POLICY METAMORPHOSIS IN CHINA

A CASE STUDY OF MINBAN EDUCATION IN SHANGHAI

Lexington Books This book delineates the history of minban/private education in mainland China, particularly its current form. It studies the process of policy implementation in the domain of minban education, on the basis of which the Chinese central-local relationships and the contemporary model of state governance are analyzed.

THE CHINESE CAPITAL MARKET

**PERFORMANCE, PARAMETERS FOR FURTHER EVOLUTION, AND
IMPLICATIONS FOR DEVELOPMENT**

Springer Science & Business Media Annette Kleinbrod analyses the Chinese capital market and examines to what extent the stock and bond markets contribute to the financing of China's development. Her approach takes

into account the relatively recent re-emergence of the stock and bond markets in China, the limited data available, and the country's current dynamics.

CHINESE PUBLISHING AND PRINT CULTURE IN TRANSITION, CIRCA 1800 TO 2008

BRILL These essays examine the transformation of Chinese print culture over the past two centuries during which new technologies, intellectual change, and sociopolitical upheavals expanded reading audiences, spawned new genres of print, and reshaped the relationship between publishing and the state.

THE PEOPLE'S REPUBLIC OF CHINA AT 60

AN INTERNATIONAL ASSESSMENT

BRILL In 2009 the Fairbank Center for Chinese Studies convened a major conference to discuss the health and longevity of China's ruling system and to consider a fundamental question: After three decades of internal strife and turmoil, followed by an era of reform, entrepreneurialism, and internationalization, is the PRC here for the dynastic long haul? Bringing together scholars and students of China from around the world, the gathering witnessed an energetic exchange of views on four interrelated themes: politics, social transformations, wealth and well-being, and culture, belief, and practice. Edited and expanded from the original conference papers, the wide-ranging essays in this bilingual volume remain true to the conference's aim: to promote open discussion of the past, present, and future of the People's Republic of China.

WESTERN PERSPECTIVES ON THE PEOPLE'S REPUBLIC OF CHINA

POLITICS, ECONOMY AND SOCIETY

World Scientific How have Westerners seen the People's Republic of China over the years? The question raises many important issues, which this book aims to present, analyze and explain. The basic conclusion is that Western perspectives are somewhat more complex than simply viewing China's realities. Involved also are politics and power relations, trends in journalism and scholarship, as well as individual and group personalities and psychologies. Based on extensive personal experiences in China dating back to 1964 and wide-ranging travel in Tibet and ethnic regions since the 1980s, the author attempts to distinguish trends in different Western countries. However, most of the material will concern the United States, which has been the dominant contributor to Western perspectives during the whole period of concern to this book. The perspectives are taken up by topic, including politics, economy, society, and ethnic minorities. Inherent

in each topic is the way cultures see and react towards each other. Images and perspectives can affect policy, and have done so many times in the past, which adds to the importance of this book. It also takes up questions of the sources of Western perspectives, both in terms of direct sources, such as newspapers, television or the internet, and deeper ones, such as social values and temperament. Contents: Introduction Historical Background Political and International Relations Perspectives on China, 1949-1971 Trends in Political and Foreign Relations Perspectives on China, 1971-2001 Political and General Western Perspectives on China in the Twenty-First Century Perspectives on the Chinese Economy, Population Policy and Environment to the End of the Twentieth Century The Twenty-First Century: Perspectives on the Chinese Economy, Population Issues and Environment Socio-cultural Perspectives on the People's Republic of China Perspectives on the Ethnic Minorities Conclusion Readership: Undergraduates, graduates, academics and researchers who are interested in Chinese politics, economy and society, especially its ethnic minorities. Keywords: Political and Foreign Relations; Chinese Economy; Population Policy and Environment; Socio-cultural Images; Ethnic Minorities Key Features: The book deals with a range of perspectives/images on the People's Republic of China, including the highly important and controversial topic of Western perspectives on the ethnic minorities, especially Tibet and the Tibetans The book incorporates the author's extensive personal experiences in the People's Republic dating back to 1964, and his extensive travel in Tibet and ethnic regions since the 1980s

TRADE UNIONS IN CHINA

THE CHALLENGE OF LABOUR UNREST

Routledge The transition from a command economy to a capitalist market economy has entirely altered the industrial landscape in which Chinese trade unions have to operate. This book focuses on how the All China Federation of Trade Unions (ACFTU) is reforming under current conditions and demonstrates that labour unrest is the principal driving force behind trade union reform in China. Presenting case studies where reform has been largely inspired by the pressure of worker activism from below, the book examines three crucial areas of trade union activity - collective bargaining, labour rights and trade union direct elections - against the background of China's turbulent industrial relations history. As well as exploring the principal direction of trade union reform, which has been to channel disputes into juridical forms of dispute resolution sponsored by the State, the book also highlights key examples of more innovative experiments in trade union work. These represent a clear break with past practice and, crucially, have been recognised by both the union and Party leaderships as models for future trade union policy and practice. The book provides both a timely reference point and highlights the road to effective trade union solidarity.

REGIONAL CHINA

A BUSINESS AND ECONOMIC HANDBOOK

Springer It is a resource book that profiles the geography, demography, economy, political environment and business climates for each of China's 31 provinces. It will become a useful source book to researchers, businesses, government agencies, and news media interested in either the rapidly changing provincial economies or the Chinese economy as a whole.

CHINESE COMPLAINT SYSTEMS

NATURAL RESISTANCE

Routledge Complaint systems have existed in China for many years, and in 2004, a debate took place in the People's Republic of China (PRC) over the Letters and Visits System (xinfang zhidu), which was designed to allow people to register complaints with the upper levels of the government. However, both parties generally overlooked several different complaint systems that had preceded the Letters and Visits System during China's history. Indeed, despite the rich heritage of numerous complaint systems throughout China's past, most studies of complaint systems in China have paid little attention to the origins, development, practices, impact, and nature of similar institutions in the *longue durée* of Chinese history. Presenting a comprehensive study of complaint systems in Chinese history from early times to the present, this important book fills the gap in existing literature on complaint systems in China. Drawing on primary sources, Qiang Fang analyses the significance of continuities and changes in historical complaint systems for contemporary China, where the state continues to be nominally strong, but actually fragile. Unlike other major theories of popular resistance to the state in China, such as 'everyday resistance', 'rightful resistance' and resistance 'as legal rights', this book develops the theory that behind Chinese complaint systems, there was a mentality of 'natural resistance' that has been deeply embedded in Chinese culture, political philosophy, and folk religion for millennia. Given this history, Fang concludes that it is likely that some form of complaint system will continue to exist, and by helping to mitigate the increasing demands of the Chinese state on the Chinese, will serve to strengthen the state. An essential contribution understanding the strengths, weaknesses, and various roles of the Letters and Visits System in contemporary China, as well as the systems that have preceded it throughout China's long history, this book will be of huge interest to students and scholars of Chinese history, politics and law.

THE ADVOCACY TRAP

TRANSNATIONAL ACTIVISM AND STATE POWER IN CHINA

Manchester University Press What does China's rise mean for transnational civil society? What happens when global activist networks engage a powerful and norm-resistant new hegemon? This book combines detailed ethnographic research with cross-case comparisons to identify key factors underpinning variation in the results and processes of advocacy on a range of issues affecting both China and the world, including global warming, intellectual property rights, HIV/AIDS treatment, the use of capital punishment, suppression of the Falun Gong religious movement, and Tibetan independence. Built on a unique blend of comparative and international theory, it advances the notion of "advocacy drift"—a process whereby the objectives and principled beliefs of activists are transformed through interaction with the Chinese state. The book offers a timely reassessment of transnational civil society, including its power to persuade and to leverage the policies of national governments.

UNEQUAL CHINA

THE POLITICAL ECONOMY AND CULTURAL POLITICS OF INEQUALITY

Routledge Economic development and a dramatic improvement in living standards in many parts of the People's Republic of China during the past three decades of economic reforms have been hailed by the Chinese Communist Party and many commentators in the international arena as the most spectacular achievements in the history of humanity. However, three decades of economic reforms have also transformed China from one of the world's most egalitarian societies into one of the most unequal. This book offers a comprehensive account of inequality in China from an interdisciplinary perspective. It both draws on, and speaks to, the existing body of literature that is generated mainly in the fields of economics and sociology, while extending its scope to also examine the political, social, moral and cultural dimensions of inequality. Each chapter addresses the question of inequality from a specific context of research, including housing, health care, social welfare, education, migration, land distribution, law, gender and sexuality. Moving beyond traditional socio-economic theories, the contributors to this volume explore a wide range of social, political, economic and cultural practices that result from, as well as further entrench, the inequalities in Chinese society. Importantly, the essays in *Unequal China* probe the hidden causes of inequality - namely, the role of state power and the importance of culture - and underline how both state power and cultural factors have a key part to play in legitimating inequality. With an innovative approach that moves beyond the economic and sociological roots of inequality in China, this volume is a welcome addition to what is a growing field of study, and will appeal to students and scholars interested in Chinese culture and society, Chinese politics and Asian social policy.

REMAKING THE CHINESE LEVIATHAN

MARKET TRANSITION AND THE POLITICS OF GOVERNANCE IN CHINA

Stanford University Press This book examines a wide range of governance reforms in the People's Republic of China, including administrative rationalization, divestiture of businesses operated by the military, and the building of anticorruption mechanisms, to analyze how China's leaders have reformed existing institutions and constructed new ones to cope with unruly markets, curb corrupt practices, and bring about a regulated economic order.

POVERTY AND PACIFICATION

THE CHINESE STATE ABANDONS THE OLD WORKING CLASS

Rowman & Littlefield This groundbreaking book explores China's Minimum Livelihood Guarantee program, which was extended in the hopes of quieting the protests of millions of laid-off workers. Solinger replays the duet that unfolded between the state and the ranks of the proletariat and documents the progressively more silent drama as workers have struggled to survive.

LEGAL REFORMS IN CHINA AND VIETNAM

A COMPARISON OF ASIAN COMMUNIST REGIMES

Routledge This book provides a comprehensive, comparative assessment of legal developments in China and Vietnam, examining similarities and differences, and highlighting the factors likely to promote, change or resist the spread of the Chinese model.

THE BRITISH NATIONAL BIBLIOGRAPHY

HANDBOOK ON THE POLITICS OF REGULATION

Edward Elgar Publishing 'Political science has leap-frogged law, economics, and sociology to become the dominant discipline contributing to regulatory studies. David Levi-Faur's volume taps the rich veins of regulatory scholarship that have made this the case. It brings together the talented new network of politics scholars intrigued by the importance of the changing nature of state and non-state regulation. Their fresh insights complement important new work by established stars of the field. Definitely a book to have on your shelf when in search of exciting theoretical approaches to politics.' - John Braithwaite, Australian National University "'Regulation", in its manifold forms, is the central process of contemporary governance, as it seeks to blend the dynamism of market economies with responsiveness to political and normative demands for health, safety, environmental protection, and fairness. Understanding

regulation's varieties, vulnerabilities, and virtues has become a significant focus of academic research and theory. This volume provides an extraordinary survey of research in that field - a survey remarkable in its comprehensiveness, outstanding in the quality of the contributions by leading regulatory scholars from different nations and academic disciplines.' - Robert A. Kagan, University of California, Berkeley, US 'An authoritative collection by a range of contributors with outstanding reputations in the field.' - Michael Moran, WJM Mackenzie Professor of Government 'This is an extraordinarily useful one-stop-shop for a wide range of traditions and approaches to the political aspects of regulation. David Levi-Faur has assembled a fine collection that by reporting on the state of the art also shows the way ahead for a discipline that has to capture and explain dramatic changes in real-world regulatory philosophies and policies.' - Claudio Radaelli, University of Exeter, UK 'This is an unusually impressive edited volume. Its contributors include the leading academic experts on government regulation from around the world. Its several clearly-written and informative essays address the most important topics, issues, and debates that have engaged students of regulatory politics. I strongly recommend this volume to anyone interested in understanding the breadth and depth of contemporary scholarship on the political dimensions of regulation.' - David Vogel, University of California, Berkeley, US This unique Handbook offers the most up-to-date and comprehensive, state-of-the-art reviews of the politics of regulation. It presents and discusses the core theories and concepts of regulation in response to the rise of the regulatory state and regulatory capitalism, and in the context of the 'golden age of regulation'. Its ten sections include forty-nine chapters covering issues as diverse and varied as: theories of regulation; historical perspectives on regulation; regulation of old and new media; risk regulation, enforcement and compliance; better regulation; civil regulation; European regulatory governance; and global regulation. As a whole, it provides an essential point of reference for all those working on the political, social, and economic aspects of regulation. This comprehensive resource will be of immense value to scholars and policymakers in numerous fields and disciplines including political science, public policy and administration, international relations, regulation, international law, business and politics, European studies, regional studies, and development studies.

CHINA UNDER HU JINTAO

OPPORTUNITIES, DANGERS, AND DILEMMAS

World Scientific ' The fourth generation of leaders of the People's Republic of China, while benefiting from the prestige of China's entry into the World Trade Organization and the honor of hosting the 2008 Olympic Games, also needs to contemplate the sobering side-effects of a rapid and internationally-interdependent economy and a troubled and only partly

reformed political system. This important book approaches the study of the PRC under Hu Jintao in a two-fold manner: by examining the new political parameters within which the party-state functions and by analyzing the prominent issues – at home and abroad – that are commanding the attention of China's new leaders. The book tackles a comprehensive range of topics, including elites, institutions and state-society relations, politics and the political implications of economic change, domestic politics and foreign relations. Contents: China under Hu Jintao: Introduction (T-J Cheng et al.) Political Succession: Changing Guards and Changing Rules (J Fewsmith) Is the Chinese State Apparatus Being Revamped? RHYMES OF A SHOESHINE BOY

iUniverse With the poetic skill of Cesar Vallejo, and handiness of Ricardo

Palma, Siluk produces a Peruvian background in a most favorable way. His vantage point, like the poet Par Lagerkvist, is rich with humanism. Thus, the Laureate Poet Dennis Siluk (awarded the title of the most favored writer for the Eldritch Dark Magazine, 2004 ((readership of some 2.2-million ((and 1982, Pulitzer Entry)): his vantage point centers on the exploration and social identity of Peruvianism, for the most part; along with a twelve part poem on Vietnam. "In great poets we often find calmness and undisturbed beauty, a serenity and clarity." says acclaimed international poet Robert Bly, whom the author has had some correspondence with, and has met, and respects ... says Mr. Siluk, "Some poetry comes from our imagination and passion, like dreams that need daylight for them to be opened up; as did the Andes, Mantaro Valley, along with Huancayo and Lima, Peru, become the seeds for me in writing this new book, *Spell of the Andes*; which opened my imagination and passion up." Mr. Siluk once told me, "First you've heard of it, then you see it, then it becomes part of you"; and this book sure did become part of him. Rosa Peñaloza

CHINA AND INTERNATIONAL INSTITUTIONS

ALTERNATE PATHS TO GLOBAL POWER

Routledge China has shifted its foreign policy from one that avoided engagement in international organizations to one that is now embracing them. These moves present a new challenge to international relations theory. How will the global community be affected by the engagement of this massive global power with international institutions? This new study explores why China has chosen to abandon its previous doctrine of institutional isolation and details how it is currently unable to balance American power unilaterally and details an indirect path to greater power. In addition, it includes the first major analysis of the Shanghai Cooperation Organization, comprising China, Russia and most of Central Asia. In

contrast to many works on the "rise of China" question, which place an emphasis on her material goods and powers, this book delivers a new approach. It shows how the unique barriers Beijing is facing are preventing the country from taking the traditional paths of territorial expansion and political-economic domination in order to develop as a great power. One of these barriers is the United States and its inherent military and economic strength. The other is the existence of nuclear weapons, which makes direct great power conflict unacceptably costly. China has therefore opted for a new path, using institutions as stepping stones to great power status. This book will be of great interest to students and scholars of international relations, world politics, world history and Asia.

SEEKING CHANGES

THE ECONOMIC DEVELOPMENT IN CONTEMPORARY CHINA

World Scientific Publishing Company This book is a collection of research papers by foreign scholars on the economic development of China and provides readers with insights into China's reforms of its economic system. The topics covered include the road of China's economic development, the mode of the country's economic growth, the issue of poverty, and environmental and food supply safety. The book also analyzes the problems that China is facing currently and will possibly encounter in the future, with suggestions on how China could continue on a healthy track of sustainable economic development and growth.

MANAGED CHAOS

THE FRAGILITY OF THE CHINESE MIRACLE

SAGE Publishing India **Managed Chaos: The Fragility of the Chinese Miracle** reads into the Chinese politics and economy and the disparate status and position of the two domains. On one hand, its economy has sustained a near 10 per cent growth rate for 30 years, while, on the other, trapped in an incomplete transition from a totalitarian to a democratic market economy, politically the country is still considered a fragile state. This book helps the reader resolve this incongruity through its inference. The defining features of this book are: - Armed with an original application of Michal Kalecki's theory of intermediate regimes, it provides an explanation of China's explosive growth. - It indicates the formation of a new stratum, through winding up of centralised planning, the stratum of 'proto-bourgeoisie', consisting of the local cadres of the communist party, who can counter the central cadres for capturing investible resources of the state. - It creates a single politic-economic model that explains China's economic and political development. The causal connections in the model make it possible to predict China's future, and the challenges it faces. This book makes a significant contribution to the literature on Chinese political economy over the past three decades. It is a must read for all discerning

and informed readers. It will also be valuable for policy makers and students and researchers working in the areas of international relations, Chinese studies and political economy.

POLARIZED CITIES

PORTRAITS OF RICH AND POOR IN URBAN CHINA

Rowman & Littlefield This powerful book brings to life the human dimension of the social and economic divides in urban China. Leading scholars explore the increasing rigidity of class and social boundaries and analyze of the process of polarization and its outcomes by focusing on two new “castes” in contemporary China—the extravagantly wealthy and the profoundly poor.

ROUTLEDGE HANDBOOK OF DEMOCRATIZATION IN EAST ASIA

Routledge This handbook provides a comprehensive analysis of the dynamics and prospects of democratization in East Asia. A team of leading experts in the field offers discussion at both the country and regional level, including analysis of democratic attitudes and movements in China, Japan, South Korea, and Taiwan. Evaluating all the key components of regime evolution, from citizen politics to democratic institutions, the sections covered include: • Regional Trends and Country Overviews • Institutions, Elections, and Political Parties • Democratic Citizenship • Democratic Governance • The Political Economy of Democratization Examining the challenges that East Asian emerging democracies still face today, as well as the prospects of the region's authoritarian regimes, the Routledge Handbook of Democratization in East Asia will be useful for students and scholars of East Asian Politics, Comparative Politics, and Asian Studies.

DOUBLE PARADOX

RAPID GROWTH AND RISING CORRUPTION IN CHINA

Cornell University Press According to conventional wisdom, rising corruption reduces economic growth. And yet, between 1978 and 2010, even as officials were looting state coffers, extorting bribes, raking in kickbacks, and scraping off rents at unprecedented rates, the Chinese economy grew at an average annual rate of 9 percent. In *Double Paradox*, Andrew Wedeman seeks to explain why the Chinese economy performed so well despite widespread corruption at almost kleptocratic levels. Wedeman finds that the Chinese economy was able to survive predatory corruption because corruption did not explode until after economic reforms had unleashed dynamic growth. To a considerable extent corruption was also a by-product of the transfer of undervalued assets from the state to the emerging private and corporate sectors and a scramble to capture the windfall profits created by their transfer. Perhaps most critically, an anticorruption campaign, however flawed, has proved sufficient to prevent

corruption from spiraling out of control. Drawing on more than three decades of data from China-as well as examples of the interplay between corruption and growth in South Korea, Taiwan, Equatorial Guinea, and other nations in Africa and the Caribbean-Wedeman cautions that rapid growth requires not only ongoing and improved anticorruption efforts but also consolidated and strengthened property rights.

CHINESE SCULPTURE

Yale University Press Spanning some 7000 years, 'Chinese Sculpture' explores a beautiful and diverse world of objects, many of which have only come to light in the later half of the 20th century. The authors analyse and present, mostly in colour, some 500 examples of Chinese sculpture.

EMBODIED COGNITION OVER THE LIFESPAN AND IN APPLIED SETTINGS

This collection of articles explores the contribution of Embodied Cognition to studying the lifespan and potential applied fields. The contributions are theoretical and empirical and offer an important framework for future research and its applications.

SCREENING CHINA'S SOFT POWER

Routledge Promoting China's cultural soft power by disseminating modern Chinese values is one of the policies of President Xi Jinping. Although, it is usually understood as a top-down initiative, implemented willingly or unwillingly by writers, filmmakers, artists, and so on, and often manifesting itself in clumsy and awkward ways, for example, the concept of "the Chinese dream," intended to rival and perhaps appeal more strongly than "the American dream," modern Chinese values are in fact put forward in many ways by many different cultural actors. Through analyses of film festivals, CCTV, Confucius Institutes, auteurs, blockbusters, reality TV, and online digital cultures, this book exposes the limitations of China's officially promoted soft power in both conception and practice, and proposes a pluralistic approach to understanding Chinese soft power in

local, regional, and transnational contexts. As such, the book demonstrates the limitations of existing theories of soft power, and argues that the US-derived concept of soft power can benefit from being examined from a China perspective.

HOLDING CHINA TOGETHER

DIVERSITY AND NATIONAL INTEGRATION IN THE POST-DENG ERA

Cambridge University Press Despite many predictions of collapse and disintegration, China has managed to sustain unity and gain international stature since the Tiananmen crisis of 1989. Originally published in 2004, this volume addresses the 'fragmentation/disintegration thesis' and examines the sources and dynamics of China's resilience. Through theoretically informed empirical studies, the volume's authors look at key institutions for political integration and economic governance. They also dissect how difficult policies to regulate economic and social life (employment and migration, population planning, industrial adjustment, and regional disparities) are designed and implemented. The authors show that China's leaders have retained authoritarian political institutions, but have also reinforced and modified them, constructing fresh ones in the light of changing circumstances. Institutional and policy adaptations together have helped shore up political authority and create an environment for rapid growth, while accommodating growing diversity.

JOURNEY TO THE WEST

WILL CHINA DEMOCRATIZE?

Johns Hopkins University Press+ORM Leading experts on China offer their enlightening analysis on one of the most crucial and complex questions facing the future of international politics. Moving toward open markets and international trade has brought extraordinary economic success to China, yet its leadership still maintains an authoritarian grip over its massive population. From repressing political movements to controlling internet traffic, China's undemocratic policies present an attractive model for other authoritarian regimes. But can China continue its growth without political reform? In *Will China Democratize?*, Andrew J. Nathan, Larry Diamond, and Marc F. Plattner present valuable analysis for anyone wondering if, when or how China might evolve politically. Since the *Journal of Democracy's*

very first issue in January 1990, which featured articles reflecting on the then-recent Tiananmen Square massacre, the Journal has regularly published articles about China and its politics. By bringing together the wide spectrum of views that have appeared in the Journal's pages—from contributors including Fang Lizhi, Perry Link, Michel Oksenberg, Minxin Pei, Henry S. Rowen, and Nobel laureate Liu Xiaobo— *Will China Democratize?* provides a clear view of the complex forces driving change in China's regime and society.

VALUES IN HERITAGE MANAGEMENT

EMERGING APPROACHES AND RESEARCH DIRECTIONS

Getty Publications Bringing together leading conservation scholars and professionals from around the world, this volume offers a timely look at values-based approaches to heritage management. Over the last fifty years, conservation professionals have confronted increasingly complex political, economic, and cultural dynamics. This volume, with contributions by leading international practitioners and scholars, reviews how values-based methods have come to influence conservation, takes stock of emerging approaches to values in heritage practice and policy, identifies common challenges and related spheres of knowledge, and proposes specific areas in which the development of new approaches and future research may help advance the field.
