale : Southern Illinois University Press** This is a radical reinterpretation of Marx's life and works. Unquestionably one of the greatest thinkers in world history, Marx persistently made his ideas serve his political instincts, modifying his thoughts according to the standard of political effectiveness?the needs of power. Marx as Politician is a political life beginning with Marx's early years when he was sensitized to politics by the unique situation of the Rhineland, occupied for two decades by the revolutionary and Napoleonic French and then handed over to the Prussian bureaucracy. Defining his major effects on our late 20-century world, the biography carries Marx through to the burnt-out but still masterful leader. Felix traces the pattern and demonstrates the importance of such political actions by Marx as his editorship of leading radical newspapers in Germany during two important periods; his leadership of the Communist League and the First International; his role as a provincial politician as well as an editor in the German Revolution of 1848; his brilliant use of the Paris Commune to gain credit for the International and his revolutionary doctrines; his shaping of the Communist Manifesto and Capital to provide inspiration, strategy, and structure for world communist revolution; his manipulation of the German socialist parties; and his cautious but quickening contacts with Russian populist revolutionaries. In all of this, Felix shows Marx the politician seeking and nurturing power against the grain of his time. While his political greatness became apparent only following his death, his stature was assured by the genius that kept his communist revolution inviolate?neither corrupted by compromise nor annihilated by premature action. By focusing on Marx's actions as related to his ideas, Felix renders untenable the conventional view of Marx as a failed and distracted leader. He shows, on the contrary, that Marx belongs among such leaders as Pericles and Caesar, Disraeli and Bismarck, Lenin and Roosevelt.
