### A Step-by-Step Manual, Highlighting Artists and Their Creative Practice

*Routledge Gum Printing: A Step-by-Step Manual Highlighting Artists and Their Creative Practice* is a two-part book on gum bichromate written by the medium's leading expert, Christina Z. Anderson. Section One provides a step-by-step description of the gum printing process. From setting up the "dimroom" (no darkroom required!) to evaluating finished prints, it walks the reader through everything that is needed to establish a firm gum practice with the simplest of setups at home. Section Two showcases contemporary artists' works, illustrating the myriad ways gum is conceptualized and practiced today. The works in these pages range from monochrome to colorful and from subtle to bold, representing a variety of genres, including still lifes, portraits, nudes, landscapes, urbanscapes and more. Featuring over 80 artists and 400 full-color images, Gum Printing is the most complete overview of this dynamic and expressive medium that has yet appeared in print. Key topics covered include: The history of gum Simple digital negatives for gum, platinum, and cyanotype Preparing supplies Making monochrome, duotone, tricolor, and quadcolor gum prints Printing gum over cyanotype Printing gum over platinum Troubleshooting gum Advice on developing a creative practice

## Dark Stars Photography Volume 1

*Dark Stars Photo* A photography book by Dark Stars Photography. One of the most influential photography outlets located in Vancouver BC Canada. This book is dedicated to Sci-Fi Fanatics, Gamers, Cosplayers, and Fairy Tale lovers new and old. A little about Dark Stars Photography: Two creators, two minds alike, a young couple who set out to make a footprint in the world of fashion and modeling. Having succeeded to a very large underground audience, their visions have become intoxicating for fans. Starting in 2007 they always had a love for some of the most iconic genres, with science fiction being the most influential. With inspiration from popular movies, video games, comic books, vintage B films, and science fiction artist's they incorporated all into one medium. They became known as a power house couple; hair styling, makeup, photography, creating their own designed and handmade clothes, crafting props, and making 3D renders with popular programs and “mish mashing” it up into one. By purchasing this book you are investing in Dark Stars Photography's future endeavours and helping them to expand their business for others to enjoy. You are the fan giving direction and helping a team travel to destinations where they are able to work with those that want the opportunity to work with Dark Stars Photography.

### Epistemic Functions of Images in Medical Research on Hysteria

*transcript Verlag* Hysteria, a mysterious disease known since antiquity, is said to have ceased to exist. Challenging this commonly held view, this is the first cross-disciplinary study to examine the current functional neuroimaging research into hysteria and compare it to the 19th-century image-based research into the same disorder. Paula Muhr's central argument is that, both in the 19th-century and current neurobiological research on hysteria, images have enabled researchers to generate new medical insights. Through detailed case studies, Muhr traces how different images, from photography to functional brain scans, have reshaped the historically situated medical understanding of this disorder that defies the mind-body dualism.

### Real/ideal

"During the past twenty-five years, many photographic attitudes and have been extended. A great variety of working methods, assumptions, pictorial structures, and materials have been employed which have served to increase a collective inventory of photographic experience. The book and exhibition also give a broad indication of a range of recent developments as represented by the following photographers : Ansel Adams, Robert Adams, Jim Alinder, Thomas Barrow, Michael Becotte, R.C. Bishop, Paul Caponigro, William Clift, Linda Connor, Judy Dater, Joe Deal, Peter De Lory, Paul Diamond, Allen Dutton, Reed Estabrook, Robert Fichter, David Freund, Lee Friedlander, Marc Gaede, Oliver Gagliani, Laura Gilpin, Betty Hahn, James Hajicek, Robert Heinecken, Nicholas Hlobeczy, Philip Hyde, Earl Iversen, Harold Jones, Kenneth Josephson, Nathan Lyons, Marshall Mayer, Lawrence McFarland, Roger Mertin, NASA/ERTS, Anne Noggle, Tod Papageorge, John Pfahl, David Plowden, Eliot Porter, Eric Renner, Marcia Resnick, Barbara Jo Revelle, Charles Roitz, Meridel Rubenstein, Richard Schaeffer, Stephen Shore, Michael Smith, Jerry Uelsmann, David Vestal, Jack Welpott, Henry Wessel, Jr., Brett Weston, Minor White, Geoffrey Wingham, Garry Winogrand, Ronald Wohlauer."--Page 4 de la couverture.

Mapping the Spectrum

Techniques of Visual Representation in Research and Teaching

*Oxford University Press on Demand* 'Physicists, chemists and astronomers, as well as historians and philosophers of science and ideas, and the intelligent layman will all find much that is thought provoking and fascinating in this book, which also includes an extensive bibliography.' -*Astrophysics and Space Science* This book describes how advances in recording and printing technologies have influenced the research and teaching style of succeeding generations of physicists, chemists, and astronomers, particularly from the boom of spectrum analysis in the 1860s until the advent of quantum mechanics. Seemingly disparate strands such as spectrochemistry and cartography, instrument-design and science education are woven into the rich tapestry of one of the most fascinating and influential research-technologies of the late 19th and early 20th century.

PHOTO ART THERAPY

A Jungian Perspective

*Charles C Thomas Publisher* **PHOTO ART THERAPY: A JUNGIAN PERSPECTIVE** illuminates and guides the reader through new possibilities for art therapy practice, approached by the authors as a creative interaction with different artistic media and therapeutic methods. Although the book is based on Jungian theory and practice, the authors carefully explore cooperation with other therapeutic perspectives, all of which are in keeping with Jung's belief in transcendent universals and multifaceted therapeutic practices. The book is divided into four sections: Self-Understanding, Alleviating Distress and Symptoms, Group Therapy, and Discussion. Wherever possible and practical, photo art therapy work done by clients as illustrations of the concepts is included. The text not only demonstrates innovative ways of combining artistic media but allows clients to articulate the inner workings of the therapeutic process through an engaging series of dialogues and narrations. The book establishes a twofold landmark in elucidating art therapy's close and vital connections to both phototherapy and the discipline of Jungian psychotherapy.
