SUPERNATURAL BATTLE

The dice are rolled at midnight. As the twenty-one-year-old heiress to the Le Spyre fortune, my life should consist of strawberry mojitos and golf carts. Right? MARGINAL EUROPE

THE CONTRIBUTION OF MARGINAL LANDS SINCE THE MIDDLE AGES

Oxford University Press, USA The momentum of the British industrial revolution arose mostly in regions poorly endowed

by nature, badly located and considered backward and poor by contemporaries. Sidney Pollard examines the initially surprising contribution made by the population of these and other 'marginal areas' (mountains, forests and marshes) to the economic development of Europe since the Middle Ages. He provides case studies of periods in which marginal areas took the lead in economic development, such as the Dutch economy in its Golden Age, and in the British industrial revolution. The traditional perception of the populations inhabiting these regions was that they were poor, backward, and intellectually inferior; but Sidney Pollard shows how they also had certain peculiar qualities which predisposed them to initiate progress. Healthy living, freedom, a martial spirit, and the hardiness to survive in harsh conditions enabled them to contribute a unique pioneering ability to pivotal economic periods; illustrating some of the effects of geography upon the development of societies.

URBAN FORMS AND COLONIAL CONFRONTATIONS

ALGIERS UNDER FRENCH RULE

During its long history as the French colonial city par excellence, Algiers was the site of recurrent conflicts between colonizer and colonized. Through architecture and urban forms confrontations were crystallized, cultural identities were defined, and social engineering programs were shaped and challenged. In this pathbreaking book, Zeynep elik reads the city of Algiers as the site of social, political, and cultural conflicts during the 132 years of French occupation and argues that architecture and urban forms are integral components of the colonial discourse. Algiers' city planning, based on what elik calls "the trial-and-error" model of French colonial urbanism, included the fragmentation of the casbah, ambitious Beaux Arts schemes to create European forms of housing, master plans inspired by high modernism, and comprehensive regional plans. Eventually a dramatic housing shortage led all planning efforts to be centered on the construction of large-scale residential enclaves. French architects based their designs for domestic space on the concept of the "traditional house," itself an interdisciplinary colonial concept intertwined with the discourse on Algerian women. Housing also offered the French colonizers a powerful presence in a country where periodic resistance to the occupation eventually culminated in a seven-year war of liberation and an end to French rule. Extensively illustrated with photographs, maps, and housing plans, elik's book presents a fascinating example of colonial urban planning. Algiers comes alive as a city that reflected all the conflicts of colonialism while embracing innovation.
