Blount Postal History Symposia Select Papers, 2010-2011** Rarely do scholars of postal organizations and systems meet and discuss their ideas and research with scholars of philately. In an attempt to bridge this gap, the National Postal Museum and the American Philatelic Society hosted the first Winton M. Blount Postal History symposium on 3-4 November 2006 to bring together these two research groups to discuss postal history. This publication covers the next two symposia. The 2010 theme was "Stamps and the Mail: Images, Icons and Identity." Stamps, as official government documents, can be treated as primary resources designed to convey specific political and esthetic messages. Other topics and themes for the symposium were stamp design's influence on advertising envelopes and bulk mailings, censorship of stamps as propaganda as used on letters, and the role of the Citizens' Stamp Advisory Committee or organizations that generate the designs. The 2011 symposium was held at the American Philatelic Center in conjunction with the United States Stamp Society's annual meeting. The United States Stamp Society is the preeminent organization devoted to the study of U.S. stamps. It is a nonprofit, volunteer-run association of collectors to promote the study of the philatelic output of the Bureau of Engraving and Printing and of postage and revenue stamped paper produced by others for use in the United States and U.S. administered areas. The theme of the symposium was "How Commerce and Industry Shaped the Mails."

Public Administration Reformation Market Demand from Public Organizations Routledge In an attempt to instil trust in their performance, credibility, integrity, efficiency, cost-effectiveness, and good governance, many public organizations are in effect viewing tax-paying citizens as consumers. Little research exists to explore synergies between the market economy, public administration reformation, and their complex bilateral effects. This book takes a timely look at the heightened need for public administration reform as a result of the economic challenges currently faced by nations across the globe. In particular it explores the roles of eGovernment and a citizen-centric focus in this transformation. Public Administration Reform examines several commonly-held assumptions about public administration: the public sector is slow and bureaucratic; government employees are frequently disengaged; and government agencies are sometimes wasteful. eGovernment is proposed as a key tool in the improvement of both public services and reputations of public organizations.

Records of the Proceedings and Printed Papers of the Parliament Today's Medical Assistant Clinical and Administrative Procedures Elsevier Health Sciences Bringing together the clinical know-how of Kathy Bonewit-West, the administrative expertise of Sue Hunt, and the anatomy and physiology knowledge of Edith Applegate, this unique, hands-on text guides you through the medical knowledge and skills you need to succeed in today's fast-paced medical office. The latest standards and competencies for the medical assistant have been incorporated into this new edition, along with expanded coverage on important topics such as nutrition, the electronic medical record, ICD-10, emergency preparedness and disaster planning, time management, and computerized prescription refills. Consistent, meticulous coverage throughout the main text, IRM, SG, DVDs, Evolve, and more provide reliable content and unparalleled accuracy. Over 90 procedural videos on DVD and online provide a visual representation of important procedures. Expanded Student Evolve site contains all animations, games (such as Quiz Show and Road to Recovery), drag-and-drop exercises, Apply your Knowledge exercises, Prepare for Certification exercises, matching exercises, and other helpful activities such as blood pressure readings, determining height and weight, and drawing up medication. What Would You Do? What Would You Not Do? boxes and responses offer applications of real-life case studies. Clear and concise Anatomy and Physiology coverage covers the basics of A&P and eliminates the need for a separate A&P text. Content updates reflect the latest competencies for medical assistants and ensure you have the most current information on the newest trends and updates in the medical assisting world. 8th grade reading level makes material approachable and easy to understand. New chapter on Emergency Preparedness offers a well-rounded perspective on what to do in specific emergency situations. New OSHA Bloodborne Pathogens video improves your understanding of personal safety following the OSHA standards. Pronunciation section in the Terminology Review gives you confidence with pronunciation and medical knowledge. Application to EMR where appropriate prepares you for the real world by dealing with electronic medical records.

Mechanics of laminated Composite doubly-curved shell structures The generalized differential quadrature method and the strong formulation finite element method Società Editrice Esculapio This manuscript comes from the experience gained over ten years of study and research on shell structures and on the Generalized Differential Quadrature method. The title, *Mechanics of Laminated Composite Doubly-Curved Shell Structures*, illustrates the theme followed in the present volume. The present study aims to analyze the static and dynamic behavior of moderately thick shells made of composite materials through the application of the Differential Quadrature (DQ) technique. A particular attention is paid, other than fibrous and laminated composites, also to "Functionally Graded Materials" (FGMs). They are non-homogeneous materials, characterized by a continuous variation of the mechanical properties through a particular direction. The GDQ numerical solution is compared, not only with literature results, but also with the ones supplied and obtained through the use of different structural codes based on the Finite Element Method (FEM). Furthermore, an advanced version of GDQ method is also presented. This methodology is termed Strong Formulation Finite Element Method (SFEM) because it employs the strong form of the differential system of equations at the master element level and the mapping technique, proper of FEM. The connectivity between two elements is enforced through compatibility conditions.

Educational Research: a Beginner's Guide Xlibris Corporation This book presents a rudimentary exposure to the field of educational research and an attempt to allay the unwarranted fear of those who perceive research as a highly technical and complex scholarly activity carried out by persons in the sciences. The author takes the position that anyone can do research and that it can be an interesting and very worthwhile experience. Educational research, particularly action research, which the author emphasizes, is an invaluable exercise about which everyone in education should be knowledgeable or at least be familiar. Starting with an explication of some salient concepts in the study of research (e.g., research, educational research, research problem v. research topic, hypothesis, experimental v. non-experimental research), the book takes the reader through the process of

conducting a research problem from problem selection and statement, significance, review of literature, methodology, data analysis, findings to recommendations and conclusions. Detailed descriptions of the American Psychological Association (APA) style of referencing with ample examples are provided. The book is written in simple language so that even high school students will be able to acquire a fairly good understanding of each contents. Though the primary target population is undergraduate students of education, the contents are broad enough to provide a guide for students in other disciplines, as well as whet the appetite of the general reader who seeks only a basic knowledge of research and/or educational research.

Dog Control and Welfare Seventh Report of Session 2012-13, Vol. 1:

Report, Together with Formal Minutes, Oral and Written Evidence The

Stationery Office DEFRA's belated proposals to tackle irresponsible dog ownership are too limited. Since 2007 dogs have killed seven people, including five children, in private homes. The NHS also spends over £3 million annually treating dog attack injuries. Some eight assistance dogs a month, and thousands of livestock annually, are attacked by dogs. The Home Office approach to tackling antisocial behaviour is too simplistic; and fails to reflect the impact that poor breeding and training by irresponsible owners can have on a dog's behaviour. New rules should give enforcement officers more effective powers, including Dog Control Notices, to prevent dog-related antisocial behaviour. Local authorities need to devote more resources to the effective management of stray dogs. MPs call for changes in the legislation to give powers to extend the banned list to include other dogs with particularly aggressive characteristics. At the same time, those tasked to enforce legislation should have the discretion to neuter rather than destroy a banned animal where a particular dog poses no threat. The Advisory Council on Welfare Issues of Dog Breeding should be given a formal regulatory role to enforce standards. Any breeder producing more than two litters per year should be licensed and subject to welfare checks. The Kennel Club should stop registering puppies from breeders not compliant with its own Assured Breeder Scheme. It should also commission an independent annual review of Breed Standards led by vets to eliminate health problems linked to breeding for exaggerated characteristics. Lastly, MPs call on websites advertising pets to develop a voluntary Code of Practice

Strong and Weak Formulations for Arbitrarily Shaped Shell Structures

Società Editrice Esculapio This book aims to present in depth several Higher-order Shear Deformation Theories (HSDTs) by means of a unified approach for the mechanical analysis of doubly-curved shell structures made of anisotropic and composite materials. In particular, the strong and weak formulations of the corresponding governing equations are discussed and illustrated. The approach presented in this volume is completely general and represents a valid tool to investigate the structural behavior of many arbitrarily shaped structures. An isogeometric mapping procedure is also illustrated to this aim. Special attention is given also to advanced and innovative constituents, such as Carbon Nanotubes (CNTs), Variable Angle Tow (VAT) composites and Functionally Graded Materials (FGMs). In addition, several numerical applications are developed to support the theoretical models. Accurate, efficient and reliable numerical techniques able to approximate both derivatives and integrals are presented, which are respectively the Differential Quadrature (DQ) and Integral Quadrature (IQ) methods. Finally, two numerical techniques, named Strong Formulation Finite Element Method (SFEM) and Weak Formulation Finite Element Method (WFEM), are developed to deal with multi-element domains characterized by arbitrary shapes and discontinuities. **The Report**

of the Hillsborough Independent Panel The Stationery Office 96 women, men and children died as a result of the disaster in Hillsborough Stadium on 15 April 1989. They were crushed due to overcrowding in the Leppings Lane terrace, penned in by the ground's fencing. Hundreds more were injured and thousands traumatised. Lord Justice Taylor led a judicial inquiry (1990, Cm. 962, ISBN 9780101096225), concluding that the main cause of the disaster was the failure of police control. The next 11 years saw a variety of investigations and proceedings, including a scrutiny of new evidence (Lord Justice Stuart-Smith, 1998, Cm. 3878, ISBN 9780101387828). Yet many bereaved families felt that the true context, circumstances and aftermath had not been adequately made public, and were particularly aggrieved that it had become widely assumed that Liverpool fans' behaviour had contributed to the disaster. The Independent Panel was established in 2010 to oversee full public disclosure of all documents relating to the disaster and to report on its work. This report is in three parts. Firstly it shows what was already known and in the public domain by 2010. Secondly, in 12 detailed chapters, it describes what the disclosed documents add to public understanding. The third part gives a review of options for providing an archive of the documents. The disclosed documents (available at <http://panel.hillsborough.independent.gov.uk/>) add considerably to public understanding. They show that multiple factors were responsible for the tragedy and that the fans were not the cause. The report also shows that the bereaved families met a series of obstacles in their search for justice over more than 20 years. **The**

From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. **Parenting Matters** identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States. **The Cumulative Book Index Preliminary Edition of Statistics: Learning from Data (Book Only) Cengage Learning** **STATISTICS: LEARNING FROM DATA**, by respected and successful author Roxy Peck, resolves common problems faced by both students and instructors with an innovative approach to elementary statistics. Peck tackles the areas students struggle with most--probability, hypothesis testing, and selecting an appropriate method of analysis--unlike any text on the market. Probability coverage is based on current research that shows how students best learn the

subject. Two unique chapters, one on statistical inference and another on learning from experiment data, address two common areas of student confusion: choosing a particular inference method and using inference methods with experimental data. Supported by learning objectives, real-data examples and exercises, and technology notes, this brand new text guides students in gaining conceptual understanding, mechanical proficiency, and the ability to put knowledge into practice. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Bridging Two Peoples Chief Peter E. Jones, 1843-1909 Wilfrid Laurier Univ. Press Bridging Two Peoples tells the story of Dr. Peter E. Jones, who in 1866 became one of the first status Indians to obtain a medical doctor degree from a Canadian university. He returned to his southern Ontario reserve and was elected chief and band doctor. As secretary to the Grand Indian Council of Ontario he became a bridge between peoples, conveying the chiefs' concerns to his political mentor Prime Minister Sir John A. Macdonald, most importantly during consultations on the Indian Act. The third son of a Mississauga-Ojibwe missionary and his English wife, Peter E. Jones overcame paralytic polio to lead his people forward. He supported the granting of voting rights to Indians and edited Canada's first Native newspaper to encourage them to vote. Appointed a Federal Indian Agent, a post usually reserved for non-Natives, Jones promoted education and introduced modern public health measures on his reserve. But there was little he could do to stem the ravages of tuberculosis that cemetery records show claimed upwards of 40 per cent of the band. The Jones family included Native and non-Native members who treated each other equally. Jones's Mississauga grandmother is now honoured for helping survey the province of Ontario. His mother published books and his wife was an early feminist. The appendix describes how Aboriginal grandmothers used herbal medicines and crafted surgical appliances from birchbark.

The Professor Is In The Essential Guide To Turning Your Ph.D. Into a Job Crown The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.
