It has been found that in many economies, the lost decade phenomenon persists, even after the conventional set of contributing factors such as per capita income, fertility rate, life expectancy, rule of law, educational attainment, ratio of investment to national income, and openness have been taken into account. This book explains where and how these lost decades in economic growth occur in the world. The authors identify that dominant macroeconomic factors contributing to their occurrence are an abnormal supply of credits relative to national income, and poor demand management. The study pays special attention to the cases of Japan, South Korea and Taiwan, exploring their specific cases and analyzing contributing factors. While Japan suffered from excessive credit prior to the bubble bursting, and from insufficient domestic demand subsequently, Korea's growth has been stunted through structural imbalances between and within industries, as well as through changes in the orientation of public policies from growth to equality. Adversely, reduced economic growth in Taiwan has led from its populism-ridden democracy and mass media, as well as from internal disputes over national identity. Lost Decades in Growth Performance provides a revealing insight into the factors affecting economic growth across the world, and will be an invaluable resource for anyone with an interest in global and Asian economics. It also offers a fundamental source of reference for students and academics in general equilibrium models, economic development and East Asian economies. **Papers and Proceedings of the ... Understanding Chinese Families A Comparative Study of Taiwan and Southeast China Oxford University Press This book provides the reader with a comprehensive introduction to the distinguishing features of Chinese families. This first full scale study seeks to understand Chinese families within the Chinese social context and draws comparisons with existing western theories and models of the family. It also explores the connection between two Chinese societies across the Taiwan Strait and investigates if the unique features of Chinese families can be applied to broaden the scope of family analysis in general. This book covers ten core areas, including co-residence, marriage, fertility, education, mobility, gender preferences, family supports, filial feedbacks, housework allocation, and the dynamics of family norm changes. The book uses theory-based empirical studies with data collected from a unique panel survey conducted in various areas across the Taiwan Strait, namely Taiwan and Southeast China. The two focal points of the study are geographically close, ethnically homogeneous, and are open to the modern market economy. A comprehensive analysis of these two areas provides new insights into the similarities and differences of Chinese families, to what extent they are distinct from Western ones, and how these similarities and differences were formed. The uniquely complex nature of intra-family interactions in Chinese families and the rapidly changing social background against which these interactions occur make this a hugely fascinating topic.

Education, Work, and Family Events in Women's Lives Long-Term Developments and Recent Trends in East and West Germany Verlag Barbara Budrich Dieses Buch untersucht, wie die Bildungsexpansion, der Trend zur Dienstleistungsgesellschaft sowie die deutsche Wiedervereinigung die Lebensverläufe und das Familienleben ost- und westdeutscher Frauen beeinflussen. Es konzentriert sich auf die Bildungsbeteiligung, das Bildungsniveau, die Erwerbsbeteiligung, die Karriereressourcen, die soziale Herkunft, den Bildungsmatch der Partner sowie die historischen Perioden und untersucht ihre Konsequenzen auf den Eintritt von Frauen in die erste Mutterschaft sowie Partnerschaftsbildungs- und Scheidungsprozesse. Auf Basis der Längsschnittdaten des Nationalen Bildungspanels (NEPS) wurden multivariate Methoden wie z.B. die Ereignisanalyse angewandt. Die Ergebnisse deuten darauf hin, dass der Eintritt der Frauen in Mutterschaft während der Vollzeitausbildung in hohem Maße von Frauenalter, sozialer Herkunft und den politischen Maßnahmen in einem Land abhängig ist.
