Vignettes in Patient Safety

Volume 4

BoD - Books on Demand Medical errors contribute significantly to morbidity and mortality across our healthcare institutions. Due to the increasing complexity of the modern medical practice, a perfect storm of regulatory, market, social, and technical factors, and other competing priorities, created an environment that is primed for patient safety lapses. The spectrum of contributing variables - ranging from minor errors that subsequently escalate, poor communication, and protocol/process non-compliance (just to name a few) - is extensive and solutions are only recently being described. As such, there is a growing body of research and experiences that can help provide an organized framework - based on best practices and evidence-based medical principles - for healthcare organizations to develop, implement, and embrace. Based on the tremendous interest in the initial three volumes of our Vignettes in Patient Safety series, this fourth volume follows a similar model of outlining a patient safety case based on experiences that many clinicians can relate to, and then discusses various factors that may have contributed to a medical error, complication, and/or poor outcome. Building on a problem-based clinical vignette, each chapter then outlines an evidence-based approach to present any related literature, pertinent evidence, and potential contributing factors and solutions to common patient safety occurrences. By focusing on some of the best practices, structured experiences, and objective approaches to medical error genesis, the authors and editors hopefully can lend some insights into how we can make healthcare encounters for all patients, across all settings, better and safer.

PISA Take the Test Sample Questions from OECD's PISA Assessments

Sample Questions from OECD's PISA Assessments

OECD Publishing This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

Cardiology Board Review and Self-Assessment: A Companion Guide to Hurst's the Heart

McGraw Hill Professional GAIN A GREATER UNDERSTANDING OF CARDIOVASCULAR MEDICINE - AND SHARPEN YOUR BOARD PREPARATION SKILLS -- WITH THE ONLY REVIEW BASED ON THE CONTENT OF HURST'S THE HEART Cardiology Board Review and Self-Assessment is an all-inclusive study guide and learning tool written to complement the Fourteenth Edition of Hurst's the Heart - the field's cornerstone text, and the resource considered by many to be the pinnacle of cardiovascular knowledge. Cardiology Board Review and Self-

Assessment contains more than 1,100 carefully selected questions and answers presented in multiple-choice format. Each of the 112 chapters of Hurst's the Heart is represented in this unique review, with ten multiple-choice questions. Detailed answers are provided for each question, including not only an explanation of why the correct answer is correct, but also why the incorrect answers are incorrect. **HERE'S WHY THIS IS THE ULTIMATE BOARD REVIEW AND CARDIOLOGY LEARNING TOOL:** • Questions and answers correspond to appropriate sections of Hurst's the Heart, and include valuable tables, figures, images, and references • The more than 1,100 Q&A span the depth and breadth of the entire field of cardiovascular medicine • High-yield material is specifically selected for Board relevance • Includes content based on ACC, AHA, and ESC guidelines Cardiology Board Review and Self-Assessment: A Companion Guide to Hurst's the Heart is essential reading for anyone preparing to take the Subspecialty Examination in Cardiovascular Disease given by the Board of Internal Medicine, as well as practicing cardiologists preparing for recertification. It is also of value to medical students, residents, fellows, practicing physicians, and other healthcare professionals who wish to expand their knowledge of cardiovascular medicine.

Answers and detailed explanations are provided at the end of each section. Also provided are thorough references by chapter to the main text and to appropriate journal articles.

Self-Compassion

The Proven Power of Being Kind to Yourself

[Hachette UK](#) Kristin Neff PhD, is a professor in human development whose 10 years' of research forms the basis of her timely and highly readable book. Self Compassion offers a powerful solution for combating the current malaise of depression, anxiety and self criticism that comes with living in a pressured and competitive culture. Through tried and tested exercises and audio downloads, readers learn the 3 core components that will help replace negative and destructive measures of self worth and success with a kinder and non judgemental approach in order to bring about profound life change and deeper happiness. Self Compassion recognises that we all have weaknesses and limitations, but in accepting this we can discover new ways to achieve improved self confidence, contentment and reach our highest potential. Simply, easily and compassionately. Kristin Neff's expert and practical advice offers a completely new set of personal development tools that will benefit everyone. 'A portable friend to all readers ... who need to learn that the Golden Rule works only if it's reversible: We must learn to treat ourselves as well as we wish to treat others.' Gloria Steinem 'A beautiful book that helps us all see the way to cure the world - one person at a time - starting with yourself. Read it and start the journey.' Rosie O'Donnell

The Architecture of Happiness

[Penguin UK](#) The Architecture of Happiness is Alain de Botton's exploration of the hidden links between buildings and our well being Bestselling author Alain de Botton has written about love, travel, status and how philosophy can console us. Now he turns his attention to one of our most intense but often hidden love affairs: with our houses and their furnishings. He asks: What makes a house truly beautiful? Why are many new houses so ugly? Why do we argue so bitterly about sofas and pictures - and can differences of taste ever be satisfactorily resolved? Will minimalism make us happier than ornaments? To answer these questions and many more, de Botton looks at buildings across the world, from medieval wooden huts to modern skyscrapers; he examines sofas and cathedrals, tea sets and office complexes, and teases out a host of often surprising philosophical insights. The Architecture of Happiness will take you on a beguiling tour through the history and psychology of architecture and interior design, and will forever alter your relationship with buildings. It will change the way you look at your current home - and help you make the right decisions about your next one. 'Engaging and intelligent . . . full of splendid ideas, happily and beautifully expressed' Independent Alain de Botton was born in 1969 and is the author of non-fiction essays on themes ranging from love and travel to architecture and philosophy. His bestselling books include Essays in Love; The Romantic Movement; Kiss and Tell; Status Anxiety; How Proust Can Change Your Life; The Pleasures and Sorrows of Work; The Art of Travel; The Architecture of Happiness and Religion for Atheists. He lives in London and founded The School of Life (www.theschooloflife.com) and Living Architecture (www.living-architecture.co.uk). For more information, consult www.alaindebotton.com.

Resources in Education

Small Animal Orthopedics, Rheumatology and Musculoskeletal Disorders

Self-Assessment Color Review 2nd Edition

[CRC Press](#) The practice of small animal orthopedics has advanced considerably in the 15 years since the publication of the first edition of Self-Assessment Color Review of Small Animal Orthopedics. Diagnostic procedures, instrumentation, implant systems, and surgical techniques have evolved and progressed considerably. This second edition of a trusted text keeps pace with the rapidly expanding practice of small animal orthopedics while embracing the developing fields of canine sports medicine and rehabilitative medicine. The newly titled Small Animal Orthopedics, Rheumatology and Musculoskeletal Disorders: Self-Assessment Color Review, 2nd Edition is designed to facilitate active learning through a new selection of clinical case scenarios along with integrated questions and answers that help readers develop sound decision-making skills. This illustrative, self-directed educational tool disseminates essential information to veterinary students, interns, and residents in training as well as small animal practitioners with specific interests in orthopedics, canine sports medicine, and rehabilitative medicine. In response to feedback provided by readers of the original text, references have been provided for each question, allowing readers the opportunity to delve more deeply into the topic of focus. The book includes contributions from an international group of clinicians and investigators. Orthopedic

surgeons, radiologists, internists, pathologists, neurologists, and anesthetists as well as veterinarians engaged in rehabilitative medicine have provided their diverse expertise and experience to make this text a comprehensive review of the expanding fields relating to small animal orthopedics.
