STATEBUILDING

John Wiley & Sons *After civil wars end, what can sustain peace in the long-term? In particular, how can outsiders facilitate durable conflict-managing institutions through statebuilding - a process that historically has been the outcome of bloody struggles to establish the state's authority over warlords, traditional authorities, and lawless territories? In this book, Timothy Sisk explores international efforts to help the world's most fragile post-civil war countries today build viable states that can provide for security and deliver the basic services essential for development. Tracing the historical roots of statebuilding to the present day, he demonstrates how the*

United Nations, leading powers, and well-meaning donors have engaged in statebuilding as a strategic approach to peacebuilding after war. Their efforts are informed by three key objectives: to enhance security by preventing war recurrence and fostering community and human security; to promote development through state provision of essential services such as water, sanitation, and education; to enhance human rights and democracy, reflecting the liberal international order that reaffirms the principles of democracy and human rights. Improving governance, alongside the state's ability to integrate social differences and manage conflicts over resources, identity, and national priorities, is essential for long-term peace. Whether the global statebuilding enterprise can succeed in creating a world of peaceful, well-governed, development-focused states is unclear. But the book concludes with a road map toward a better global regime to enable peacebuilding and development-oriented statebuilding into the 21st century.

HCI INTERNATIONAL 2013 - POSTERS' EXTENDED ABSTRACTS

INTERNATIONAL CONFERENCE, HCI INTERNATIONAL 2013, LAS VEGAS, NV, USA, JULY 21-26, 2013, PROCEEDINGS, PART II

Springer This is the second of a two-volume set (CCIS 373 and CCIS 374) that constitutes the extended abstracts of the posters presented during the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA, in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The extended abstracts were carefully reviewed and selected for inclusion in this two-volume set. The papers included in this volume are organized in the following topical sections: learning and education; health and medicine; media, art and culture; transport; Web and social media; information search and retrieval; work, collaboration and creativity; text and storytelling; agents, avatars and robots; smart environments; virtual and mixed environments; security and privacy.

THE EAGLE AND THE DRAGON

GLOBALIZATION AND EUROPEAN DREAMS OF CONQUEST IN CHINA AND AMERICA IN THE SIXTEENTH CENTURY

John Wiley & Sons *In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.*

ASSESSING REFERENCE AND USER SERVICES IN A DIGITAL AGE

Routledge *Effectively assess whether any library is making good use of the reference/user service resources available today Libraries need to develop standards by which they can assess their individual performances in a larger context, and Assessing Reference and User Services in a Digital Age makes significant contributions to this ongoing discussion. The book addresses its subject matter via approaches ranging from case studies of individual libraries to general discussions of best practices. The contributors explore the impact of the Internet on the field of evaluation, focusing on electronic reference and instruction. They highlight current issues, present research results, and offer expert advice on how to assess online reference and instruction. All chapters are well referenced to facilitate further study, and many include tables, appendixes, checklists, and other helpful features that make difficult information easy to access and understand. The chapters that make up Assessing Reference and User Services in a Digital Age are as rich and varied as the backgrounds of their authors. Experienced researchers provide the results of studies conducted to determine the nature and effectiveness of the online reference services offered by various libraries. Practitioners and administrators from different*

institutional settings (academic libraries, public libraries, consortiums, etc.) provide their perspectives on the issues facing librarians who need to assess the electronic services they provide. In this important new book: Andrew Briedenbagh shows how a chat service can be implemented and suggests which data should be collected for it Buff Hirko examines VET: the Virtual Evaluation Toolkit Ruth Vondracek shares the experiences of a university library as it entered a statewide e-reference consortium, and offers advice and issues to consider before entering such a partnership librarians from San Jose State University present a model for evaluating electronic reference services that can be used in public or academic libraries Kathleen Kern discusses holistic evaluation chat transcripts are addressed in several chapters, including Joseph Fennewald's comparisons of question categories, Lesley Moyo's analysis of the use of instruction in the virtual environment, and Caleb Tucker-Raymond's proposed set of quality measures for chat reference Laurie Probst and Michael Pelikan report on the use of a "Tell Us What You Think" button to gather user feedback Kristi Nelson and Catherine L. Ross examine a research study that asked library school students to submit a reference question online and report on their experiences Melissa Gross, Charles McClure, and R. David Lankes suggest measures to determine the cost and benefits of a virtual reference service librarians from Utah State University describe the development of their online instructional module Assessing Reference and User Services in a Digital Age is designed as essential reading for library administrators, public service librarians, and researchers. It provides general advice for practitioners as well as an examination of research results and methodological issues. INDIA TODAY

ECONOMY, POLITICS AND SOCIETY

John Wiley & Sons *Twenty years ago India was still generally thought of as an archetypal developing country, home to the largest number of poor people of any country in the world, and beset by problems of low economic growth, casteism and violent religious conflict. Now India is being feted as an economic power-house which might well become the second largest economy in the world before the middle of this century. Its democratic traditions, moreover, remain broadly intact. How and why has this historic transformation come about? And what are its implications for the people of India, for Indian society and politics? These are the big questions addressed in this book by three scholars who have lived and researched in different parts of India during the period of this great transformation. Each of the 13 chapters seeks to answer a particular question: When and why did India take off? How did a weak state promote audacious reform? Is government in India becoming more responsive (and to whom)? Does India have a civil society? Does caste still matter? Why is India threatened by a Maoist insurgency? In addressing these and other pressing questions, the authors take full account of vibrant new scholarship that has emerged over the past decade or so, both from Indian writers and India specialists, and from social scientists who have studied India in a comparative context. India Today is a comprehensive and compelling text for students of South Asia, political economy, development and comparative politics as well as anyone interested in the future of the world's largest democracy.*

STOP READING THE NEWS

A MANIFESTO FOR A HAPPIER, CALMER AND WISER LIFE

Hachette UK *STOP READING THE NEWS* is a vital toolkit for managing the upsetting coronavirus news cycle and finding equilibrium and calm at a time of chaos and uncertainty. In 2013 Rolf Dobelli stood in front of a roomful of journalists and proclaimed that he did not read the news. It caused a riot. Now the author of the bestselling *The Art of Thinking Clearly* finally sets down his philosophy in detail. And he practises what he preaches: he hasn't read the news for a decade. *Stop Reading the News* is Dobelli's manifesto about the dangers of the most toxic form of information - news. He shows the damage it does to our concentration and well-being, and how a misplaced sense of duty can misdirect our behaviour. Most

importantly, he offers the reader the guidance on how to live without news, and the many potential gains to be had: less disruption, more time, less anxiety, more insights. In a world of increasing disruption and division, *Stop Reading the News* is a welcome voice of calm and wisdom.

HUMAN-COMPUTER INTERACTION: CONCEPTS, METHODOLOGIES, TOOLS, AND APPLICATIONS

CONCEPTS, METHODOLOGIES, TOOLS, AND APPLICATIONS

IGI Global As modern technologies continue to develop and evolve, the ability of users to interface with new systems becomes a paramount concern. LIQUID LOVE

ON THE FRAILTY OF HUMAN BONDS

John Wiley & Sons *This book is about the central figure of our contemporary, 'liquid modern' times - the man or woman with no bonds, and particularly with none of the fixed or durable bonds that would allow the effort of self-definition and self-assertion to come to a rest. Having no permanent bonds, the denizen of our liquid modern society must tie whatever bonds they can to engage with others, using their own wits, skill and dedication. But none of these bonds are guaranteed to last. Moreover, they must be tied loosely so that they can be untied again, quickly and as effortlessly as possible, when circumstances change - as they surely will in our liquid modern society, over and over again. The uncanny frailty of human bonds, the feeling of insecurity that frailty inspires, and the conflicting desires to tighten the bonds yet keep them loose, are the principal themes of this important new book by Zygmunt Bauman, one of the most original and influential social thinkers of our time. It will be of great interest to students and scholars in sociology and in the social sciences and humanities generally, and it will appeal to anyone interested in the changing nature of human relationships.*

MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS

Cengage Learning Mathematics for Elementary School Teachers is designed to give you a profound understanding of the mathematical content that you are expected to know and be able to teach. The chapters integrate the National Council of Teachers of Mathematics (NCTM) Standards and Expectations and the new Common Core State Standards, as well as research literature. The five NCTM Process Standards of problem solving, reasoning and proof, communication, connections, and representation highlight ways that teachers present content, the ways that students learn content, and various ways that students can demonstrate procedural and conceptual understanding. The worked examples and homework questions provide prospective elementary school teachers with opportunities to develop mathematical knowledge, understanding, and skills that they can apply in their own classrooms effectively. The learning path begins with the Where Are We Going? Chapter Openers, worked Examples with Yellow Markers that indicate the Process Standards throughout the text, to the Concept Maps, to the Section Question Sets with their refreshers of Process Standards, to the Chapter Organizers with Learning Outcomes and a list of the corresponding Review Questions, and finally, conclude at the Chapter Tests with their overarching Learning Outcomes. individuals, local communities, and society. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

THE CHANGING EARTH: EXPLORING GEOLOGY AND EVOLUTION

Cengage Learning *THE CHANGING EARTH: EXPLORING GEOLOGY AND EVOLUTION, Seventh Edition, is a member of a rare breed of texts written specifically for courses covering both physical and historical geology. Three interrelated themes (plate tectonics, organic evolution, and geologic time) help students understand that Earth is a complex, integrated, and continually changing system. In the new edition authors James S. Monroe and Reed Wicander integrate new content emphasizing the economic impacts of geology. Topics such as fracking, nuclear waste, and the threat of earthquakes are covered in new Geo-Impact boxes that stress real-world applications. Lauded for their clear writing style, the authors go beyond simply explaining geology and its processes; rather, they place that knowledge within the context of human experience by consistently emphasizing relevance, resources, and the environment. New Global Geoscience Watch activities help students learn how to use an extensive database of articles on geology that are updated several times a day and are available exclusively for users of this book. THE COMFORT OF THINGS

John Wiley & Sons *What do we know about ordinary people in our towns and cities, about what really matters to them and how they organize their lives today? This book visits an ordinary street and looks into thirty households. It reveals the aspirations and frustrations, the tragedies and accomplishments that are played out behind the doors. It focuses on the things that matter to these people, which quite often turn out to be material things - their house, the dog, their music, the Christmas decorations. These are the means by which they express who they have become, and relationships to objects turn out to be central to their relationships with other people - children, lovers, brothers and friends. If this is a typical street in a modern city like London, then what kind of society is this? It's not a community, nor a neighbourhood, nor is it a collection of isolated individuals. It isn't dominated by the family. We assume that social life is corrupted by materialism, made superficial and individualistic by a surfeit of consumer goods, but this is misleading. If the street isn't any of these things, then what is it? This brilliant and revealing portrayal of a street in modern London, written by one of the most prominent anthropologists, shows how much is to be gained when we stop lamenting what we think we used to be and focus instead on what we are now becoming. It reveals the forms by which ordinary people make sense of their lives, and the ways in which objects become our companions in the daily struggle to make life meaningful.*
