SOCIAL KNOWLEDGE: USING SOCIAL MEDIA TO KNOW WHAT YOU KNOW

USING SOCIAL MEDIA TO KNOW WHAT YOU KNOW

IGI Global "This book provides relevant theoretical frameworks, latest empirical research findings, and practitioners' best practices social knowledge, for improving understanding of the strategic role of social knowledge in business, government, or non-profit sectors"--Provided by publisher.

THE DIMENSIONS OF EXPERIENCE

A NATURAL HISTORY OF CONSCIOUSNESS

Xlibris Corporation This book is an evolutionary history of life on earth. Its focus is not the evolution of the structural/functional adaptations found in any biology textbook, though these are necessarily discussed in a general way. Its primarily concerned with consciousness, with what the organism experiences. Just how far back into evolutionary history consciousness extends, of course, is a highly controversial issue, and one which we will probably never resolve with certainty. We know we are conscious, and most people would probably extend consciousness to other mammals, but when it comes to lower vertebrates, let alone invertebrates, there is no consensus. This book takes a what if approach. What if all forms of existence were conscious to some extent, a view known as panpsychism or panexperientialism? Based on those aspects of their function and behavior that we can actually observe and measure, what can we say about what this consciousness is like? The resulting story is one in which consciousness becomes increasingly more complex over evolutionary history, yet is based on facts of animal behavior that any reader, regardless of personal views on consciousness, can accept. In order to simply a vast amount of scientific literature, the book focuses on two general properties of consciousness and its behavioral manifestations: the experience of an outer world embedded in space and time; and that of an inner self that is defined by its relationship to other organisms. Two key claims made are that 1) dimensions of externally-perceived space and time have emerged more or less one at a time over the course of evolutionary history; and 2) the number of spatial/temporal dimensions experienced by any organism in the outer world is closely related to experienced inner dimensions in its relationships with other organisms. For example, the simplest invertebrate organisms experience one dimension of space, in the form of intensity discriminations made of simple stimuli such as light, touch and chemical substances. Closely correlated with this one-dimensional experience of the outer world is the ability to make simple self-other discriminations, in which the organism in effect distinguishes itself one-dimensionally from the outer world. Somewhat more evolved invertebrates, such as arthropods, experience two dimensions of space, their perception being largely limited to shapes, contrasts, and surfaces. They can also distinguish between two dimensions in their relationships with other organisms, as exhibited in the ability to discriminate such classes of other as male vs. female and kin vs. non-kin. The most highly evolved invertebrates, as well as all vertebrates, experience additional dimensions of space and/or time and make still finer discriminations among other organisms. The evolutionary story is not confined to organisms, however. The book argues that the same kind of dimensional relationships exist on lower levels of existence. Thus there are atoms that recognize and interact with other atoms in various degrees of dimensions, and there are cells that recognize and interact with other cells in different numbers of dimensions. Again, the minimal claim being made is that the function and behavior of these lifeforms can be understood in terms of dimensions, while leaving it up to individual readers to decide whether this could reflect a similar dimensionality of consciousness. Review by Kirkus Discoveries A lucid, thought-provoking and wide-ranging metaphysical treatise by novelist, scientific

researcher and Stanford Ph.D. Smith. Heralded as the first complete history of consciousness ever written, The Dimensions of Experience covers an astonishing

THE SCIENTIFIC AMERICAN BRAVE NEW BRAIN

HOW NEUROSCIENCE, BRAIN-MACHINE INTERFACES, NEUROIMAGING, PSYCHOPHARMACOLOGY, EPIGENETICS, THE INTERNET, AND OUR OWN MINDS ARE STIMULATING AND ENHANCING THE FUTURE OF MENTAL POWER

John Wiley & Sons This fascinating and highly accessible book presents fantastic but totally feasible projections of what your brain may be capable of in the near future. It shows how scientific breakthroughs and amazing research are turning science fiction into science fact. In this brave new book, you'll explore: How partnerships between biological sciences and technology are helping the deaf hear, the blind see, and the paralyzed communicate. How our brains can repair and improve themselves, erase traumatic memories How we can stay mentally alert longer—and how we may be able to halt or even reverse Alzheimers How we can control technology with brain waves, including prosthetic devices, machinery, computers—and even spaceships or clones. Insights into how science may cure fatal diseases, and improve our intellectual and physical productivity Judith Horstman presents a highly informative and entertaining look at the future of your brain, based on articles from Scientific American and Scientific American Mind magazines, and the work of today's visionary neuroscientists.

HANDBOOK OF RESEARCH ON GLOBAL MEDIA'S PRETERNATURAL INFLUENCE ON GLOBAL TECHNOLOGICAL SINGULARITY, CULTURE, AND GOVERNMENT

IGI Global Trends of the last few years, including global health crises, political division, and the ongoing threat to social-environmental survival, have been continually obscured by disinformation and misinformation and therefore created a need for stronger global technological media policy. It is no longer acceptable or moral to support a global communication network based only on market factors and propaganda. The Handbook of Research on Global Media's Preternatural Influence on Global Technological Singularity, Culture, and Government views preternatural healing of the media-sphere from a variety of perspectives on the dynamic of heart-coherent entertainment. Specifically, it addresses the subject of a healthy media from a variety of fractal perspectives. Covering topics such as collective unconscious, mediated reality, and government media trust, this major reference work is an essential resource for librarians, media specialists, media analysts, sociologists, government employees, communications specialists, psychologists, researchers, educators, academicians, and students.

THE BRAIN-TARGETED TEACHING MODEL FOR 21ST-CENTURY SCHOOLS

Corwin Press This proven model for applying brain research for more effective instruction shows how to implement educational and cognitive neuroscience principles to classroom settings through a pedagogical framework.

TOMORROW'S CATHOLIC

UNDERSTANDING GOD AND JESUS IN A NEW MILLENNIUM

Twenty-Third Publications Tomorrow's Catholic offers a fascinating outline of contemporary cosmology that connects the message of Jesus and the spirituality of Pentecost to the world we live in today. A special focus is on expressing ancient truths in contemporary language.

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

USING PSYCHOLOGICAL SCIENCE

MAKING THE PUBLIC CASE

NEW SCIENCE OF THE MIND

Chipmunkpublishing Ltd Description New Science of the Mind is an expression of personal emotions encountered on a journey navigated through fifteen years of living with mental illness. The book contains a selection of writings in the form of 'inner philosophy', fantasy and poems expressing concerns about a world affected by wars, climate change, famine, terrorism and suffering amongst the innocent. New Science of the Mind is Darragh Tobin's first book. About the Author Born in 1972, Darragh Tobin grew up in Cork and Co Wexford before moving to Kildare where he now lives and writes. He has been a mental health service user since the age of 15 years and enjoys films, music, travel, entertainment, arts and sciences. Darragh Tobin describes the process of writing as both difficult and liberating and now wishes to share the fruits of his innermost thoughts and labour with others.

THE FUTURE OF THE MIND

THE SCIENTIFIC QUEST TO UNDERSTAND, ENHANCE AND EMPOWER THE MIND

Penguin UK Recording memories, mind reading, videotaping our dreams, mind control, avatars, and telekinesis - no longer are these feats of the mind solely the province of overheated science fiction. As Michio Kaku reveals, not only are they possible, but with the latest advances in brain science and recent astonishing breakthroughs in technology, they already exist. In The Future of the Mind, the New York Times-bestselling author takes us on a stunning, provocative and exhilarating tour of the top laboratories around the world to meet the scientists who are already revolutionising the way we think about the brain - and ourselves.

MATTERS OF THE MIND

First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

DISCOVERING PSYCHOLOGY: THE SCIENCE OF MIND

Cengage Learning Psychology has insights relevant to all majors, all people. As a hub science, it also provides foundational material for many other scientific disciplines. Cacioppo/Freberg/Cacioppo's DISCOVERING PSYCHOLOGY: THE SCIENCE OF MIND, 4th edition, presents a cohesive understanding of the field, highlighting connections within psychology as well as between psychology and other disciplines. The fourth edition includes a new emphasis on social connectivity and loneliness, interpersonal relationships and myth busting, while author Dr. Stephanie Cacioppo brings additional insight as a licensed clinician. Smart and engaging writing, illuminating visuals and sound science illustrate the depth, breadth and diversity of this exciting field. Up-to-date coverage offers insight into the latest research, while hands-on activities help you sharpen your critical thinking skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

FREE ASSOCIATIONS

MEMORIES OF A PSYCHOANALYST

Transaction Publishers First published in 1958, "Free Associations "is the story of the early life of Ernest Jones. It was prepared for publication by his son Mervyn, who contributed an epilogue covering the period from 1918 (when this book ends) through Jones's death in 1944. This new edition includes a reflective introduction by Mervyn Jones, in which he writes about Ernest Jones "as I could not write in 1958." One of the pioneers in psychoanalysis, Ernest Jones was active in advancing the status as well as the development of the field. In the wider forum of public opinion, he made himself an advocate of the new science-the Huxley, he liked to say, to Freud's Darwin. Huxley had ranked below Darwin in creative originality, and had filled the role of the faithful and indispensably useful follower; and Mervyn Jones believes both Freud and Jones were pleased by the comparison. In addition to his important public and organizational roles (as president of the British and International Psychoanalytic Associations), Jones made significant contributions to psychoanalytic theory. When the Nazis invaded Vienna, he saved much of the assets and archives of psychoanalysis, at great personal risk, and made the arrangements for Freud to come to London. In his introduction, Mervyn Jones presents a sometimes surprising portrait of a thoroughly conventional man in what was then an unconventional profession. He describes tensions and conflicts among the early Freudians, and situates Freudianism with other theories that laid claim to scientific truth in the late nineteenth century. "Free Associations "presents an evocative picture of Wales and London at the turn of the century, and describes the developing profession of psychoanalysis. It is a dramatic story of success and failure, and of a young man and how he responded to the new, strange ideas of Freud. This book fills in our understanding of the history of psychoanalysis and its founders.

LIVING THE SCIENCE OF MIND

THE ONLY WRITINGS BY THE FOUNDER OF SCIENCE OF MIND TO HELP YOU UNDERSTAND HIS CLASSIC

TEXTBOOK

DeVorss & Company This is Holmes' own "commentary" on his masterpiece, The Science of Mind. As such, it may be his most important book besides the textbook. These short pieces abound in counsel and guidance in metaphysics, spirituality, and healing. Here too is the history of New Thought and Religious Science; insights into the mystics; pointers on treatment; and analysis of our fears and insecurities. Founder of the worldwide Religious Science movement, formulator of the Science of Mind philosophy, and author of metaphysical bestsellers, Dr. Holmes continually sought to simplify his teaching and get people to "use" it. In these pages he speaks directly to you in a one-on-one tutorial.

THE DISSOLUTION OF MIND

A FABLE OF HOW EXPERIENCE GIVES RISE TO COGNITION

Rodopi This book presents an original thesis about the notion of sensory experience and of the mind's architecture, which is grounded in current trends in cognitive science and philosophy of mind. Presented in the form of a dialogue, the book explores some of the psychological and philosophical consequences that the author derives from his proposal. "Provocative and imaginative, the first volume in the VIBS' Special Series in Cognitive Science is a critique of the traditional theoretical apparatus of the discipline. In The Dissolution of Mind, neuroscientist Oscar Vilarroya undertakes the ambitious project of reformulating the traditional notions of "concept," "thought," "communication," "representation," "language" and eventually "mind." Metapsychology, May 2003

ADVANCED COURSE IN YOGI PHILOSOPHY AND ORIENTAL OCCULTISM

Jazzybee Verlag This book consists of Twelve Lessons, originally issued in monthly parts, treating upon the more advanced branches of the Yogi Philosophy and Oriental Occultism. It is practically a sequel to our book "Fourteen Lessons in Yogi Philosophy and Oriental Occultism," and continues the teachings of the "Fourteen Lessons," and leads the students to higher planes of thought, as well as showing him the deeper phases of occult truth. This book is intended only for those who feel an earnest attraction toward the higher teachings. It is only for earnest students, inspired by the highest motives. Those for whom these teachings are intended will feel attracted to them. If you feel attracted toward this work, we will be glad to have you study it, if not, we will feel just as kindly toward you, and will send you our best wishes for the hastening of the day when you will be ready for the advanced teachings. The matter is one entirely for the guidance of your Higher Self—let it decide for you.

THINK OF AN ELEPHANT: COMBINING SCIENCE AND SPIRITUALITY FOR A BETTER LIFE

Duncan Baird Publishers Too often, it seems that science and spirituality are irreconcilable but Paul Bailey shows that hard fact and direct spiritual experience can come together harmoniously, and only when they do will the true nature of the universe be revealed to us. What he has to say will inspire mind-shifts and alter our perception of the universe. Bailey's revolutionary approach emerged from a whimsically phrased, but ultimately serious question that scientists tried to answer: If an elephant were sucked into a black hole,

where would its matter go? Astonishingly, they realized that the elephant's fate altered depending on each person's particular viewing position. And that's what Bailey allows us to do: see reality and our lives from a different perspective. By linking the apparently unrelated fields of quantum physics, holistic health, cosmology, theology, neuroscience, evolutionary theory, and consciousness studies, Bailey proves that each is a facet of a greater, unified reality, and that science and spirituality are two sides of the same coin. With this knowledge, we will finally understand our place in the universe and gain new insights into some of the most challenging questions facing the world today.

UNDERSTANDING TOMORROW'S MIND

ADVANCES IN CHAOS THEORY, QUANTUM THEORY, AND CONSCIOUSNESS IN PSYCHOLOGY

NEUROSCIENCE IN SCIENCE FICTION FILMS

McFarland As the gap between science fiction and science fact has narrowed, films that were intended as pure fantasy at the time of their premier have taken on deeper meaning. This volume explores neuroscience in science fiction films, focusing on neuroscience and psychiatry as running themes in SF and finding correlations between turning points in "neuroscience fiction" and advances in the scientific field. The films covered include The Strange Case of Dr. Jekyll and Mr. Hyde, The Island of Dr. Moreau, Robocop, The Stepford Wives, The Mind Snatchers and iconic franchises like Terminator, Ironman and Planet of the Apes. Examining the parallel histories of psychiatry, neuroscience and cinema, this book shows how science fiction films offer insightful commentary on the scientific and philosophical developments of their times.
