Hygiene and Related Behaviors for Children and Adolescents with Autism Spectrum and Related Disorders

A Fun Curriculum with a Focus on Social Understanding

AAPC Publishing This innovative curriculum teaches important hygiene skills and associated social understanding using a fun approach that targets the core characteristics and learning styles of children and adolescents on the autism spectrum. The author's generous use of structure, predictability, self-monitoring, and ways to convey and check for social understanding is worked into all discussion and activities. Ranging from basic daily hygiene to picking, using public restrooms, burping, and farting, topics focus on healthy and socially acceptable behaviors. The book is the answer to the constant search for inventive and intriguing ways to teach often quite boring topics surrounding functional life skills. Lesson plans are well conceptualized and organized, showing that the author knows what makes children and adolescents with Asperger Syndrome and related disorders tic.

Autumn Homeschooling - Library Based Curriculum Journal

This 60 Day Homeschooling Workbook Covers Eight Different Subjects, with a Focus on Creativity and Imagination

Homeschooling with Library Books - NEW! 60 Day Homeschooling Journal for Eclectic Learners - Autumn Forest Theme Geared toward ages 9 to 14 - Students must be able to read on a 2nd grade level to get the most out of this method. This Homeschooling Curriculum Journal is for students who love to learn using a variety of methods, and for moms who want their kids to be more independent with their schoolwork. This workbook includes 60 days worth of lessons and activities, with 6 pages for each day, providing about two hours of guided learning time. Now you can learn everything you need to know with library books, movies and YouTube tutorials! Learn from nature. Be creative. Use your own imagination while studying up to 8 Subjects! This homeschooling journal will guide you through your stack of educational books and movies! This book includes many activity pages: Spelling Practice, Math Practice Pages, Reading Time, Film Study, Meal Planning, Copywork, Listening Time, Observation Time, Emotion and Mood Evaluation, Nature Study, List Making, Therapeutic Coloring, and several other fun and educational activities. Choose library books about anything you want to study including books about science, travel/geography, literature, cultures, skill building, math, inventions, history, and any other topic that is interesting or necessary. Parents! Now your student can turn any stack of books into a homeschooling curriculum. This handbook is an activity book and daily journal that allows your student to have a customized education without creating a lot of extra work for you. Many students are more interested in real books than in textbooks! This is an excellent way to help your students to develop their talents, interests and deepen their knowledge of topics that are meaningful to them. Just visit the library and bring home 8 great books! This homeschooling handbook was created by Sarah Janisse Brown, a dyslexia therapist and game designer with ten children. Sarah has over 25 years of homeschooling experience. This curriculum handbook is wonderful for unschoolers, eclectic learners, delight directed homeschoolers and busy families. If you have babies and toddlers who need a lot of attention the older children can use this journal for everything, except math. This workbook is appropriate for dyslexic students, it includes Art & Logic Games to help with dyslexia, and uses the Open Dyslexic Font for easy reading. This book can be used as a handbook for: Delight Directed Learning, Documenting Your Unschooling Journey, Charlotte Mason Inspired Homeschooling, Eclectic Homeschooling, Classical Homeschooling and Fun-Schooling. This book's interior is different from all our other journals, most of our journals are based on a 6 week plan - this one is a 12 week plan.

Fun Curriculum Activities (K-6) for Teachers and Media Specialists

Fast, Easy & Cheap!

Scarecrow Press Every year, due to curriculum upgrades and the focus on new standards-based learning teachers are expected to do more in the classroom. However, searching through catalogs that offer spectacular resources at high prices is often frustrating. Finally, there is a book that offers a few fast, easy, and inexpensive ideas for teachers to help them keep pace with current classroom trends. Fun Curriculum Activities is packed with activities for young children that will enliven every classroom and create a fun and stimulating learning environment for students. Designed to enhance lessons for K-6, the projects found in this resource will encourage critical thinking, collaboration, problem solving, and experimental learning. The simple and logical arrangement of these innovative resources provides quick access for even the busiest teacher or media specialist. The format provides a foolproof listing of the materials so that every basic necessity is included. Every teacher and media-specialist will want a copy of this book--its easy-to-access, fun-filled projects for under \$10 just can't be beat.

EBOOK: Talk for Writing across the Curriculum: How to teach non-fiction writing to 5-12 year-olds

McGraw-Hill Education (UK) Please note this e-book does not contain any video material from the Talk for Writing DVDs. This bestselling resource has been fully updated, putting formative assessment at the heart of the Talk for Writing process and showing how to help children love writing across the curriculum. By helping children speak the language of non-fiction in a fun engaging way before they attempt to write, the Talk for Writing approach builds children's confidence and linguistic ability enabling them to craft their own writing. In the new edition, this practical resource offers:

- Fully worked, tried and tested examples of how to apply Talk for Writing to each non-fiction text type
- A wide range of fun activities helping children internalise how to express and link text effectively
- A process that co-constructs learning so that children learn how to structure text and create toolkits of key ingredients
- Guidance for teachers in England on how to apply the approach across the primary curriculum
- Evidence of impact from cold to hot tasks

Designed for busy teachers, Talk for Writing across the Curriculum, second edition, will help transform children's writing and attainment across the curriculum. "This book celebrates the importance of talk in becoming and growing as a writer: talk to share ideas; talk to analyse text; talk to co-construct writing; and to talk to evaluate writing. Throughout the book constantly underlines the importance of talk for learning and the many creative and rich ways talk can be used to help young writers internalise the rhythms and patterns of text. Full of practical ideas and activities, the teaching combines being creative and being critical in a wholly integrated way. An invaluable resource for primary school teachers!" Debra Myhill, Professor of Education at the University of Exeter, UK "The teaching of reading has always taken priority in policy and practice in literacy. Pie Corbett and Julia Strong have produced a very welcome counterweight to that dominance in their Talk for Writing Across the Curriculum. It is so refreshing to see suggestions for teaching to bring elements of language together, especially when done in such an entertaining and engaging way as this. This new edition makes a 'classic' even better." David Wray, Emeritus Professor, University of Warwick, UK "This latest update of Pie and Julia's best-selling book reflects changes in the curriculum, strengthening the T4W approach, using cold and hot tasks, showing new worked examples of how to apply T4W to each non-fiction type and placing formative assessment at the heart of the process. It is exciting to see how all the best ideas and findings in education are converging, evidenced in this latest 'up to the minute' excellent publication." Shirley Clarke, Formative Assessment Expert

Nursing of Autism Spectrum Disorder

Evidence-Based Integrated Care Across the Lifespan

Springer Publishing Company Print+CourseSmart

Curriculum Focus The Tudors History KS2

Andrews UK Limited Part of a popular series that will inspire the teachers, especially the non-specialists, to teach history and geography with confidence. * comprehensive background information * extensive photocopiable resources such as pictures, charts and diagrams * detailed lesson plans * differentiated activities at three ability levels * ideas for support and extension * suggestions for incorporating ICT. The Tudors chapters include: * The Tudor family * Henry VIII * The six wives of Henry VIII * Why did Henry marry six times? * Rich people in Tudor times * Poor people in Tudor times * Compare and contrast Tudor life with life today * Exploration in the Tudor period * Drake's voyage around the world * English settlements in America

EBOOK: Essential Primary History

McGraw-Hill Education (UK) This book is an essential handbook on teaching primary history, combining subject knowledge with practical teaching ideas to ensure your teaching of history is both imaginative and creative. Emphasizing the importance of history and its wider skillset, the book explores the concepts and skills that are the fundamental building blocks of history teaching such as:

- Chronological understanding
- Concepts and skills
- Interpretation and evidence

Each chapter offers a structured approach and provides a range of activities that both address specific elements of the history curriculum and help develop this wider skillset. It includes practical ideas for lessons through an essential toolkit of ideas, teaching strategies and activities, with each activity designed to focus on a key skill or attribute associated with teaching primary history. The practical insights accompanied by a grounded rationale for each aspect of history will help you learn the best methods for approaching the teaching of history in the primary school, as well as plan and deliver effective history lessons. This book is ideal if you are training to teach as it will help you with your assignments and your teaching placements. It is also recommended if you are a more experienced practitioner or history coordinator and want to provide the very best experiences in primary history to children in your school. "An essential and inspirational guidebook for the successful teaching of history within the primary classroom! If you are in any way involved with the teaching of history, you owe it to yourself to read this book. A 'must have' for all history coordinators and teachers within the primary sector, from trainees to the experienced, who wish to raise the profile of history within their school. Closely tied to the new primary curriculum, it is enriched with excellent ideas to make history in the classroom a fun and memorable experience." Julia Wilson, Primary Teacher, Hensingham Primary School, UK "This book is easy to read and will enable all teachers (whatever their stage of career development) to become even better at teaching History. The chapter about the history of the curriculum is particularly interesting because it helps us all to understand what has influenced curriculums and pedagogies over time, whereas the Planning, Assessment and Toolkit chapters are useful on a more practical level. What is particularly ideal for trainee teachers is the Theory into Practice chapter that blends the pedagogy of History with learning theory. I will certainly be recommending this text to all my student teachers." Maggie Webster, Senior Lecturer and RE Subject Coordinator, Edge Hill University, UK "Chris Russell has provided a gem of a guide with lots of practical advice for the student and practising teacher of history in the primary classroom, as well as a good book to read in its own right." Marian Hodgson, Head Teacher, St Philips CE Primary School, Litherland, UK

Fun-Schooling Curriculum - Homeschooling with Minecraft

The Beginners Journal Animal and Farm Theme

Createspace Independent Publishing Platform Fun-schooling Curriculum - Homeschooling with Minecraft: The Beginners Journal Animal and Farm Theme B1 & B2 ideal for ages 7-10 (1st-3rd grade) This Minecraft based curriculum is perfect for creative children, and for new homeschoolers. Cover all basic Elementary subjects while having fun with farming, building, design and animals in the Minecraft world. Our delight directed approach works great for all students, especially those resistant to anything "school"-related. Uses the Dyslexie Font to make reading easy for children with reading confusion. Perfect for students with Dyslexia, Asperger's Syndrome, ADHD and other learning challenges. Mrs Europaea's family loves this book: "Fun-schooling with Thinking Tree Books has saved my family endless bouts of tantrums from my child who was always too anxious to focus in a traditional school setting and would act out. With this newest book, Homeschooling with Minecraft, the Browns have once again created a multipurpose curriculum that could be used simultaneously with various ages. It is such a blessing and stress reliever to be able to teach both my 9 year old nephew and my own children ages 5 and 3 out of the same text, only having to supplement with reference resources that are age appropriate. This book offers journal prompts, varying levels of math, drawing ideas, coloring pages, geography and much more. It doesn't matter which method you are using, Mason, Waldorf, Classical or even if you are Unschooling, Thinking Tree Books are appropriate to meet any educational goal." M. Ward loves how this journal compares Minecraft to real life: "This journal incorporates everything my son loves: animals, lego, nature, books, and of course Minecraft. And the best part about it all is that he loves working in these journals, and it's fun for him and not drudgery like so many school workbooks. It allows him to express his

creativity even while working on subjects like math, so much so that it doesn't even feel like "school". I especially love the pages in this journal where he is to compare real life animals or farming to that which he sees on Minecraft. I see this meshing well with real hands on gardening (which we were already planning to do this spring). He's still working on his reading fluency, so I'm happy to have something with which he can further his education on other topics without being hampered by his stage of literacy." (February 13, 2017) Language: English ISBN-10: 1543083978 ISBN-13: 978-1543083972 Subjects and Topics Covered in the Curriculum: Reading Handwriting Logic Spelling Classical Literature Classical Music Mathematics Addition, Subtraction and Multiplication Practice Animals and Habitats Geography Computer Skills Building Art, Drawing and Design Creative Comics Research & Library Skills Unit Studies (based on the student's favorite topics) Poetry Brain Games from Dyslexia Games Series A & B For New and Struggling Readers: This book is perfect for new and struggling readers, it uses the Dyslexie Font and includes art, reading and logic games that can help children with Dyslexia to overcome reading confusion. This is not just for children with ADHD and Dyslexia, the curriculum can be used by any child who is creative and enjoys playing Minecraft. Let Them Play

An Early Learning (Un)Curriculum

Redleaf Press Playtime is focused, purposeful, and full of learning. As they play, children master motor development, learn language and social skills, think creatively, and make cognitive leaps. This (un)curriculum is all about fostering children's play, trusting children as capable and engaged learners, and leaving behind boxed curriculums and prescribed activities. Filled with information on the guiding principles that make up an (un)curriculum, learning experience ideas, and suggestions for building strong emotional and engaging physical environments, Let Them Play provides support to those who believe in the learning power of play. Jeff A. Johnson spent twenty-five years as a child care provider in center- and home-based programs. He now works full time as an author, keynote speaker, podcaster, toymaker, and early learning advocate. He is the author or coauthor of six other Redleaf Press books. Denita Dinger has been a child care provider for more than fifteen years and operates a family child care program. For the last five years, she has been a frequent keynote speaker at early childhood conferences, focusing on the topics of hands-on learning and learning through play.

Outdoor Activities Around Your School

Taking the Curriculum Outside

Learning Development AIDS This title is packed full of cross-curricular activities that take place outdoors, many using the school site all year and proving to teachers that it is possible to extend their classrooms on a daily basis. The activities are fun and engaging, while also providing a focus on valuable aspects of teaching and learning.

David Wray, Emeritus Professor, University of Warwick, UK "This latest update of Pie and Julia's best-selling book reflects changes in the curriculum, strengthening the T4W approach, using cold and hot tasks, showing new worked examples of how to apply T4W to each non-fiction type and placing formative assessment at the heart of the process. It is exciting to see how all the best ideas and findings in education are converging, evidenced in this latest 'up to the minute' excellent publication." Shirley Clarke, Formative Assessment Expert

Teaching English effectively: with special focus on learners' interests

Anchor Academic Publishing There are several ways of enhancing students' motivation in the EFL classroom but an important one is to create the lesson on the basis of the learners' interests. Everyone who looks back on former school days, might remember that learning was more enjoyable when the topics were interesting and furthermore, when they were handled in an exiting way. The intention of this study is to present several ideas of improving the general motivation in the classroom. In addition to that, the current interests of students from German secondary schools and the consideration of the interests in the common English classroom will be presented with the help of a questionnaire. Part one gives

an overview of the terms interest and motivation in its psychological context and in relation to their meaning in the English classroom. The second part mentions the importance of incorporating students' interest in the learning classroom. Further, the third part deals with several possibilities of creating motivational conditions in the L2 classroom. Part four presents the results and the evaluation of a research which was conducted on the basis of the theoretical aspects. Part five deals with the content of the Lower Saxony Core Curriculum and the way it considers the students' interests. Finally, the author sums up the results of the research and draws a conclusion.

Summer Learning - Handbook for Creative Kids

Mathematics and Science Across the Curriculum

Convergent Learning Experiences Prepare Students for the Real World-- a World that is Not Divided Into Scientific Disciplines

Teaching Geography Creatively

Routledge Teaching Geography Creatively was Winner of the Geographical Association Gold Award 2014 and Winner of the Geographical Association Silver Award 2017. This fully updated second edition of Teaching Geography Creatively is a stimulating source of guidance for busy trainee and experienced teachers. Packed full of practical approaches for bringing the teaching of geography to life, it offers a range of innovative ideas for exploring physical geography, human geography and environmental issues. Underpinned by the very latest research and theory, expert authors from schools and universities explore the inter-relationship between creativity and learning, and consider how creativity can enhance pupils' motivation, self-image and well-being. Two brand new chapters focus on creative approaches to learning about the physical world, as well as the value of alternative learning settings. Further imaginative ideas include: games and starter activities as entry points for creative learning how to keep geography messy the outdoors and learning beyond the classroom how to teach geography using your local area the links between geography and other areas of the curriculum looking at geography, creativity and the future fun and games in geography engaging with the world through picture-books teaching about sustainability. With contemporary, cutting-edge practice at the forefront, Teaching Geography Creatively is an essential read for all trainee and practicing teachers, offering a variety of practical strategies to create a fun and stimulating learning environment. In the process it offers a pedagogy that respects the integrity of children as joyful and imaginative learners and which offers a vision of how geography can contribute to constructing a better and more equitable world.

Teaching Einsteinian Physics in Schools

An Essential Guide for Teachers in Training and Practice

Routledge In our world today, scientists and technologists speak one language of reality. Everyone else, whether they be prime ministers, lawyers, or primary school teachers speak an outdated Newtonian language of reality. While Newton saw time and space as rigid and absolute, Einstein showed that time is relative - it depends on height and velocity - and that space can stretch and distort. The modern Einsteinian perspective represents a significant paradigm shift compared with the Newtonian paradigm that underpins most of the school education today. Research has shown that young learners quickly access and accept Einsteinian concepts and the modern language of reality. Students enjoy learning about curved space, photons, gravitational waves, and time dilation; often, they ask for more! A consistent education within the Einsteinian paradigm requires rethinking of science education across the entire school curriculum, and this is now attracting attention around the world. This book brings together a coherent set of chapters written by leading experts in the field of Einsteinian physics education. The book begins by exploring the fundamental concepts of space, time, light, and gravity and how teachers can introduce these topics at an early age. A radical change in the curriculum requires new learning instruments and innovative instructional approaches. Throughout the book, the authors emphasise and discuss evidence-based approaches to Einsteinian concepts, including computer-based tools, geometrical methods, models and analogies, and simplified mathematical treatments. Teaching Einsteinian Physics in Schools is designed as a resource for teacher education students, primary and secondary science teachers, and for anyone interested in a scientifically accurate description of physical reality at a level appropriate for school education.

Technology Across the Curriculum

Activities and Ideas

Libraries Unlimited Motivate students and add excitement to learning with these 75 teacher-designed, classroom-tested, and ready-to-use activities. Focusing on curriculum application and integration, the authors provide simple instructions and reproducible activity sheets for video, audio, and multimedia production; computer projects; and photographic/transparency activities. These projects are designed to encourage and involve students in creative, cooperative, integrated, authentic, student-centered learning. For each activity there are objectives, an overview, a definition of skill areas covered, a materials checklist, adaptive ideas, procedure guidelines, and evaluation techniques. Whether your technology setup is basic or sophisticated, this book is for you. Grades 1-12.

Reclaiming the Curriculum

Specialist and creative teaching in primary schools

Crown House Publishing Ltd Bill Laar and Jackie Holderness' Reclaiming the Curriculum examines the nature of a broad-ranging, content-rich primary school curriculum and presents case studies that exemplify how it can be effectively delivered. Many schools believe that the value of their work is undermined by a test-driven agenda that limits the breadth of the education they provide and who can blame them? In Reclaiming the Curriculum Bill and Jackie inspire teachers to escape such narrow confines by unearthing a rich seam of case study examples from schools who are broadening their provision with specialist content that transcends the core curriculum: taking pupils into the realms of exploration and enquiry

while also providing for higher attainment in the core subjects. Featuring a variety of exciting initiatives, ranging from the development of an IT-enabled collaborative learning space to the artful application of storytelling across the curriculum, this book will embolden primary schools to identify and enhance their own creative practice and more effectively prepare pupils for the tests of life, not a life of tests. The 18 case studies written by a diverse line-up of contributors including school leaders, teachers and specialist coaches are sourced from a mixture of different settings and offer detailed descriptions of the initiatives' unique backgrounds: their genesis and inspiration, their underpinning aims and objectives, and the ways in which they were resourced, realised and, eventually, evaluated. At the beginning of each chapter, Bill and Jackie briefly summarise the educational value of each example of curriculum development, the significance of specific aspects and the ways in which they are likely to help maintain full and relevant learning. Each case study then presents the contributors' first-hand perspectives as they: describe in detail the structure that underpins the provision including the number of staff involved and the time and resources allocated; share interesting insights into the level of pupil involvement and, where relevant, the extent of parental and community participation; paint a vivid picture of how the initiatives have been made compatible with their school's wider educational programme; and provide practical guidance, useful links and relevant resources to aid readers' own pursuit of curriculum development. Suitable for primary school teachers and leaders.

Struggling To Be Heard

The Unmet Needs of Asian Pacific American Children

State University of New York Press The social, psychological, and educational needs of Asian Pacific American youth often go unmet. This book, written by multicultural educators, social workers, psychologists, and others, challenges stereotypical beliefs and seeks to provide, basic knowledge and direction for working with this population, often labeled as "the model minority."

Good Day, Bad Day

Teaching as a High-Wire Act

R&L Education Author Kenneth Winograd contends that it is imperative to understand the inevitable complexities of classroom life and to use these understandings to construct a teacher identity that is more flexible and grounded. This book will stimulate readers to reconsider their understandings of what it means to be a teacher.

Connecting Comics to Curriculum: Strategies for Grades 6–12

Strategies for Grades 6–12

ABC-CLIO Here is the essential guide for librarians and teachers who want to develop a quality, curriculum-based graphic novel collection—and use its power to engage and inform middle and high school students. • Photos of school libraries, classrooms, and students • Model template lesson plans by subject area • A list of recommended resources, such as professional books, websites and blogs • A glossary of common graphic novel terms • Bibliographies of quality classic and contemporary graphic novel titles for libraries and classrooms, broken down into middle school and high school curricular areas

Talk Box

Activities for Teaching Oracy with Children aged 4–8

Routledge Talk Box supports teachers implementing the new curriculum, who are looking for fresh ideas with a focus on teaching talk skills, encouraging discussion and developing articulate children. It sets out different types of teaching involving children learning collaboratively through discussion with peers and centres on step-by-step lesson plans to develop hidden potential across the entire classroom. At the heart of the lesson plans is the 'talk box' - a collection of interesting objects which provide a focus for class discussion and where the activities are based on these linked ideas: • Young children need their teachers to help them make sense of the world; • The most effective medium for explaining, discussing, describing with children, is talk; • Children learn very well from one another when taught how to do so, and are a good resource for one another in the classroom; • Children may be able to talk, but they are not often aware what sort of talk can help them to get the best from their education; • Direct teaching of essential talk skills and understanding is straightforward and should be undertaken in school classrooms. The numerous lesson plans included in this book are each built around specific learning objectives for speaking and listening and cover subjects such as literacy, numeracy, science, citizenship, ICT and Computing. Each lesson includes a resources list and photocopiable worksheets and range from whole class to small group work. This book will help you teach children to engage in the educationally effective kind of discussion known as Exploratory Talk, where everyone's viewpoint is considered, opinions are justified with reasons, and decisions are made together. This new edition includes updated curriculum links, new

research findings, a home-school link section and contain additional EAL and SEN materials.

ENC Focus

Building Teachers: A Constructivist Approach to Introducing Education

Cengage Learning Designed from the ground up with a constructivist framework, **BUILDING TEACHERS: A CONSTRUCTIVIST APPROACH TO INTRODUCING EDUCATION**, 2nd Edition helps future teachers create their own understanding of education. As the authors address the key topics generally covered in an introductory book, they encourage readers to develop their own understandings by connecting their prior knowledge, experiences, and biases with new experiences to which they will be exposed during the course. Highlights of the new edition include stronger standards integration and expanded material on diversity and technology. By interacting with the materials presented, rather than merely memorizing the book's content, readers learn what teaching is all about in an exploratory, inquiring, constructivist-based manner. In turn, they can help the children in their classrooms learn meaningfully. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Resources in Education

Pupils' experiences and perspectives of the National Curriculum and assessment final report for the research review

Educating Outside

Curriculum-linked outdoor learning ideas for primary teachers

Bloomsbury Publishing Although the benefits of learning outside are well documented, outdoor activities often decline as children progress through their education. There are many reasons for this: lack of time in the curriculum, lack of training, lack of teacher confidence, or simply lack of inspiration. **Educating Outside** contains a bank of outdoor learning ideas that can be used to enhance and enrich your classes' learning experiences across the curriculum; including in science, history, geography, art and design, English and maths. Each lesson idea is linked to a specific programme of study and outlines required resources, links to soft skills, cross-curricular opportunities, and a broad lesson plan with suggested outcomes and photos. All the ideas take place within the school grounds themselves, which means plenty of opportunities to try out new activities without lengthy risk assessments, extra time and additional expense.

Quigley McCormick Math Curriculum Guide

And the Curse of the Polka Dotted Pig. Focusing On: Elementary Measurement and Geometry

Quackenworth Pub The Quigley McCormick Curriculum Guide is a companion teachers guide for the book, Quigley McCormick and the Curse of the Polka Dotted Pig. The Guide covers areas in elementary measurement and geometry and is based on mathematical standards set forth by the California Department of Education. Included are 14 lessons, along with detailed lesson plans, teachers aids, student activity sheets, a final assessment in the form of a standardized test, and finally, fun sheets. The areas of focus include polygons, perimeter, area, coordinate Systems, parallel/perpendicular, radius/diameter, congruent figures, symmetry, angles, geometric solids, triangles, and quadrilaterals.
