SUSTAINABLE DEVELOPMENT AND PLANNING IX

WIT Press Containing papers presented at the 9th International Conference on Sustainable Development and Planning this volume brings together the work of academics, policy makers, practitioners and other international stakeholders and discusses new academic findings and their application in planning and development strategies, assessment tools and decision making processes. Problems related to development and planning are present in all areas and regions of the world. Accelerated urbanisation has resulted in both the deterioration of the environment and quality of life. Taking into consideration the interaction between different regions and developing new methodologies for monitoring, planning and implementation, new strategies can offer solutions mitigating environmental pollution and non-sustainable use of available resources. Energy saving and eco-friendly buildings have become an important part of modern day progress with emphasis on resource optimisation. Planning is a key part in ensuring that these solutions along with new materials and processes are efficiently incorporated. Planners, environmentalists, architects, engineers and economists have to work collectively to ensure that present and future needs are met. The papers in the book cover a number of topics, including: City planning; Regional planning; Rural developments; Sustainability and the built environment; Sustainability supply chain; Resilience; Environmental management; Energy resources; Cultural heritage; Quality of life; Sustainable solutions in emerging countries; Sustainable tourism; Learning from nature; Transportation; Social and political issues; Community planning; UN Sustainable Development Goals and Timber Structures.

THE PROFESSIONAL PRACTICE OF ARCHITECTURAL WORKING DRAWINGS

John Wiley & Sons The detailed, highly illustrated, comprehensive guide to architectural working drawings The Professional Practice of Architectural Working Drawings is a complete guide to the skills you need to create a set of drawings that clearly and effectively communicate your design. Covering everything from site, floor, framing, and foundation plans to building sections and elevations, this book presents crucial concepts and real-world techniques architects rely on every day. You'll learn the standards, customs, regulations, and symbols, alongside computer-generated drawings, 3D modeling, Building Information Modeling, and other architectural technology. This new fifth edition includes updated information on sustainability concepts, layering systems in line with AIA standards, deeper explorations of dimensioning, more sample ADA drawings, and a new selection of case studies that offer a real-world glimpse into how these topics relate to the architect's everyday work. Hundreds of drawings demonstrate important skills and concepts, and online ancillary materials offer a robust set of resources to students and instructors. Architectural drawings must be precise, accurate, and complete; they must follow certain standards that make them universally understood in the proper context. This book teaches you how to produce professional-level drawings that leave no room for questions or confusion. Create architectural drawings that effectively communicate your design Learn techniques used in both residential and light commercial projects Investigate BIM, 3D modeling, and other architectural technologies Understand dimensioning, sustainability, ADA standards, and more Architects use drawings as a second language, to effectively communicate ideas to clients, contractors, builders, and other design professionals throughout all stages of the project. The Professional Practice of Architectural Working Drawings teaches you how to become fluent in the visual language of architecture, to communicate more effectively with all project stakeholders.

SOUTHERN HOMES AND PLAN BOOKS

THE ARCHITECTURAL LEGACY OF LEILA ROSS WILBURN

University of Georgia Press Southern Homes and Plan Books showcases the architectural legacy and design philosophy of Leila Ross Wilburn (1885-1967), a legacy that includes hundreds of houses in a variety of popular house styles, from bungalows to ranch houses, built using Wilburn's plan books during the first six decades of the twentieth century. Wilburn opened her own firm in Atlanta in 1908 and practiced until her death in 1967. She published nine plan books that offered mail order house designs to contractors, builders, and prospective homeowners and allowed them the ease of choosing a preconceived design and construction plan. Sarah J. Boykin and Susan M. Hunter provide a survey of the southern homes built from Wilburn's plan books, examining Wilburn's architectural legacy and her achievements as a plan book architect. The book provides beautiful photographs of houses built from her plans, along with illustrations from the plan books themselves and other related documents from the time. Readers can thus see how her designs were realized as individual houses and also how they influenced the development of some of the Atlanta area's beloved historical neighborhoods, most notably Druid Hills, Morningside, Virginia-Highland, and Candler Park, as well as the McDonough-Adams-Kings Highway (MAK) Historic District in Decatur. Today, Wilburn's houses are enjoyed as appealing, historic homes and represent some of the richest examples of southern vernacular architecture to emerge from the plan book tradition.
