## Development in Infancy

### A Contemporary Introduction

*Psychology Press This topically-organized text provides a comprehensive overview of infant development with a strong theoretical and research base. Readers gain a clear understanding of infant development and issues that will be the focus of significant advances in infancy studies in the future. The new fifth edition reflects the enormous changes in the field that have occurred over the past decade. The thoroughly revised chapters emphasize work from the 21st century, although classic references are retained, and explore contextual, methodological, neurological, physical, perceptual, cognitive, communicative, emotional, and social facets of infant*

development. The fifth edition features a more accessible style and enhanced pedagogical and teaching resource program. This extensively revised edition features a number of changes: • The fifth edition adds a new co-author, Martha Arterberry, who brings additional teaching and research skills to the existing author team. • An enhanced pedagogical program features orienting questions at the beginning of each chapter and boldfaced key terms listed at the end of the chapter and defined in the glossary to help facilitate understanding and learning. • Two new boxes in each chapter – Science in Translation illustrate applied issues and Set for Life highlight the significance of infancy for later development. • Increased emphasis on practical applications and social policy. • More graphs, tables, and photos that explain important concepts and findings. • Literature reviews are thoroughly updated and reflect contemporary research. • All new teaching web resources -- Instructors will find Power Points, electronic versions of the text figures, and a test bank, and students will find hyperlinked references and electronic versions of the key concepts and the definitions. Intended for beginning graduate or advanced undergraduate courses on infant (and toddler) development or infancy or early child development taught in departments of psychology, human development & family studies, education, nursing, social work, and anthropology, this book also appeals to social service providers, policy makers, and clergy who work with community institutions. Prerequisites include introductory courses on child development and general psychology.

## Shame and Pride: Affect, Sex, and the Birth of the Self

*W. W. Norton & Company* This is a revolutionary book about the nature of emotion, about the way emotions are triggered in our private moments, in our relations with others, and by our biology. Drawing on every theme of the modern life sciences, Donald Nathanson shows how nine basic affects—interest-excitement, enjoyment-joy, surprise-startle, fear-terror, distress-anguish, anger-rage, dissmell, disgust, and shame-humiliation—not only determine how we feel but shape our very sense of self. For too long those who explain emotional discomfort on the basis of lived experience and those who blame chemistry have been at loggerheads. As Dr. Nathanson shows, chemicals and illnesses can affect our mood just as surely as an uncomfortable memory or a stern rebuke. Linking for the first time the affect theory of the pioneering researcher Silvan S. Thomkins with the entire world of biology, medicine, psychology, psychotherapy, religion, and the social sciences, Dr. Nathanson presents a completely new understanding of all emotion.

## Elderhood

# Redefining Aging, Transforming Medicine, Reimagining Life

*Bloomsbury Publishing USA Finalist for the Pulitzer Prize in General Nonfiction A New York Times Bestseller Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction Winner of the WSU AOS Bonner Book Award As revelatory as Atul Gawande's Being Mortal, physician and award-winning author Louise Aronson's Elderhood is an essential, empathetic look at a vital but often disparaged stage of life. For more than 5,000 years, "old" has been defined as beginning between the ages of 60 and 70. That means most people alive today will spend more years in elderhood than in childhood, and many will be elders for 40 years or more. Yet at the very moment that humans are living longer than ever before, we've made old age into a disease, a condition to be dreaded, denigrated, neglected, and denied. Reminiscent of Oliver Sacks, noted Harvard-trained geriatrician Louise Aronson uses stories from her quarter century of caring for patients, and draws from history, science, literature, popular culture, and her own life to weave a vision of old age that's neither nightmare nor utopian fantasy--a vision full of joy, wonder, frustration, outrage, and hope about aging, medicine, and humanity itself. Elderhood is for anyone who is, in the author's own words, "an aging, i.e., still-breathing human being."*

## Antiquity's Greatest Philosophers

# Socrates, Plato, and Aristotle

*Createspace Independent Publishing Platform \*Analyzes the controversies and mysteries surrounding Socrates' life and death, including the debate over his portrayal in Plato's Socratic dialogues. \*Discusses the philosophers' writings about knowledge, logic, metaphysics, science, reason, Forms, political science, rhetoric and more. \*Includes busts and other art depicting the philosophers and other important people. \*Includes a Bibliography on each for further reading. In 427 B.C., the Ancient Greek city-state of Athens was flourishing. Approximately 80 years earlier, the Athenians had formed the first self-representative democracy in history, the Peloponnesian War against Sparta had only just started, and Socrates was only beginning to lay the foundation of what would become Western philosophy. None of Socrates' works survived antiquity, so most of what is known about him came from the writings of his followers, most notably Plato. What is known about Socrates is that he seemed to make a career out of philosophy, and Plato was intent on following in his footsteps. Yet for all of the influence of Socrates' life on his followers, it was Socrates' death around 399 B.C. that truly shaped them. Plato was so embittered by Socrates' trial in Athens that he completely soured on Athenian democracy, and Aristotle would later criticize politicians who relied on rhetoric; when Aristotle's own life was threatened, he fled Greece and allegedly remarked, "I will not allow the Athenians to sin twice against philosophy." About a decade after Socrates' death, Plato returned to Athens and founded his famous Platonic Academy around 387 B.C., which he oversaw for 40 years until his death. One of Plato's philosophical beliefs was that writing down teachings was less valuable than passing them down orally, and several of Plato's writings are responses to previous writings of his, so Plato's personally held beliefs are hard to discern. However, Plato educated several subsequent philosophers, chief among them Aristotle, and his writings eventually formed the backbone of Western philosophy. Alongside Socrates and Plato, Aristotle is, without question, one of the most influential ancient Greek philosophers and arguably the greatest icon of ancient thought. His life and work expanded rapidly and extensively across the ancient world, helped in part by the fact he tutored Alexander the Great, he was a recognized and celebrated intellectual force during all of antiquity and the Middle Ages. Furthermore, after Aristotle, Greek thought and political influence began a rapid decline, and the cultivation of knowledge, so important during the classic period, slowly but surely began to fade, making Aristotle the last of ancient Greece's great philosophers. Aristotle's influence on Western philosophical thought is marked by an extensive list of crucial issues that both signaled the way forward but at the same time boggled philosophers' minds throughout the centuries. Aristotle's reflections on Being, as well as his rigorous Logic, were his most important philosophical legacy, but he was also an intellectual in the broadest sense of the word. His interests went beyond metaphysical questions and into practical life and practical knowledge, from ethics to politics, rhetoric and the sciences, all of which left a profound impact on Western political thought and ethics. Naturally, this has also made him one of the*

*foundations of knowledge and philosophical thought that subsequent philosophers relied on when forming and refining their own philosophies. Antiquity's Greatest Philosophers chronicles the lives, works, and philosophies of all three philosophers in depth, while analyzing their enduring legacies. You will learn about Socrates, Plato and Aristotle like never before.*

## James Joyce and the Burden of Disease

*University Press of Kentucky James Joyce's near blindness, his peculiar gait, and his death from perforated ulcers are commonplace knowledge to most of his readers. But until now, most Joyce scholars have not recognized that these symptoms point to a diagnosis of syphilis. Kathleen Ferris traces Joyce's medical history as described in his correspondence, in the diaries of his brother Stanislaus, and in the memoirs of his acquaintances, to show that many of his symptoms match those of tabes dorsalis, a form of neurosyphilis which, untreated, eventually leads to paralysis. Combining literary analysis and medical detection, Ferris builds a convincing case that this dread disease is the subject of much of Joyce's autobiographical writing. Many of this characters, most notably Stephen Dedalus and Leopold Bloom, exhibit the same symptoms as their creator: stiffness of gait, digestive problems, hallucinations, and impaired vision. Ferris also demonstrates that the themes of sin, guilt, and retribution so prevalent in Joyce's works are almost certainly a consequence of his having contracted venereal disease as a young man while frequenting the brothels of Dublin and Paris. By tracing the images, puns, and metaphors in Ulysses and Finnegans Wake, and by demonstrating their relationship to Joyce's experiences, Ferris shows the extent to which, for Joyce, art did indeed mirror life.*

## What Technology Wants

*Penguin From the author of the New York Times bestseller The Inevitable— a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.*

## Sabbath Rest as Vocation

## Aging Toward Death

*Bloomsbury Publishing Autumn Alcott Ridenour offers a Christian theological discussion on the meaning of aging toward death with purpose, identity, and communal significance. Drawing from both explicit claims and constructive interpretations of St. Augustine's and Karl Barth's understanding of death and aging, this volume describes moral virtue as participation in Christ across generations, culminating in preparation for Sabbath rest during the aging stage of life. Addressing the inevitability of aging, the prospect of mortality, the importance of contemplative action and expanding upon the virtues of growing older, Ridenour analyzes how locating moral agency as union with Christ results in virtuous practices for aging individuals and their surrounding communities. By responding with constructive theology to challenges from transhumanist, bioethical and medical arenas, the volume highlights implications not only for virtue ethics, but also for the goals of medicine.*

## Maryam of Bethlehem

# The Little Arab

*Children of Medjugorje. Inc Maryam Baouardy is a daughter of Galilee, from a very poor family. At the age of three, she lost her father and mother and was adopted by her uncle. She never learned how to read or write, but her life became a remarkable succession of supernatural manifestations, worthy of Catherine of Siena or Teresa of Avila, from the stigmata to singular battles against Satan. From where does she draw the heavenly wisdom, childlike yet strong, that made her loved by all? Where does this burning love that consumes her come from? For her, just as for St. Paul, "to live is Christ". This beautiful "Lily of Palestine" became Sr. Maryam of Jesus Crucified in the Carmelite Order. Both humble guardian of the grille and formidable forewoman, she was often visited by Jesus and Mary. The words she transmits from them, pearls of great price, are significant for us today as they enlighten the future of our broken world. Maryam died in Bethlehem in her 33rd year, on August 26, 1878, shortly after the birth of Thérèse of Lisieux in France. Pope John Paul II beatified her on November 13, 1983. It is impossible to know Maryam without falling in love with her, without yearning for holiness, at her school.*

# Deconstructing Artificial Intelligence

*Post Egoism Media Cybernetic Revelation explores the dual philosophical histories of deconstruction and artificial intelligence, tracing the development of concepts like the "logos" and the notion of modeling the mind technologically from pre-history to contemporary thinkers like Slavoj Žižek, Steven Pinker, Bernard Stiegler and Daniel C. Dennett. The writing is clear and accessible throughout, yet the text probes deeply into major philosophers seen by JD Casten as "conceptual engineers." Philosophers covered include: Anaximander, Heraclitus, Parmenides, Plato, Aristotle, Philo, Augustine, Shakespeare, Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, Kant, Hegel, Nietzsche, Freud, Jung, Joyce, Dewey, Wittgenstein, Heidegger, Adorno, Benjamin, Derrida, Chomsky, Žižek, Pinker, Dennett, Hofstadter, Stiegler + more; with special chapters on: AI's history, Complexity, Deconstructing AI, Aesthetics, Consciousness + more...*

## The Oldest Vocation

## Christian Motherhood in the Medieval West

*Cornell University Press* According to an old story, a woman concealed her sex and ruled as pope for a few years in the ninth century. Pope Joan was not betrayed by a lover or discovered by an enemy; her downfall came when she went into labor during a papal procession through the streets of Rome. From the myth of Joan to the experiences of saints, nuns, and ordinary women, *The Oldest*

*Vocation brings to life both the richness and the troubling contradictions of Christian motherhood in medieval Europe. After tracing the roots of medieval ideologies of motherhood in early Christianity, Clarissa W. Atkinson reconstructs the physiological assumptions underlying medieval notions about women's bodies and reproduction; inherited from Greek science and popularized through the practice of midwifery, these assumptions helped shape common beliefs about what mothers were. She then describes the development of "spiritual motherhood" both as a concept emerging out of monastic ideologies in the early Middle Ages and as a reality in the lives of certain remarkable women. Atkinson explores the theological dimensions of medieval motherhood by discussing the cult of the Virgin Mary in twelfth-century art, story, and religious expression. She also offers a fascinating new perspective on the women saints of the later Middle Ages, many of whom were mothers; their lives and cults forged new relationships between maternity and holiness. The Oldest Vocation concludes where most histories of motherhood begin—in early modern Europe, when the family was institutionalized as a center of religious and social organization. Anyone interested in the status of motherhood, or in women's history, the cultural history of the Middle Ages, or the history of religion will want to read this book.*

## The End of Time

## The Next Revolution in Physics

*Oxford University Press Richard Feynman once quipped that "Time is what happens when nothing else does." But Julian Barbour disagrees: if nothing happened, if nothing changed, then time would stop. For time is nothing but change. It is change that we perceive occurring all around us, not time. Put simply, time does not exist. In this highly provocative volume, Barbour presents the basic evidence for a timeless universe, and shows why we still experience the world as intensely temporal. It is a book that strikes at the heart of modern physics. It casts doubt on Einstein's greatest contribution, the spacetime continuum, but also points to the solution of one of the great paradoxes of modern science, the chasm between classical and quantum physics. Indeed, Barbour argues that the holy grail of physicists--the unification of Einstein's general relativity with quantum mechanics--may well spell the end of time. Barbour writes with remarkable clarity as he ranges from the ancient philosophers Heraclitus and Parmenides, through the giants of science Galileo, Newton, and Einstein, to the work of the contemporary physicists John Wheeler, Roger Penrose, and Steven Hawking. Along the way he treats us to enticing glimpses of some of the mysteries of the universe, and presents intriguing ideas about multiple worlds, time travel, immortality, and, above all, the illusion of motion. The End of Time is a vibrantly written and revolutionary book. It turns our understanding of reality inside-out.*

# Character Strengths and Virtues

## A Handbook and Classification

*Oxford University Press "Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.*

## How the World Changed Social Media

*UCL Press* *How the World Changed Social Media* is the first book in *Why We Post*, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

## The Crisis of Global Capitalism

## Pope Benedict XVI's Social Encyclical and the Future of Political Economy

*Wipf and Stock Publishers This collection of essays outlines a new political economy. Twenty years after the demise of Soviet communism, the global recession into which free-market capitalism has plunged the world economy provides a unique opportunity to chart an alternative path. Both the left-wing adulation of centralized statism and the right-wing fetishization of market liberalism are part of a secular logic that is collapsing under the weight of its own inner contradictions. It is surely no coincidence that the crisis of global capitalism occurs at the same time as the crisis of secular modernity. Building on the tradition of Catholic social teaching since the groundbreaking encyclical *Rerum Novarum* (1891), Pope Benedict XVI's *Caritas in Veritate* is the most radical intervention in contemporary debates on the future of economics, politics, and society. Benedict outlines a Catholic "third way" that combines strict*

*limits on state and market power with a civil economy centered on mutualist businesses, cooperatives, credit unions, and other reciprocal arrangements. His call for a civil economy also represents a radical "middle" position between an exclusively religious and a strictly secular perspective. Thus, Benedict's vision for an alternative political economy resonates with people of all faiths and none.*

Along the way these essays explore a broad range of poetico-philosophical questions that have become characteristic of Cixous' work: \* love's labours lost and found \* feminine hours \* autobiographies of writing \* the prehistory of the work of art Stigmata goes beyond theory, becoming an extraordinary writer's testimony to our lives and times.*

## In the Realm of Hungry Ghosts

## Close Encounters with Addiction

*Knopf Canada In this timely and profoundly original new book, bestselling writer and physician Gabor Maté looks at the epidemic of addictions in our society, tells us why we are so prone to them and what is needed to liberate ourselves from their hold on our emotions and behaviours. For over seven years Gabor Maté has been the staff physician at the Portland Hotel, a residence and harm reduction facility in Vancouver's Downtown Eastside. His patients are challenged by life-threatening drug addictions, mental illness, Hepatitis C or HIV and, in many cases, all four. But if Dr. Maté's patients are at the far end of the spectrum, there are many others among us who are also struggling with addictions. Drugs, alcohol, tobacco, work, food, sex, gambling and excessive inappropriate spending: what is amiss with our lives that we seek such self-destructive ways to comfort ourselves? And why is it so difficult to stop these habits, even as they threaten our health, jeopardize our relationships and corrode our lives? Beginning with a dramatically close*

*view of his drug addicted patients, Dr. Maté looks at his own history of compulsive behaviour. He weaves the stories of real people who have struggled with addiction with the latest research on addiction and the brain. Providing a bold synthesis of clinical experience, insight and cutting edge scientific findings, Dr. Maté sheds light on this most puzzling of human frailties. He proposes a compassionate approach to helping drug addicts and, for the many behaviour addicts among us, to addressing the void addiction is meant to fill. I believe there is one addiction process, whether it manifests in the lethal substance dependencies of my Downtown Eastside patients, the frantic self-soothing of overeaters or shopaholics, the obsessions of gamblers, sexaholics and compulsive internet users, or in the socially acceptable and even admired behaviours of the workaholic. Drug addicts are often dismissed and discounted as unworthy of empathy and respect. In telling their stories my intent is to help their voices to be heard and to shed light on the origins and nature of their ill-fated struggle to overcome suffering through substance use. Both in their flaws and their virtues they share much in common with the society that ostracizes them. If they have chosen a path to nowhere, they still have much to teach the rest of us. In the dark mirror of their lives we can trace outlines of our own. —from In the Realm of Hungry Ghosts*
