

# Download Free Bureaucracies Medical And Doctors Parents Clinic The Of Order Ceremonial The

Right here, we have countless book **Bureaucracies Medical And Doctors Parents Clinic The Of Order Ceremonial The** and collections to check out. We additionally offer variant types and also type of the books to browse. The up to standard book, fiction, history, novel, scientific research, as capably as various further sorts of books are readily manageable here.

As this Bureaucracies Medical And Doctors Parents Clinic The Of Order Ceremonial The, it ends happening innate one of the favored ebook Bureaucracies Medical And Doctors Parents Clinic The Of Order Ceremonial The collections that we have. This is why you remain in the best website to see the incredible ebook to have.

## KEY=ORDER - RILEY FLORES

### THE CEREMONIAL ORDER OF THE CLINIC

#### PARENTS, DOCTORS AND MEDICAL BUREAUCRACIES

**Routledge** *This title was first published in 2001. A classic ethnographic study of the interactions between paediatricians and parents of children thought to be neurologically handicapped. Strong used this work to systematize the often chaotic ideas of Erving Goffman, to explore the connections between micro and macro analysis in sociology and to reflect on the nature of medical practice in modern liberal societies. The book stands as a testament to Strong's pursuit of methodological rigour in qualitative sociology.*

#### COMMUNICATION IN HEALTHCARE SETTINGS

#### POLICY, PARTICIPATION AND NEW TECHNOLOGIES

**John Wiley & Sons** *This book presents an international snapshot of communication in healthcare settings and examines how policies, procedures and technological developments influence day to day practice. Brings together a series of papers describing features of healthcare interaction in settings in Australasia, the U.S.A, continental Europe and the UK Contains original research data from previously under-studied settings including professions allied to medicine, telephone-mediated interactions and secondary care Contributors draw on the established conversation analytic literature on healthcare interaction and broaden its scope by applying it to professionals other than doctors in primary care Examines how issues relating to policy, procedure or technology are negotiated and managed throughout daily healthcare practice*

#### RETHINKING EXPERIENCES OF CHILDHOOD CANCER: A MULTIDISCIPLINARY APPROACH TO CHRONIC CHILDHOOD ILLNESS

#### A MULTIDISCIPLINARY APPROACH TO CHRONIC CHILDHOOD ILLNESS

**McGraw-Hill Education (UK)** *Written by a sociologist, psychologist and practising paediatric oncologist, this book offers a fresh theoretical approach to the experience of childhood cancer. The book also discusses the impact on parents and other family members when a child is diagnosed with cancer.*

#### UNCERTAIN FUTURES

#### COMMUNICATION AND CULTURE IN CHILDHOOD CANCER TREATMENT

**John Wiley & Sons** *This book examines children and young people's attempts to participate in conversations about their own treatment throughout uncertain cancer trajectories, including the events leading up to diagnosis, treatment, remission, relapse, and cure or death. Clearly and compellingly written, Clemente provides new methods for examining cancer communication, including a new multi-layered method to study cancer communication Provides ethnographic case studies of childhood cancer patients in Spain, using children's own words Examines the challenges of how to talk to and how to encourage the patient's involvement in the discussion of their treatment Argues that communication should be adjusted to the children's own needs, and that children's own questions can indicate how much or little they want to be involved Gives a new understanding of "patienthood" and childhood*

#### DEVELOPMENTS IN SOCIOLOGY

**Routledge** *Appropriate as a supplemental text to courses in Sociology. Providing an overview grounded in research. Developments in Sociology focuses on the major areas of theoretical, methodological and substantive developments in sociology. Each author takes a field of study in which they are an acknowledged expert and highlights the way in which the subject has developed over the last fifty years.*

#### SOCIOLOGY AND MEDICINE

#### SELECTED ESSAYS BY P.M. STRONG

**Routledge** *Doctors and patients, inter-professional rivalries, how sociologists might tackle the study of vital topics in health - all these are enduring themes in sociology and medicine. These are also the long-running intellectual preoccupations of Philip M. Strong's twenty-year contribution to the field - one which he did much to shape. Posthumously gathered together for the first time in this volume, are twelve of his major essays, many of which are difficult to find or have been out of print for some years. Grouped by theme, this important reference allows the reader to trace the development of Strong's thought over his career as well as the more general development of medical sociology as a whole.*

#### HANDBOOK OF COMMUNICATION IN ORGANISATIONS AND PROFESSIONS

**Walter de Gruyter** *This volume presents major contributions of Applied Linguistics to the understanding of communications in the professions. The first two parts of this book deal with the theoretical and methodological orientations of professional communication studies, the history and development of professional communication studies, highlighting the discursive turn of Applied Linguistic research that goes far beyond the established paradigm of Language for Specific Purposes. The third part - the core of this book - presents research into professional practices from various domains (e.g. law, healthcare, business and management, organizations), sites of engagement (as e.g. lawyer-client-conference, doctor-patient interaction) and with respect to different themes that are generalizable across domains and sites (as e.g. communicative aspects of action and practice, of assessment and appraisal). In the final part, professionals from various domains evaluate the contribution to their work so far made by Applied Linguistics.*

#### DOWN'S SYNDROME SCREENING AND REPRODUCTIVE POLITICS

#### CARE, CHOICE, AND DISABILITY IN THE PRENATAL CLINIC

**Taylor & Francis** *In the UK and beyond, Down's syndrome screening has become a universal programme in prenatal care. But why does screening persist, particularly in light of research that highlights pregnant women's ambivalent and problematic experiences with it? Drawing on an ethnography of Down's syndrome screening in two UK clinics, Thomas explores how and why we are so invested in this practice and what effects this has on those involved. Informed by theoretical approaches that privilege the mundane and micro practices, discourses, materials, and rituals of everyday life, Down's Syndrome Screening and Reproductive Politics describes the banal world of the clinic and, in particular, the professionals contained within it who are responsible for delivering this programme. In so doing, it illustrates how Down's syndrome screening is 'downgraded' and subsequently stabilised as a 'routine' part of a pregnancy. Further, the book captures how this routinisation is deepened by a systematic, but subtle, framing of Down's syndrome as a negative pregnancy outcome. By unpacking the complex relationships between professionals, parents, technology, policy, and clinical practice, Thomas identifies how and why screening is successfully routinised and how it is embroiled in both new and familiar debates surrounding pregnancy, ethics, choice, diagnosis, care, disability, and parenthood. The book will appeal to academics, students, and professionals interested in medical sociology, medical anthropology, science and technology studies (STS), bioethics, genetics, and/or disability studies.*

#### EBOOK: PATIENT PARTICIPATION IN HEALTH CARE CONSULTATIONS: QUALITATIVE PERSPECTIVES

**McGraw-Hill Education (UK)** *"The contributors to this book are experts in their field, adding a credibility that helps the reader relax. The varied experiences of people working not only within the UK but also Finland - where much of the work in this area has been carried out - are showcased." Nursing Standard How does patient participation work in practice? What does it look like when it happens? How can it be researched and how can it be taught? This comprehensive new book provides answers to these questions by exploring interconnections between theory, research and practice. It draws on different disciplinary perspectives in the health and social sciences and invites comparisons between different health care settings. With patient participation as the central theme, this book: Draws on patient, professional and academic perspectives Makes substantive contributions to policy, practice and professional development Contributes to the development of the field by offering new material and insights The research content of each chapter is accompanied by ideas for its educational and practical application. Real examples invite comparison with academic research and health professionals' experience. Patient Participation in Health Care Consultations takes a multidisciplinary approach and is key reading for students and academics in health and social sciences and for practising health care professionals. It will also be of interest to patients, carers and policy makers. Contributors: Sarah Collins, Nicky Britten, Carol Bugge, John Chatwin, Rowena Field, Joseph Gafaranga, Aled Jones, Pirjo Lindfors, Anssi Perakyla, Johanna Ruusuvaori, Fiona Stevenson, Andrew Thompson, Ian Watt.*

#### ONCOFERTILITY MEDICAL PRACTICE

#### CLINICAL ISSUES AND IMPLEMENTATION

**Springer Science & Business Media** *Oncofertility is a specialty that bridges the disciplines of reproductive endocrinology and infertility and oncology, with the goal of expanding the reproductive*

options of cancer patients. Given fertility risks associated with specific cancer treatments, as well as the improved long-term survival made possible by these therapies, there has been growing interest in expanding reproductive options for cancer patients. Indeed, both cancer survivors and the medical community have acknowledged the importance of patient counseling and the pursuit of fertility preservation options prior to starting cancer treatment. *Oncofertility Medical Practice: Clinical Issues and Implementation* is the third in a series of timely and indispensable books on fertility preservation for cancer patients—the first one focused on advances in basic science research and the second one offered ethical, legal, and social perspectives on the theme. This book elucidates the latest practices and emerging treatments in oncofertility and provides necessary information on the successes, risks, and limitations of fertility preserving technologies. Authoritative and insightful, written by an impressive multi-disciplinary cadre of specialists, this book is a valuable up-to-date resource for all those practicing in this demanding field. “This excellent text is an invaluable resource and a “must read” for clinicians and researchers interested in Oncofertility. The editors and authors need to be congratulated for their fine work.” Roger A. Lobo, MD, Professor of Obstetrics and Gynecology, Columbia University and Past President of the American Society for Reproductive Medicine

## HEALTH AND ILLNESS IN A CHANGING SOCIETY

---

**Routledge** Health and illness are intensely personal matters. It seems self evident that health is a basic necessity of the 'good life', though it is often taken for granted. Illness, on the other hand challenges our sense of security and may introduce acute anxiety into our lives. *Health and Illness in a Changing Society* provides a lively and critical account of the impact of social change on the experience of health and illness. It also examines the different sociological perspectives that have been used to analyse health matters. While some of the ideas developed in the last twenty years remain relevant to social research in health today, many are in need of urgent revision.

---

## THE CHILD'S WORLD OF ILLNESS

---

---

## THE DEVELOPMENT OF HEALTH AND ILLNESS BEHAVIOUR

---

**Cambridge University Press** This book discusses the languages of illness which we use to present our discomforts to others through an exploration of the child's world of illness. It looks at how illness concepts are introduced to children, how the causes of illness and 'germ' rationales are incorporated into the socialisation of children, and how a particular morality about health and illness is expressed.

---

## NEW GENETICS, NEW IDENTITIES

---

**Routledge** What implications are applications of new genetic technologies in biomedicine having on social identity in today's society? *New Genetics, New Identities*, a wide-ranging multi-disciplinary volume in the CESAGen Genetics & Society Book series, presents not only theoretical reflection but also empirical case studies drawn from an international array of authors. Including the highly controversial areas of reproductive technologies and use of human embryos in biomedical research, other key features include: a fresh analysis of a wide-range of social and political concerns in the development of new social identities examinations of the social implications of identity formation as a result from advances in genetic technologies from a number of perspectives both locally and globally resources of a wide range of social science disciplines to discuss significant sociological, anthropological, political and ethical issues. This superb collection is an essential informative read for postgraduates and academics in the fields of sociology, anthropology and scientific technologies giving a comparative approach to complex issues surrounding the social implications of these advances in a period of rapid social change.

---

## RESEARCH RELATING TO CHILDREN

---

---

## MENTAL HANDICAP

---

---

## DILEMMAS OF PARENT-PROFESSIONAL RELATIONS

---

**Routledge** First Published in 2004. In academic, popular and official literature a great deal has been written about parent-professional relationships. They are often represented as being fundamentally important and valuable for all the parties involved. The author of this book is concerned with the unequal power relations between parents and professionals and that professionals' assumptions and practices should be viewed as questionable from a parental perspective. This study concerns the parents of mentally-handicapped children, and to a lesser extent the various professionals, including academics, who impinge on their lives.

---

This book discusses communication between doctors and patients and how to overcome common communication problems.

---

## WHAT DO DOCTORS COMMUNICATE WHEN PRESCRIBING NEW MEDICATIONS?

---

---

## THREE GRAINS OF WHEAT

---

**Hillcrest Publishing Group** What would you be willing to give up to discover the world beyond your front door? "Three Grains of Wheat" chronicles Greek island native Emmanuel Papasavas' journey of self-exploration. It is a journey of more than a few steps as he strips away the chaff of his former life as a wheat farmer's son in pursuit of a dream that leads him away from his family and everything he once knew. Picturesque Agios Isidoros - the small Greek village where plumbing was unheard of and money was a rare commodity - is where author Mike Papasavas began his life (and his memoir) more than sixty-five years ago. As a boy, Papasavas knew little except the ways of a wheat farmer's son. Even so, ingrained in him was a desire to discover something beyond his village, beyond his life as young, naive Emmanuel. This yearning led him into the expansive world beyond where he would discover art, poetry, romance, friendships, and much more - though the quest would cost him his name. When he was twenty years old, Emmanuel - now known as Mike - barely saved enough money to buy a one-way ticket to Germany for the purpose of getting a visa...and a new life. But his journey to freedom is a rocky one, finding him up against several nearly insurmountable complications, homelessness and poverty, Mike learns to tackle each obstacle with humor and hope. For him, often times not knowing where he will sleep tonight, faith is his ultimate compass. Mike's determination paves the road toward adventures and misadventures that will forever change him in this culturally diverse travelogue peppered with entertaining stories, personal reflections, and heart-wrenching memories."

## RECONSIDERING PATIENT CENTRED CARE

---

---

## BETWEEN AUTONOMY AND ABANDONMENT

---

**Emerald Group Publishing** Through the detailed examination of a large corpus of healthcare interactions collected from a range of settings over a 25 year period, Pilnick illustrates the ways in which there are good organisational and interactional reasons for what may look from a PCC perspective like 'bad' healthcare practice.

---

## URBAN FAMILY MEDICINE

---

**Springer Science & Business Media** Now, more than ever, Family Medicine is alive and well in the United States. The base of this medical specialty has traditionally been in the smaller cities, suburban communities, and rural areas of this country. Over the past decade, however, there has been a resurgence of interest in primary care in our major metropolitan areas as a solution to the high tech subspecialty pace of the tertiary care environment. A rebirth of urban family medicine has accompanied these pioneering efforts. To date, the accomplishments are substantial and the prospects are bright. There is still a long way to go and there are a significant number of hurdles to cross. Although diseases are generally the same wherever you are, their effects as illness on the individual and the family are strongly influenced by the environment and social milieu. Urban families have distinctive and diverse problems-cultural, economic, and ethnic. Training programs situated in the large cities must recognize these issues and include special emphasis on the situations that the family physician is likely to encounter during and after his training. There is very little research literature on the background and nature of special urban problems and these areas are the subject of several chapters of this long overdue volume devoted specifically to urban family medicine. Dr. Birrer has persuaded true experts to share their knowledge with the reader.

## ORDINARY FAMILIES, SPECIAL CHILDREN, THIRD EDITION

---

---

## A SYSTEMS APPROACH TO CHILDHOOD DISABILITY

---

**Guilford Publications** This popular clinical reference and text provides a multisystems perspective on childhood disability and its effects on family life. The volume examines how child, family, ecological, and sociocultural variables intertwine to shape the ways families respond to disability, and how professionals can promote coping, adaptation, and empowerment. Accessible and engaging, the book integrates theory and research with vignettes and firsthand reflections from family members.

---

## LANGUAGE PRACTICES IN SOCIAL WORK

---

---

## CATEGORISATION AND ACCOUNTABILITY IN CHILD WELFARE

---

**Routledge** Analysis of language and discourse in social sciences has become increasingly popular over the past thirty years. Only very recently has it been applied to the study of social work, despite the fact that communication and language are central to social work practice. This book looks at how social workers, their clients and other professionals categorise and manage the problems of social work in ways which are rendered understandable, accountable and which justify professional intervention. Features include: studies of key practice areas in social work, such as interviews, case conferences, home visits analysis of the language and construction used in typical case studies of everyday social work practice exploration of the ways in which professionals can examine their own practice and uncover the discursive, narrative and rhetorical methods that they use. The purpose of this engaging study is to increase awareness of language and discourse in order to help develop better practice in social work. It is essential reading for professionals in social work, child welfare and the human services and will be a valuable contribution to the study of professional language and communication.

## CANCER AND SELF-HELP

---

---

## BRIDGING THE TROUBLED WATERS OF CHILDHOOD ILLNESS

---

**Univ of Wisconsin Press** Written for and about the special population of parents of children with cancer, this book explores the remarkable effectiveness of self-help groups and profiles their rapid rise as a resource complementing traditional health care. Mark A. Chesler and Barbara K. Chesney draw on their own experience as members of such groups and on a combined thirty years of research on self-help. They provide essential information for families of children with cancer (and other chronic life-threatening illnesses), for health-care professionals working with them, and for scholars of self-help and psychosocial processes in health care--including explanations of how self-help groups function, why they are effective, and how they can be created and maintained. The authors show that, through self-help groups, parents can learn coping skills, find personal affirmation and mutual support, and share the wisdom gained from their experiences. Chesler and Chesney find that group participation improves parents' coping capabilities in the face of terrible odds and fosters an increased sense of empowerment as they care and advocate for their children in an increasingly complex health care system. *Cancer and Self-Help* distills the experiences of more than fifty self-help groups and their members over twelve years. It also places cancer self-help groups in a larger context, comparing them to other social movement organizations and to other strategies for personal coping or change. The book includes the voices of individual parents and professionals recounting their experiences; detailed examples of group activities, programs, operating procedures, and organizational structures; fundamental, how-to information on forming a self-help group; comments on the roles and dilemmas of health care professionals in these groups and on the medical care system as a whole, and interpretations of these individual and organizational dynamics.

---

## THINKING ABOUT DEMENTIA

---

---

## CULTURE, LOSS, AND THE ANTHROPOLOGY OF SENILITY

---

**Rutgers University Press** Cultural responses to most illnesses differ; dementia is no exception. These responses, together with a society's attitudes toward its elderly population, affect the frequency of dementia-related diagnoses and the nature of treatment. Bringing together essays by nineteen respected scholars, this unique volume approaches the subject from a variety of angles, exploring the historical, psychological, and philosophical implications of dementia. Based on solid ethnographic fieldwork, the essays employ a cross-cultural perspective and focus on questions of age, mind, voice, self, loss, temporality, memory, and affect. Taken together, the essays make four important and interrelated contributions to our understanding of the mental status of the elderly. First, cross-cultural data show the extent to which the aging process, while biologically influenced, is also very much culturally constructed. Second, detailed ethnographic reports raise questions about the behavioral criteria used by health care professionals and laymen for defining the elderly as demented. Third, case studies show how a diagnosis affects a patient's treatment in both clinical and familial settings. Finally, the collection highlights the gap that separates current biological understandings of aging from its cultural meanings. As Alzheimer's disease and other forms of dementia continue to command an ever-increasing amount of attention in medicine and psychology, this book will be essential reading for anthropologists, social scientists, and health care professionals.
