We Shall Dance Again

Trafford Publishing **'We Shall Dance Again'** is a kaleidoscope of human relations: caring, loving, lustful, humiliating and revengeful. The central character of the story, Siddhartha, engulfed in these relations has tasted their extremes. Sonia, a stunning beauty, who does not think even the most eligible man worth her casual glance, pampers him with her mad love. She ushers him into the charming world brimming with desires of a home, of children and of a life-long companionship of love and devotion. But in response to her abject surrender, he only has a liking for her - no love. He vacillates between liking and love and eventually loses her. Sonia is fragrant and balmy and she oozes honey. And then comes Kranti, his wife, who with her cruelty and sickening absurdities, deflates all his pride to the edge and he has lost himself. She demolishes that Siddhartha whom his Dadi Maa tenderly raised with her selfless love. Kranti stinks of choked gutters and spits venom. Bereft of all hopes and rid of all desires when he is searching himself, Bharti happens. She is a dazzling beauty, earthly and spiritually both. Bharti is odourless like the spirits and exudes nectar. Both make love but in void. With her divine love, Siddhartha attains nirvana and is transformed to Siddha - the atman for whom Sonia and Kranti, love and hatred, pleasure and pain, all become synonymous.

INDIA'S NEW CAPITALISTS

Caste, Business, and Industry in a Modern Nation

Hachette UK It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book - acclaimed for being the first social history to document and understand India's new entrepreneurial groups - Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, *India's New Capitalists* is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Elements of Physical Chemistry

Oxford University Press The ideal course companion, *Elements of Physical Chemistry* is written specifically with the needs of undergraduate students in mind, and provides extensive mathematical and pedagogical support while remaining concise and accessible. For the seventh edition of this much-loved text, the material has been reorganized into short Topics, which are grouped into thematic Focuses to make the text more digestible for students, and more flexible for lecturers to teach from. At the beginning of each Topic, three questions are posed, emphasizing why it is important, what the key idea is, and what the student should already know. Throughout the text, equations are clearly labeled and annotated, and detailed 'justification' boxes are provided to help students understand the crucial mathematics which underpins physical chemistry. Furthermore, Chemist's toolkits provide succinct reminders of key mathematical techniques exactly where they are needed in the text. Frequent worked examples, in addition to self-test questions and end-of-chapter exercises,

help students to gain confidence and experience in solving problems. This diverse suite of pedagogical features, alongside an appealing design and layout, make Elements of Physical Chemistry the ideal course text for those studying this core branch of chemistry for the first time.

Advances in Communication and Computational Technology

Select Proceedings of ICACCT 2019

Springer Nature This book presents high-quality peer-reviewed papers from the International Conference on Advanced Communication and Computational Technology (ICACCT) 2019 held at the National Institute of Technology, Kurukshetra, India. The contents are broadly divided into four parts: (i) Advanced Computing, (ii) Communication and Networking, (iii) VLSI and Embedded Systems, and (iv) Optimization Techniques. The major focus is on emerging computing technologies and their applications in the domain of communication and networking. The book will prove useful for engineers and researchers working on physical, data link and transport layers of communication protocols. Also, this will be useful for industry professionals interested in manufacturing of communication devices, modems, routers etc. with enhanced computational and data handling capacities.

The Granth of Guru Gobind Singh Essays, Lectures and Translations

Oxford University Press, USA This book offers new insights into the secondary scripture of the Sikhs, Dasam Patshah Ka Granth or the Granth of Guru Gobind Singh. The scripture has in recent times adopted the name of

Dasam Granth and has traditionally been attributed to Guru Gobind Singh. Many studies have adopted a polemic approach and focused on the authorship of the text. This book takes a multi-disciplinary approach and considers the relationship of the scripture in terms of early manuscripts, apocryphal translations, and relics.

World on the Edge

How to Prevent Environmental and Economic Collapse

Routledge In this urgent time, World on the Edge calls out the pivotal environmental issues and how to solve them now. We are in a race between political and natural tipping points. Can we close coal-fired power plants fast enough to save the Greenland ice sheet and avoid catastrophic sea level rise? Can we raise water productivity fast enough to halt the depletion of aquifers and avoid water-driven food shortages? Can we cope with peak water and peak oil at the same time? These are some of the issues Lester R. Brown skilfully distils in World on the Edge. Bringing decades of research and analysis into play, he provides the responses needed to reclaim our future.

Ants Among Elephants

An Untouchable Family and the Making of Modern India

Farrar, Straus and Giroux **A Wall Street Journal Top 10 Nonfiction Book of 2017 A Publishers Weekly Best Book of 2017 A Shelf Awareness Best Book of 2017** "Ants Among Elephants is an arresting, affecting and ultimately enlightening memoir. It is quite possibly the most striking work of non-fiction set in India since *Behind the Beautiful Forevers* by Katherine Boo, and heralds the arrival of a formidable new writer." —The Economist The stunning true story of an untouchable family who become teachers, and one, a poet and revolutionary Like one in six people in India, Sujatha Gidla was born an untouchable. While most untouchables are illiterate, her family was educated by Canadian missionaries in the 1930s, making it possible for Gidla to attend elite schools and move to America at the age of twenty-six. It was only then that she saw how extraordinary—and yet how typical—her family history truly was. Her mother, Manjula, and uncles Satyam and Carey were born in the last days of British colonial rule. They grew up in a world marked by poverty and injustice, but also full of possibility. In the slums where they lived, everyone had a political side, and rallies, agitations, and arrests were commonplace. The Independence movement promised freedom. Yet for untouchables and other poor and working people, little changed. Satyam, the eldest, switched allegiance to the Communist Party. Gidla recounts his incredible transformation from student and labor organizer to famous poet and founder of a left-wing guerrilla movement. And Gidla charts her mother's battles with caste and women's oppression. Page by page, Gidla takes us into a complicated, close-knit family as they desperately strive for a decent life and a more just society. A moving portrait of love, hardship, and struggle, *Ants Among Elephants* is also that rare thing: a personal history of modern India told from the bottom up.

The Oxford Handbook of Sikh Studies

OUP Oxford The Oxford Handbook of Sikh Studies innovatively combines the ways in which scholars from fields as diverse as philosophy, psychology, religious studies, literary studies, history, sociology, anthropology, political science, and economics have integrated the study of Sikhism within a wide range of critical and postcolonial perspectives on the nature of religion, violence, gender, ethno-nationalism, and revisionist historiography. A number of essays within this collection also provide a more practical dimension, written by artists and practitioners of the

tradition. The Handbook is divided into eight thematic sections that explore different 'expressions' of Sikhism. Historical, literary, ideological, institutional, and artistic expressions are considered in turn, followed by discussion of Sikhs in the Diaspora, and of caste and gender in the Panth. Each section begins with an essay by a prominent scholar in the field, providing an overview of the topic. Further essays provide detail and further treat the fluid, multivocal nature of both the Sikh past and the present. The Handbook concludes with a section considering future directions in Sikh Studies.

The Autobiography of Syed Babar

Ali

Religious Interactions in Mughal India

Oxford University Press, USA Popular knowledge generally operates with the notion that "Hindu" and "Muslim" as polarized religious identities have existed from the moment Muslims entered northern India in the eleventh century. The essays for this volume interrogate this idea. They focus on Islamicate traditions in their interaction with coterminous Hindu ones in the three centuries between 1500 and 1800. They examine a wide tableau of sites and modes of interchanges, allowing the texts to speak in their own languages, whether these are assimilative, antagonistic, or indifferent. Given the charged nature of Hindi-Muslim relations today, a fresh study of these relations in their regional and temporal specificity along with a renewed attempt to closely interrogate the language in which we talk about them is absolutely vital in order to contest powerful and contemporary "clash of civilizations" narratives in South Asia as well as elsewhere.

Caste and nature

Dalits and Indian Environmental Policies

Oxford University Press Rarely do Indian environmental discourses examine nature through the lens of caste. Whereas nature is considered as universal and inherent, caste is understood as a constructed historical and social entity. Mukul Sharma shows how caste and nature are intimately connected. He compares Dalit meanings of environment to ideas and practices of neo-Brahmanism and certain mainstreams of environmental thought. Showing how Dalit experiences of environment are ridden with metaphors of pollution, impurity, and dirt, the author is able to bring forth new dimensions on both environment and Dalits, without valorizing the latter's standpoint. Rather than looking for a coherent understanding of their ecology, the book explores the diverse and rich intellectual resources of Dalits, such as movements, songs, myths, memories, and metaphors around nature. These reveal their quest to define themselves in caste-ridden nature and building a form of environmentalism free from the burdens of caste. The Dalits also pose a critical challenge to Indian environmentalism, which has, until now, marginalized such linkages between caste and nature.

Milk Proteins

Nutritional, Clinical, Functional and Technological Aspects

Springer Science & Business Media **This book reviews the state of knowledge and progress of research on food proteins, and in particular, milk proteins. Its basis is the Symposium on Milk Proteins that was held at the Federal Dairy Research Centre in Kiel, FRG, in June, 1988. Scientists from around the world attended and addressed pure, as well as applied fields of protein research and technology. This book is divided into five sections, each adapted from the symposium's invited lectures, short communications, and poster presentations. New criteria for the "biological value" of dietary proteins and their relationships are considered according to: - Milk Proteins and Nitrogen Equilibrium - Milk Proteins and Ligands - Milk Proteins: Structural and Genetic Aspects - Milk Proteins: Technological and Functional Aspects - Milk Proteins and Clinical Nutrition Generally, different dietary proteins are classified according to their "biological value," i.e., their capacity to cause different retention of nitrogen in the body. But we think there are other intriguing leads worth studying that may help to identify which dietary proteins are best recommended for specific dietary situations or clinical conditions. In addition, we have taken into consideration new fields such as attempts to determine the three-dimensional structure of proteins using two-dimensional NMR spectroscopy, and the application of genetic engineering to the lactating cell. In other words, we are on the way to the transgenic cow with customized milk constituents and composition.**

Politics of Inclusion

Castes, Minorities, and Affirmative Action

Oxford University Press **Post-Mandal, the demand for reservations by various groups has become a consistent feature of Indian politics. Yet, the focus remains on caste, with little attention paid to the under-representation of religious minorities in India. The book takes up the case of relative disadvantage and interrogates the multiple and overlapping dimensions of deprivation. Hasan argues that, in view of the comparative evidence available, presently excluded and disadvantaged groups should also qualify for affirmative action. This book will interest students and scholars of**

State Violence and Punishment in India

Routledge Exploring violent confrontation between the state and the population in colonial and postcolonial India, this book is both a study of the many techniques of colonial coercion and state violence and a cultural history of the different ways in which Indians imbued practices of punishment with their own meanings and reinterpreted acts of state violence in their own political campaigns. This work examines state violence from a historical perspective, expanding the study of punishment beyond the prison by investigating the interplay between imprisonment, corporal punishment, collective fines and state violence. It provides a fresh look at seminal events in the history of mid-twentieth century India, such as the massacre at Jallianwala Bagh, the non-cooperation and civil disobedience movements, the Quit India campaign, and the Hindu-Muslim riots of the 1930s and 1940s. The book extends its analysis into the postcolonial period by considering the ways in which partition and then the struggle against a communist insurgency reshaped practices of punishment and state violence in the first decade after independence. Ultimately, this research challenges prevailing conceptions of the nature of the state in colonial and postcolonial India, which have tended to assume that the state had the ambition and the ability to use the police, military and bureaucracy to dominate the population at will. It argues, on the contrary, that the state in twentieth-century India tended to be self-limiting, vulnerable, and replete with tensions. Relevant to those interested in contemporary India and the history of empire and decolonisation, this work provides a new framework for the study of state violence which will be invaluable to scholars of South Asian studies; violence, crime and punishment; and colonial and postcolonial history.

Plan B: Rescuing A Planet Under Stress And A Civilization In Trouble

Orient Blackswan **Over the past few years Lester R. Brown has written several bestselling works that have made us aware of the need for sustainable development. This latest work shows that we have created a bubble economy, one whose output is artificially inflated by overconsuming the earth's natural capital. The present course, Plan A, will lead to continuing environmental deterioration and eventual economic decline. The alternative is Plan B, a worldwide mobilization to stabilize population and climate before these issues spiral out of control. The goal is to stabilize population close to the United Nation's low projection of 7.4 billion, to reduce carbon emissions by half by 2015, and to raise water productivity by half. Lester Brown puts forward a workable blueprint that can be enacted now.**

The Marwaris

From Jagat Seth to the Birlas

Penguin UK In the nineteenth century, a tiny community from the deserts of Rajasthan spread out to every corner of India. The Marwaris controlled much of the country's inland trade by the time of the First World War. They then turned their hand to industry and, by the 1970s, owned most of India's private industrial assets. Today, Marwari businessmen account for a quarter of the Indian names on the Forbes billionaires list.// What makes the Marwaris so successful? Is it their indomitable enterprise, or their incredible appetite for risk? In this new book, Thomas Timberg shows how the Marwaris rely on a centuries-old system for conserving and growing capital which has stood them in good stead, alongside a strong sense of

business ethics which has earned them respect.// Family businesses in general and the Marwaris in particular might have a vital role to play in shaping India's economic future.
