2016 ARTICLE IV CONSULTATION AND THIRD REVIEW UNDER THE EXTENDED ARRANGEMENT, REQUESTS FOR A WAIVER OF NON-OBSERVANCE OF A PERFORMANCE CRITERION, WAIVER OF APPLICABILITY, REPHASING OF ACCESS AND FINANCING ASSURANCES REVIEW-PRESS RELEASE; STAFF REPORT; AND STATEMENT BY THE EXECUTIVE DIRECTOR FOR UKRAINE

International Monetary Fund This 2016 Article IV Consultation shows that following a severe crisis in 2014–15, the economy of Ukraine is growing again. The flexible exchange rate and tight fiscal and monetary policies have greatly reduced internal and external imbalances. The current account deficit fell sharply, from more than 9 percent of GDP in 2013 to 3.6 percent of GDP in 2016. The overall fiscal deficit declined to 2.3 percent of GDP in 2016. Growth will remain at 2 percent in 2017 due to the impact of the blockade in the eastern part of Ukraine, but is expected to reach 3 percent in 2018 as the economy adjusts and about 3.5–4.0 percent over the medium term.

LIQUIDITY AT RISK: JOINT STRESS TESTING OF SOLVENCY AND LIQUIDITY

International Monetary Fund The traditional approach to the stress testing of financial institutions focuses on capital adequacy and solvency. Liquidity stress tests have been applied in parallel to and independently from solvency stress tests, based on scenarios which may not be consistent with those used in solvency stress tests. We propose a structural framework for the joint stress testing of solvency and liquidity: our approach exploits the mechanisms underlying the solvency-liquidity nexus to derive relations between solvency shocks and liquidity shocks. These relations are then used to model liquidity and solvency risk in a coherent framework, involving external shocks to solvency and endogenous liquidity shocks arising from these solvency shocks. We define the concept of 'Liquidity at Risk', which quantifies the liquidity resources required for a financial institution facing a stress scenario. Finally, we show that the interaction of liquidity and solvency may lead to the amplification of equity losses due to funding costs which arise from liquidity needs. The approach described in this study provides in particular a clear methodology for quantifying the impact of economic shocks resulting from the ongoing COVID-19 crisis on the solvency and liquidity of financial institutions and may serve as a useful tool for calibrating policy responses.

PUBLICATION OF FINANCIAL SECTOR ASSESSMENT PROGRAM DOCUMENTATION: DETAILED ASSESSMENT OF OBSERVANCE OF THE FED WIRE SECURITIES SERVICE'S OBSERVANCE OF THE CPSS-IOSCO RECOMMENDATIONS FOR SECURITIES SETTLEMENT SYSTEMS

International Monetary Fund This paper discusses key findings of the Detailed Assessment of Observance of the Fedwire Securities Service's (FSS) Observance of the Committee on Payment and Settlement Systems/International Organization of Securities Commissions (CPSS-IOSCO) Recommendations for Securities Settlement Systems for the United States. The paper discusses that laws, regulations, rules, procedures, and contractual provisions governing the operations and activities of the FSS are public and readily accessible to system participants. The assessment recommends that securities settlement systems should have a well-founded, clear, and transparent legal basis in the relevant jurisdictions.

SINGAPORE

FINANCIAL SECTOR ASSESSMENT PROGRAM; DETAILED ASSESSMENT OF OBSERVANCE-CPSS-IOSCO PRINCIPLES FOR FINANCIAL MARKET INFRASTRUCTURES

International Monetary Fund This Detailed Assessment of Observance on the Committee on Payment and Settlement Systems-International Organization of Securities Commissions Principles for Financial Market Infrastructures on Singapore discusses that the Monetary Authority of Singapore (MAS) has taken important steps to address the recommendations made for capital market financial market infrastructures (FMIs). MAS has led efforts to develop international guidance on the cyber resilience for FMIs and moved swiftly to strengthen Singapore's governance and resiliency of the payment system. The assessment of New MAS Electronic Payment and Book-Entry System (MEPS+) finds that most of the principles are observed, however, also identifies opportunities for further improvement relative to international best practices. One of the several observations is that the legal basis is sound with further enhancements made for insolvency protection, designation criteria, and administrative powers for MAS. Also, governance arrangements are clear and transparent and should continue to ensure the independence of the oversight and supervisory functions for MEPS+.

ADVANCES IN NEURAL NETWORK RESEARCH AND APPLICATIONS

Springer Science & Business Media This book is a part of the Proceedings of the Seventh International Symposium on Neural Networks (ISNN 2010), held on June 6-9, 2010 in Shanghai, China. Over the past few years, ISNN has matured into a well-established premier international symposium on neural networks and related fields, with a successful sequence of ISNN series in Dalian (2004), Chongqing (2005), Chengdu (2006), Nanjing (2007), Beijing (2008), and Wuhan (2009). Following the tradition of ISNN series, ISNN 2010 provided a high-level international forum for scientists, engineers, and educators to present the state-of-the-art research in neural networks and related fields, and also discuss the major opportunities and challenges of future neural network research. Over the past decades, the neural network community has witnessed significant breakthroughs and developments from all aspects of neural network research, including theoretical foundations, architectures, and network organizations, modeling and simulation, empirical studies, as well as a wide range of applications across different domains. The recent developments of science and technology, including neuroscience, computer science, cognitive science, nano-technologies and engineering design, among others, has provided significant new understandings and technological solutions to move the neural network research toward the development of complex, large scale, and networked brain-like intelligent systems. This long-term goals can only be achieved with the continuous efforts from the community to seriously investigate various issues on neural networks and related topics.

REVISED GUIDELINES FOR PUBLIC DEBT MANAGEMENT

International Monetary Fund The Guidelines for Public Debt Management (Guidelines) have been developed as part of a broader work program undertaken by the IMF and the World Bank to strengthen the international financial architecture, promote policies and practices that contribute to financial stability and transparency, and reduce countries' external vulnerabilities. In developing the Guidelines, IMF and World Bank staffs worked in close collaboration with debt management entities from a broad group of IMF-World Bank member countries and international institutions in a comprehensive outreach process. The debt managers' insights, which this process brought to the Guidelines, have enabled the enunciation of broadly applicable principles, as well as institutional and operational foundations, that have relevance for members with a wide range of institutional structures and at different stages of development. The revision of the Guidelines was requested by the G-20 Finance Ministers and Central Bank Governors, at their meeting in Moscow, on February 15-16, 2013. Since their adoption in 2001, and amendments in 2003, financial sector regulatory changes and macroeconomic policy developments, especially in response to the recent financial crisis, have significantly affected the general financial landscape. As a consequence, many countries have experienced significant shifts in their debt portfolios, in terms of both size and composition. Accordingly, the Guidelines were reviewed and revised to reflect the evolving public debt management challenges over the last decade.

DETERMINANTS OF BANKS' NET INTEREST MARGINS IN HONDURAS

International Monetary Fund This paper analyzes the determinants of banks' net interest margins in Honduras during 1998 to 2013—a period characterized by increasing banks' net interest margins, foreign bank participation and consolidation. In line with findings in the previous literature, we find that operating costs are the most important drivers of banks' net interest margins. We also find that competition among banks has led to higher concentration and that funding by parent banks positively impacts foreign banks' net interest margins. Together, these results suggest that banks, particularly foreign banks, are under pressure to consolidate and reduce operating costs in order to offer competitive interest margins. We conclude that further structural reforms and consolidation may lower banks' net interest margins.
