The Game of Love in Georgian England Courtship, Emotions, and Material Culture Oxford University Press Courtship in Georgian England was a decisive moment in the life cycle, imagined as a tactical game, an invigorating sport, and a perilous journey across a turbulent sea. This volume brings to life the emotional experience of courtship using the words and objects selected by men and women to navigate this potentially fraught process. It provides new insights into the making and breaking of relationships, beginning with the formation of courtships using the language of love, the development of intimacy through the exchange of love letters, and sensory engagement with love tokens such as flowers, portrait miniatures, and locks of hair. It also charts the increasing modernization of romantic customs over the Georgian era - most notably with the arrival of the printed valentine's card - revealing how love developed into a commercial industry. The book concludes with the rituals of disintegration when engagements went awry, and pursuit of damages for breach of promise in the civil courts. The Game of Love in Georgian England brings together love letters, diaries, valentines, and proposals of marriage from sixty courtships sourced from thirty archives and museum collections, alongside an extensive range of sources including ballads, conduct literature, court cases, material objects, newspaper reports, novels, periodicals, philosophical discourses, plays, poems, and prints, to create a vivid social and cultural history of romantic emotions. The book

demonstrates the importance of courtship to studies of marriage, relationships, and emotions in history, and how we write histories of emotions using objects. Love emerges as something that we do in practice, enacted by couples through particular socially and historically determined rituals. **Feeding Nelson's Navy The True Story of Food at Sea in the Georgian Era Frontline Books** The author of **How to Cook from A-Z** disproves the myth of British navy culinary misconduct in "a work of serious history that is a delight to read" (**British Food in America**). This celebration of the Georgian sailor's diet reveals how the navy's administrators fed a fleet of more than 150,000 men, in ships that were often at sea for months on end and that had no recourse to either refrigeration or canning. Contrary to the prevailing image of rotten meat and weevily biscuits, their diet was a surprisingly hearty mixture of beer, brandy, salt beef and pork, peas, butter, cheese, hard biscuit, and the exotic sounding lobsouse, not to mention the Malaga raisins, oranges, lemons, figs, dates, and pumpkins which were available to ships on far-distant stations. In fact, by 1800 the British fleet had largely eradicated scurvy and other dietary disorders. While this scholarly work contains much of value to the historian, the author's popular touch makes this an enthralling story for anyone with an interest in life at sea in the age of sail. "Overall this is an excellent examination of this crucial aspect of British naval power, and I'm certainly going to try out some of the recipes."

—**HistoryOfWar.org Feeding Nelson's Navy The True Story of Food at Sea in the Georgian Era Greenhill Books** The prevailing image of food at sea in the age of sail features rotting meat and weevily biscuits, but this highly original book proves beyond doubt that this was never the norm. Building on much recent research Janet Macdonald shows how the sailor's official diet was better than he was likely to enjoy ashore, and of ample calorific value for his highly active shipboard life. When trouble flared and food was a major grievance in the great mutinies of 1797 the usual reason was the abuse of the system. This system was an amazing achievement. At the height of the Napoleonic Wars the Royal Navy's administrators fed a fleet of more than 100,000 men, in ships that often spent months on end at sea. Despite the difficulty of preserving food before the advent of refrigeration and meat-canning, the British fleet had largely eradicated scurvy and other dietary disorders by 1800. This was the responsibility of the Victualling Board, a much-maligned but generally efficient bureaucracy that organized the preparing and packing of meat, the brewing of beer, the baking of ship's biscuit, and all the logistics of the Navy and on an industrial scale unparalleled elsewhere. Once aboard ship food and drink was subject to stringent controls to ensure fairness, and this book takes a fresh look at the tarnished reputations of Purser and Cook, before turning to the ways both officers and men were able to supplement their official rations, including the keeping of livestock on board. A chapter compares provisions in the other major navies of the time, and the book concludes with recipes for some of the exotic sounding dishes, like lobsouse, prepared by naval

cooks. While Feeding Nelson's Navy contains much of value to the historian, it is written with a popular touch that will enthrall anyone with an interest in life at sea in the age of sail. Margate Through Time This fascinating selection of photographs traces some of the many ways in which Margate has changed and developed over the last century The Georgian House in America and Britain Rizzoli International Publications The Georgian house - whether on a Georgetown street or in a leafy suburb- is considered among the most desirable and comfortable of homes. The Georgian style has stood the test of time, and continues to be popular today. Houses built over two hundred years ago still stand as proud and dignified as when they were first erected. The book describes the development of the Georgian style, beginning with its intro in the early 18th century up to the mid 19th century. Chapters are also devoted to each element of the house to help understand the ideas, techniques, and materials employed by the original builders. The most complete study of the historical development and importance of the Georgian style, this book is also a practical guide to preserving and restoring a Georgian house. The Ladies' Book of Etiquette, and Manual of Politeness A Complete Hand Book for the Use of the Lady in Polite Society Black Passports Travel Memoirs as a Tool for Youth Empowerment State University of New York Press A resource guide that uses African American memoir to address a variety of issues related to mentoring and curriculum development. In this resource guide for fostering youth empowerment, Stephanie Y. Evans offers creative commentary on two hundred autobiographies that contain African American travel memoirs of places around the world. The narratives are by such well-known figures as Frederick Douglass, W. E. B. Du Bois, Billie Holiday, Maya Angelou, Malcolm X, James Baldwin, Muhammad Ali, Richard Pryor, Angela Davis, Condoleezza Rice, and President Barack Obama, as well as by many lesser-known travelers. The book addresses a variety of issues related to mentoring and curriculum development. It serves as a tool for "literary mentoring," where students of all ages can gain knowledge and wisdom from texts in the same way achieved by one-on-one mentoring, and it also provides ideas for incorporating these memoirs into lessons on history, geography, vocabulary, and writing. Focusing on four main mentoring themes—life, school, work, and cultural exchange—Evans encourages readers to comb the texts for models of how to manage attitudes, behaviors, and choices in order to be successful in transnational settings. Stephanie Y. Evans is Associate Professor of African American Studies, Africana Women's Studies, and History at Clark Atlanta University. She is the author of Black Women in the Ivory Tower, 1850-1954: An Intellectual History and coeditor (with Colette M. Taylor, Michelle R. Dunlap, and DeMond S. Miller) of African Americans and Community Engagement in Higher Education: Community Service, Service-Learning, and Community-Based Research, also published by SUNY Press. Calculated Values Finance, Politics, and the Quantitative Age Harvard University Press Modern political culture features a deep-seated faith in the power of

numbers. But quantitative evidence has not always been revered, as William Deringer shows. After the 1688 Revolution, as Britons learned to fight by the numbers, their enthusiasm for figures arose not from efforts to find objective truths but from the turmoil of politics itself. Alice in wonderland Margate's Seaside Heritage Historic England The seaside holiday and the seaside resort are two of England's greatest exports to the world. Since the early 18th century, when some of the wealthiest people first sought improved health by bathing in saltwater, the lure of the sea has been a fundamental part of the British way of life, and millions of people still head to the coast each year. Margate has an important place in the story of seaside holidays. It vies with Scarborough, Whitby and Brighton for the title of England's first seaside resort, and it was the first to offer sea-water baths to visitors. Margate can also claim other firsts, including the first Georgian square built at a seaside resort (Cecil Square), the first substantial seaside development outside the footprint of an historic coastal town, the site of the world's first sea-bathing hospital, and, as a result of its location along the Thames from London, the first popular resort frequented by middle- and lower-middle-class holidaymakers. It is unlikely that Margate will ever attract the vast numbers of visitors that flocked there in the 19th and early 20th centuries. However, with growing concerns about the environmental effects of air travel and a continuing awareness of the threat of excessive exposure to the sun, the English seaside holiday may enjoy some form of revival. If Margate finds ways to renew itself while retaining its historic identity, it may once again become a vibrant destination for holidays, as well as being an attractive place for people to live and work. The Caucasus An Introduction Oxford University Press, USA Fully revised and updated, Tom de Waal's The Caucasus is an essential and authoritative introduction to this complex region. Armenia, Azerbaijan, Georgia, and the breakaway territories that have tried to split away from these states constitute one of the most diverse and challenging regions on earth, impressing the visitor with their multi-layered history, ethnic complexity, and seemingly intractable conflicts. Over the last few years, the South Caucasus region has captured international attention again because of its role in disputes between the West and Russia, its unsolved conflicts, and its role as an energy transport corridor to Europe. De Waal begins with a historical overview and then shifts his attention to the contemporary era, particularly the roiling conflicts over Nagorny Karabakh, South Ossetia, and Abkhazia. He also analyzes the energy politics of the region, the 2008 "Five-Day War" between Georgia and Russia, and recent political changes in all three countries. In addition, the book features brief snapshots of fascinating side topics such as Georgian wine, Baku jazz, and how the coast of Abkhazia came to be known as the "Soviet Florida." Concise, stimulating, and rich in detail, The Caucasus is the perfect guide to this fascinating and misunderstood region. The Settler Sea California's Salton Sea and the Consequences of Colonialism U of Nebraska Press An environmental history of Southern California's Salton

Sea, the state's largest inland body of water, and the complex politics of environmental and human health in the West. **The Making of the Georgian Nation** Indiana University Press "... the best study in English to date for an understanding of Georgian nationalism." —Religious Studies Review "... the standard account of Georgian history in English." —American Historical Review "... tour de force research... fascinating reading." —American Political Science Review Like the other republics floating free after the demise of the Soviet empire, the independent republic of Georgia is reinventing its past, recovering what had been forgotten or distorted during the long years of Russian and Soviet rule. Whether Georgia can successfully be transformed from a society rent by conflict into a pluralistic democratic nation will depend on Georgians rethinking their history. This is the first comprehensive treatment of Georgian history, from the ethnogenesis of the Georgians in the first millennium B.C., through the period of Russian and Soviet rule in the nineteenth and twentieth centuries, to the emergence of an independent republic in 1991, the ethnic and civil warfare that has ensued, and perspectives for Georgia's future.

1177 B.C. The Year Civilization Collapsed Princeton University Press In 1177 B.C., marauding groups known only as the "Sea Peoples" invaded Egypt. The pharaoh's army and navy managed to defeat them, but the victory so weakened Egypt that it soon slid into decline, as did most of the surrounding civilizations. After centuries of brilliance, the civilized world of the Bronze Age came to an abrupt and cataclysmic end. Kingdoms fell like dominoes over the course of just a few decades. No more Minoans or Mycenaeans. No more Trojans, Hittites, or Babylonians. The thriving economy and cultures of the late second millennium B.C., which had stretched from Greece to Egypt and Mesopotamia, suddenly ceased to exist, along with writing systems, technology, and monumental architecture. But the Sea Peoples alone could not have caused such widespread breakdown. How did it happen? In this major new account of the causes of this "First Dark Ages," Eric Cline tells the gripping story of how the end was brought about by multiple interconnected failures, ranging from invasion and revolt to earthquakes, drought, and the cutting of international trade routes. Bringing to life the vibrant multicultural world of these great civilizations, he draws a sweeping panorama of the empires and globalized peoples of the Late Bronze Age and shows that it was their very interdependence that hastened their dramatic collapse and ushered in a dark age that lasted centuries. A compelling combination of narrative and the latest scholarship, **1177 B.C.** sheds new light on the complex ties that gave rise to, and ultimately destroyed, the flourishing civilizations of the Late Bronze Age—and that set the stage for the emergence of classical Greece. **Representing the Royal Navy** British Sea Power, 1750-1815 Routledge From the mid 18th century up till after memories of the Napoleonic wars and the glories of 'Nelson's navy' had faded, the Royal Navy was the bulwark of Britain's defence and the safeguard of trade and imperial expansion. While there have been political

and military histories of the Navy in this period, looking at battles and personalities, and studies of its administration and the life below decks, this book is the first study of the Navy in a cultural context, exploring contemporary attitudes to war and peace and to ideologies of race and gender. As well as literary sources, Dr Lincoln draws on the vast collections of the National Maritime Museum, in paintings, cartoons, and ceramics, amongst others, to focus attention on material that has hitherto been little used - even research into the general culture of the late-Georgian age has, curiously, neglected perceptions of the Navy, which was one of its major institutions. Individual chapters discuss the attitudes of particular groups towards the Navy - merchants, politicians, churchmen, women, scientists, and the seamen themselves - and how these attitudes changed over the course of the period.

Slave Songs of the Georgia Sea Islands University of Georgia Press A valuable collection of folk music and lore from the Gullah culture, *Slave Songs of the Georgia Sea Islands* preserves the rich traditions of slave descendants on the barrier islands of Georgia by interweaving their music with descriptions of their language, religious and social customs, and material culture. Collected over a period of nearly twenty-five years by Lydia Parrish, the sixty folk songs and attendant lore included in this book are evidence of antebellum traditions kept alive in the relatively isolated coastal regions of Georgia. Over the years, Parrish won the confidence of many of the African-American singers, not only collecting their songs but also discovering other elements of traditional culture that formed the context of those songs. When it was first published in 1942, *Slave Songs of the Georgia Sea Islands* contained much material that had not previously appeared in print. The songs are grouped in categories, including African survival songs; shout songs; ring-play, dance, and fiddle songs; and religious and work songs. In additions to the lyrics and melodies, *Slave Songs* includes Lydia Parrish's explanatory notes, character sketches of her informants, anecdotes, and a striking portfolio of photographs. Reproduced in its original oversized format, *Slave Songs of the Georgia Sea Islands* will inform and delight students and scholars of African-American culture and folklore as well as folk music enthusiasts.

The Strategy of Denial American Defense in an Age of Great Power Conflict Yale University Press Why and how America's defense strategy must change in light of China's power and ambition—A Wall Street Journal best book of 2021 “This is a realist's book, laser-focused on China's bid for mastery in Asia as the 21st century's most important threat.”—Ross Douthat, New York Times “Colby's well-crafted and insightful *Strategy of Denial* provides a superb and, one suspects, essential departure point for an urgent and much-needed debate over U.S. defense strategy.”—Andrew F. Krepinevich, Jr., Foreign Affairs Elbridge A. Colby was the lead architect of the 2018 National Defense Strategy, the most significant revision of U.S. defense strategy in a generation. Here he lays out how America's defense must change to address China's growing power and ambition. Based firmly in the realist tradition but deeply engaged in current policy, this book offers a

clear framework for what America's goals in confronting China must be, how its military strategy must change, and how it must prioritize these goals over its lesser interests. The most informed and in-depth reappraisal of America's defense strategy in decades, this book outlines a rigorous but practical approach, showing how the United States can prepare to win a war with China that we cannot afford to lose--precisely in order to deter that war from happening.

The area is fascinating and diverse, comprising both large and small states, with a mixture of democracies and more authoritarian regimes. Traditionally a central foreign policy concern for Russia and Turkey, since the end of the Cold War, the EU and the US have become increasingly involved in the many dimensions of Black Sea politics. This book brings together a broad range of specialists on the region to analyze the challenge of divergent agendas both within and outside the EU. More specifically it looks at how the EU's enlargement to include states on the Black Sea shore has brought about new external policies including the European Neighbourhood Policy, Black Sea Synergy and the Eastern Partnership, all representing subtly different aims and interests. The various sections in the book also examine regionalization, conflict resolution, security, relationships between the Black Sea's states and last but not least, the vital issue of energy which has begun to dominate the discussion of the region. Designed to further the debate on the future of EU policies for the Black Sea region, this book is an essential resource for researchers, students and others in search of a coherent picture of the inter-relationship of EU initiatives and policies in the region. **De Gestis Britonum** Boydell & Brewer No description available. **Jonathan Livingston Seagull** The Complete Edition Simon and Schuster "Includes the rediscovered part four"--Cover. **The Circus and Victorian Society** University of Virginia Press This conflict informs us not only of the complicated role that the circus played in Victorian society but provides a unique view into a collective psyche fraught by contradiction and anxiety. **Master and Commander** HarperCollins UK It is the dawn of the nineteenth century; Britain is at war with Napoleon's France. our understanding of the historic environment in the longer term. The research findings and those of other scholars and heritage practitioners were presented at the 'Slavery and the British Country House' conference which brought together academics, heritage professionals, country house owners and community researchers from across Britain to explore how country houses might be reconsidered in the light of their slavery linkages and how such links have been and might be presented to visitors. Through the Looking-Glass Aegypan When you look at fine connections, it's hard to say exactly what relation "Alice in Wonderland" has to this book, "Through the Looking-Glass," Oh, it's plainly the same girl, though she seems older, here, and some characters (like Tweedledum and Tweedledee) appear in both. But she doesn't get there the same way, and doesn't refer to her adventures in Wonderland so much as once. Oh well: maybe it's all a dream and she can't remember the last one -- or maybe the magic through the Looking-Glass has hold of her, just as it has hold of Humpty Dumpty, or the Walrus and the Carpenter.
