Advanced Methods in Family Therapy Research

A Focus on Validity and Change

Routledge Research is vital in moving the field of family therapy forward, but the myriad of possibilities inherent in working with systems and individuals can overwhelm even the most seasoned researcher. Advanced Methods in Family Therapy Research is the best resource to address the day-to-day questions that researchers have as they investigate couples and families, and the best source for learning long-term theory and methodology. The contributors of this volume share their wisdom on a wide variety of topics including validity concerns, measuring interpersonal process and relational change, dyadic data analysis (demonstrated through a sample research study), mixed methods studies, and recruitment and retention. The volume contains one of the most detailed descriptions of data collections and covers interviewing, using questionnaires, and observing brain activity. Also addressed are suggestions to meaningfully reduce cultural bias, to conduct ethical research, and, in the Health Services Research chapter, to examine interventions for clients in various income brackets. A separate, ground-breaking chapter also addresses psychophysiological research in a couple and family therapeutic context. As an added benefit, readers will learn how to become informed consumers of journal articles and studies, how to produce quality, publishable research, and how to write fundable grant proposals. Each chapter provides a clear and detailed guide for students, researchers, and professionals, and as a whole Advanced Methods in Family Therapy Research advances the field by teaching readers how to provide evidence that marriage and family therapy not only relieves symptoms, but also effects behavioral change in all family members.

The Invention of ›Outsider Art‹

Experiencing Practices of Othering in Contemporary Art Worlds in the UK

transcript Verlag What does it mean to be called an ›Outsider?‹ Marion Scherr investigates structural inequalities and the myth of the Other in Western art history, examining the role of ›Outsider Art‹ in contemporary art worlds in the UK. By shifting the focus from art world professionals to those labelled ›Outsider Artists‹, she counteracts one-sided representations of them being otherworldly, raw, and uninfluenced. Instead, the artists are introduced as multi-faceted individuals in constant exchange with their social environment, employing diverse strategies in dealing with their exclusion. The book reframes their voices and artworks as complex, serious and meaningful cultural contributions, and challenges their attested Otherness in favour of a more inclusive, all-encompassing understanding of art.

Learning from the Field A Guide from Experience

SAGE "Other field researchers, who usually convey their craft only through one-on-one apprenticeships, should follow Whyte's lead and try to create their own vicarious apprenticeships through candid backstage accounts of their judgment calls in the field. . . . This book gives seasoned investigators an excuse to rethink what they take for granted and to see, step-by-step, how their practice compares with that of another seasoned person. Most people will welcome the chance to do this because of a final characteristic in this book, its even-handed tone." --Journal of Contemporary Ethnography "Useful for a better understanding of the character and promise of ethnographic research." --Journal of Communication "Goes beyond statements of principles to give a realistic picture of problems encountered by the field researcher." --Bulletin de Methodologie Sociologique A highly regarded field researcher tells how he has plied his craft for the past 50 years. William Foote Whyte, in collaboration with his wife, Kathleen, describes the successes--and failures--he has had in studying street corner society in Boston, oil companies in Oklahoma and Venezuela, restaurants in Chicago, worker cooperatives in Spain, factories in New York State, and villages in Peru. With the goal of taking readers into the field with him, Whyte discusses and dissects his chief tools--participant observation and the semistructured interview. He also explains how to evaluate and analyze field data, why the use of local history in social research is valuable, and the ethics of fieldwork. Whyte focuses on four general problems that have plagued his career as a researcher:

Africanity and Ubuntu as Decolonizing Discourse

Springer Nature This book explores and discusses emerging perspectives of Ubuntu from the vantage point of "ordinary" people and connects it to human rights and decolonizing discourses. It engages a decolonizing perspective in writing about Ubuntu as an indigenous concept. The foregrounding argument is that one's positionality speaks to particular interests that may continue to sustain oppressions instead of confronting and dismantling them. Therefore, a decolonial approach to writing indigenous experiences begins with transparency about the researcher's own positionality. The emerging perspectives of this volume are contextual, highlighting the need for a critical reading for emerging, transformative and alternative visions in human relations and social structures.

Churches That Make a Difference

Reaching Your Community with Good News and Good Works

Baker Books Churches over the past generations have been weakened by a failure to meet both the physical and spiritual needs of their communities. Many have adopted a narrow vision, focusing on only one aspect of ministry. But in today's environment of faith-based opportunities many Christians are eager to start reaching out to their world with both Good News and good works, and therefore they are searching for appropriate ways to integrate both into their ministry. In Churches That Make a Difference, best-selling author Ron Sider and his coauthors give those involved in community outreach a comprehensive resource for developing holistic ministry--a balance of evangelism and social outreach. Illustrations and helpful organizational tips detail the how-to's of an effective holistic ministry. Case studies that show how different churches across the United States reach out to their communities provide a variety of ideas and practical applications. User-friendly tools are included as well for congregational studies, surveys, evaluations, and community assessments. The authors draw on extensive experience with church ministries and faith-based organizations as they share the life-changing vision and biblical mandate for living the whole gospel. Church leaders will be encouraged in their process of developing and maintaining a holistic ministry, and local churches will rediscover a passion for loving the whole person the way Jesus did.

Routledge What comes after the reconceptualization of curriculum studies? What is the contribution of the next wave of curriculum scholars? Comprehensive and on the cutting edge, this Handbook speaks to these questions and extends the conversation on present and future directions in curriculum studies through the work of twenty-four newer scholars who explore, each in their own unique ways, the present moment in curriculum studies. To contextualize the work of this up-and-coming generation, each chapter is paired with a shorter response by a well-known scholar in the field, provoking an intra-/inter-generational exchange that illuminates both historical trajectories and upcoming moments. From theorizing at the crossroads of feminist thought and post-colonialism to new perspectives that include critical race, currere, queer southern studies, Black feminist cultural analysis, post-structural policy studies, spiritual ecology, and East-West international philosophies, present and future directions in the U.S. American field are revealed.
