### KEY=EU - JAEDEN ISABEL

---

---

#### A GUIDE TO EU ENVIRONMENTAL LAW

---

*University of California Press* Written by two internationally respected scholars, this unique primer distills European Union environmental law and policy into a practical guide for a nonlegal audience, as well as for lawyers trained in other jurisdictions. The first part explains the basics of the European legal system, including key actors, types of laws, and regulatory instruments. The second part describes the EU's overarching legal strategies for environmental management and delves into how the EU addresses the specific environmental issues of pollution, ecosystem management, and climate change. Chapters include summaries of key concepts and discussion questions, as well as informative "spotlights" offering brief overviews of topics. With a highly accessible structure and useful illustrative features, *A Guide to EU Environmental Law* provides a long-overdue synthetic resource on EU environmental law for students and for anyone working in environmental policy or environmental science.

---

#### EU ENVIRONMENTAL LAW

---

---

#### THE EUROPEAN UNION AND GLOBAL ENVIRONMENTAL PROTECTION

---

---

#### TRANSFORMING INFLUENCE INTO ACTION

---

*Routledge* This book examines how the EU can be a more proactive actor in the promotion of the principles of sustainability and fairness from a legal environmental perspective. The book is one of the results of the research activity of the Jean Monnet Chair in EU Environmental Law (2017-2020) funded by the European Commission under the Erasmus+ programme. *The European Union and Global Environmental Protection: Transforming Influence into Action* begins with an introduction of the key EU competences, instruments and mechanisms, as well as the current international challenges at the EU level. It then explores case study examples from four regulated fields: climate change, biodiversity, multilateral trade, unregulated fishing, and access to justice; and four unregulated areas: mainstreaming of the Sustainable Development Goals in EU policies, and environmental justice, highlighting the extent to which the EU might align with international environmental regimes or extend its normative power. This volume will be of great relevance to students, scholars, and EU policy makers with an interest in international environmental law and policy.

---

#### EU ENVIRONMENTAL LAW

---

This acclaimed text provides in-depth examination of environmental law at the EC level. It focuses on the policies driving European community practice in environmental matters, considering the origins of the relevant sections of the EC Treaty.

---

#### EU ENVIRONMENTAL LAW

---

*Edward Elgar Publishing* *EU Environmental Law* discusses the reality for legal practice throughout the EU, as environmental law of the Member States is becoming ever less 'national'. Consequentially European environmental regulation is becoming more complex and interrelated, making it an emerging field of study for European law graduates, and an area of increasing exposure to the legal profession. This book gives readers a thorough overview of core European environmental law, with a section on the basic framework and principles, as well as on substantive law issues giving insight into

the legislation in the different sectors and the most topical developments.

---

## **EU ENVIRONMENTAL LAW AND POLICY**

---

*Oxford University Press Abstracts: An accessible and comprehensive resource, this volume details the structure and logic of EU environmental law and enables readers to quickly gain a thorough understanding of the different areas of EU secondary law pertaining to the protection of the environment.*

---

## **EU ENVIRONMENTAL LAW AND THE INTERNAL MARKET**

---

*Oxford University Press A robust, exhaustive, and systematic legal analysis of the conflicts opposing integration of internal market and free competition rules with the environmental protection rules, including climate change rules, taken at an EU and national level.*

---

## **EU ENVIRONMENTAL POLICY**

---

---

### **ITS JOURNEY TO CENTRE STAGE**

---

*Routledge At a time when Europeans across the continent are focused on the EU's future direction, this book provides an important contribution to the current debate. Created for reasons quite unconnected with the environment, the EU has been given a compelling new justification by the success of its environmental policy. A number of factors - including a number of threats that came to prominence in the 1980s, and the new concept of 'sustainable development' - are responsible for pushing environmental policy to the forefront of its agenda. Nigel Haigh, a leading authority on the development and implementation of EU environmental policy, traces its evolution from obscurity to centrality. Drawing on a range of articles and lectures, he demonstrates how the EU has not only adapted itself to take on entirely new subject matter, but also has contributed to solving problems which individual Member States could not have dealt with on their own. The book goes on to contextualise the issues throughout its history and offers insight into the future role of the EU in environmental matters. This book is a valuable resource for academics and scholars as well as professionals and policy makers in the areas of environment and sustainability, politics, international relations and European affairs.*

---

## **ENVIRONMENTAL POLICY IN THE EUROPEAN UNION**

---

---

### **ACTORS, INSTITUTIONS, AND PROCESSES**

---

*Earthscan This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts, it includes in-depth case studies of contemporary policy issues such as climate change, genetically modified organisms and trans-Atlantic relations, as well as an assessment of how well the EU is responding to new challenges such as enlargement, environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the 'new' governance challenges posed by the perceived need to use 'new' policy instruments and processes to 'mainstream' environmental thinking in all EU policy sectors.*

---

## **EU ENVIRONMENTAL LEGISLATION**

---

---

### **LEGAL PERSPECTIVES ON REGULATORY STRATEGIES**

---

*Edward Elgar Publishing This thought-provoking book offers a cross-cutting debate on EU environmental legislation from a legal perspective focussing on key themes such as regulatory instrument choice, the coherency of law, and enforceable commitments. Based on thorough*

---

## **EU ENVIRONMENTAL GOVERNANCE**

---

---

### **CURRENT AND FUTURE CHALLENGES**

---

*Routledge This book presents an overview of the field of environmental law and policies within the European Union, from theoretical foundations to major issues and applied governance solutions. Drawing on expertise from renowned academics and practitioners from different disciplines, EU Environmental Governance: Current and Future Challenges helps readers to understand the main legal, political and economic issues of environmental protection since the adoption of the Paris Agreement by the European Union in 2015, until the 2020 Brexit, European Green Deal and coronavirus outbreak. The authors*

examine a broad range of sensitive and topical environmental issues including climate change, air pollution, waste management and circular economy, nuclear waste, biodiversity, agriculture, chemicals, nanotechnology, the environmental impacts of trade and environmental conflicts, presenting both current insights and future challenges. Overall, this volume exposes the reader to a vast array of empirical case studies, which will bolster their training and help tackle the environmental challenges faced by Europe today. This book is a valuable resource for students, researchers and policymakers across a broad range of fields, including environmental law and policies, environmental economics, climate science and environmental sociology.

---

## **THE HABITATS DIRECTIVE IN ITS EU ENVIRONMENTAL LAW CONTEXT**

---

### **EUROPEAN NATURE'S BEST HOPE?**

---

*Routledge* This book analyses the Habitats Directive; one of the most prominent piece of EU environmental legislation of the past decades. Seen by some as the cornerstone of Europe's nature conservation policy, among other measures the Directive established the so-called "Natura 2000" ecological network, which covers more than 18% of the surface of the EU. However, despite the fact the Directive was adopted over twenty years ago only 17% of the protected habitats and species in Europe are being adequately protected while 10-60 % of animal species remain under threat. In light of the limited success and the contested nature of the Habitats Directive so far this book examines the successes and failures of the Habitats Directive from a legal and political angle. The book brings together international experts to consider the application, implementation and future of the Habitats Directive in order to assess whether the Habitats Directive is resilient enough to tackle biodiversity loss in the twenty-first century. Particular emphasis is put on the legal regime attached to the Natura 2000 network and its possible impact on land development and the relationship between the Habitats Directive and other topics including liability for ecological damage and transboundary nature conservation.

---

## **ENFORCEMENT OF EUROPEAN UNION ENVIRONMENTAL LAW**

---

### **LEGAL ISSUES AND CHALLENGES**

---

*Routledge* Offering a detailed account of the various legal arrangements at European Union level, this book is an ideal reference tool for practitioners and legal scholars. As well as examining the principal sources of EU environmental law enforcement, it also contributes to the legal and political debates that surround the subject. Spanning three parts, the author examines the practical impact of the legal arrangements at Union level that are used to uphold EU environmental norms. Offering a comprehensive account of the current state of EU environmental law enforcement and the developments affecting it, Martin Hedemann-Robinson explores the role of the European Commission, the possibilities for private law enforcement, and the responsibilities of member state national authorities. Key legal developments that have occurred since the first edition have been incorporated, including new statutory developments and case law. Particular attention is paid to the impact of the 2007 Lisbon Treaty on foundational EU treaty provisions enabling the European Commission to take legal action against EU member states infringing Union environmental law, the establishment of a new legal architecture at Union level on the topic of environmental criminal policy, as well as increased EU legislative intervention in the area of environmental inspections. The impact of the 1998 Århus Convention on EU environmental law enforcement is also addressed in detail, including the influence of recommendations of the Århus Convention's Compliance Committee.

---

## **ENVIRONMENTAL HEALTH IN INTERNATIONAL AND EU LAW**

---

### **CURRENT CHALLENGES AND LEGAL RESPONSES**

---

*Routledge* This book presents a broad overview of the many intersections between health and the environment that lie at the basis of the most crucial environmental health issues, focusing on the responses provided by international and EU law. Consistent with the One Health approach and moving from the relevant international and EU legal frameworks, the book addresses some of the most important issues of environmental health including the traditional, such as pollution of air, water and soil and related food safety issues, as well as new and emerging challenges, like those linked to climate change, antimicrobial resistance and electromagnetic fields. Applying an intersectoral and interdisciplinary approach, it also investigates other branches of international and EU law including human rights law, investment law, trade law, energy law and disaster law. The work also discusses ethics and intergenerational equity. Ultimately, the book assesses the degree of effectiveness of the international and EU normative framework, and the extent to which the relevant legal instruments contribute to the protection of public health from major environmental hazards. The book will be a valuable resource for students, academics and policy makers working in the areas of Environmental Health law, Global Health law, International law and EU law.

---

## **MANUAL ON HUMAN RIGHTS AND THE ENVIRONMENT**

---

---

## **PRINCIPLES EMERGING FROM THE CASE-LAW OF THE EUROPEAN COURT OF HUMAN RIGHTS**

---

Council of Europe Prepared by government experts from all 46 member states of the Council of Europe, this publication seeks to help promote a better understanding of the relationship between human rights and environmental issues by setting out details of relevant case-law of the European Court of Human Rights and the principles upon which these judgements are based. These include: the right to life (Article 2), the right to respect for family life (Article 8), the right to a fair trial and access to a court (Article 6) and the right to receive and impart information and ideas (Article 10) of the European Convention on Human Rights.

---

## **ENVIRONMENTAL CRIME IN EUROPE**

---

Bloomsbury Publishing "Environmental crime is a growing challenge for policy makers and law enforcers. This is an important and timely study which examines in depth how environmental crime is treated at national level within the European Union and the impact of the 2008 EU Directive on environmental crime on national systems. It will be required reading by anyone concerned with making environmental law more effective." Richard Macrory, Emeritus Professor, University College London The aim of this important new collection is to explore how environmental crime is controlled and environmental criminal law is shaped and implemented within the European Union and its Member States. It examines the legal framework, looking in particular at Directive 2008/99/EC, and the specific competences of the EU in this domain. In addition, it provides a detailed analysis of environmental criminal law in seven Member States, focusing inter alia on the basic legislation, the way in which environmental pollution is criminalised and the main actors in place to enforce environmental criminal law. In so doing, it provides a much needed explanation of the evolution of environmental criminal law in Europe at Union level and how this is implemented in selected Member States.

---

## **EUROPEAN PERSPECTIVES ON ENVIRONMENTAL LAW AND GOVERNANCE**

---

Routledge "This book provides a range of perspectives from some of the leading environmental academics and practitioners active in Europe today on some of the most pressing contemporary challenges in EU environmental law and governance. The book focuses on three key cross-cutting issues each of which is carefully analysed through the lens of governance. The first theme to be addressed is that of climate change and the problems it poses for EU governance. The second part of the book deals with the challenge of integrating environmental considerations into other policy areas, as required by the Treaty on the Functioning of the European Union, as well as the EU's Charter of Fundamental Rights. While the third theme focuses on the important challenge of improving environmental enforcement within the EU, considering issues such as the Aarhus Convention and the development of the Commission's work on implementation and enforcement over the last twenty years. Throughout the book the three selected themes are situated within the broader ongoing debate about the changing nature of European environmental governance, covering topics such as the development of European environmental governance post-Lisbon and how such development fits with broader trends in European governance theory and policy. The book contains contributions from experts in the field including Mary Robinson, Alan Boyle, Ludwig Kramer and Liam Cashman, and will be of interest to academics, students and practitioners of EU environmental law"--

---

## **RESEARCH HANDBOOK ON EU ENVIRONMENTAL LAW**

---

Edward Elgar Publishing This comprehensive Research Handbook discusses how the EU has used its regulatory power to steer towards environmentally friendly behaviour, delving into the deep concerns related to the compliance with and enforcement of EU environmental law. It also highlights the important role of civil society's use of environmental procedural rights, and characterizes how the CJEU case law has contributed to the effective implementation of EU environmental legislation.

---

## **THE EFFECTIVENESS OF ENVIRONMENTAL LAW**

---

European Environmental Law Forum This book is the third volume in the 'European Environmental Law Forum' (EELF) book series. The EELF is a non-profit initiative of environmental law scholars and practitioners from across Europe aiming to support intellectual exchange on the development and implementation of international, European and national environmental law in Europe. One of the activities of the EELF is an annual conference. This book is comprised of fifteen contributions presented at the Third EELF Conference in Aix-en-Provence, hosted by the Central European Research Infrastructure Consortium, at Aix-Marseille University, from 2 to 4 September 2015. The central topic of the book is the effectiveness of environmental law. The impressive development in environmental law has not always been matched by corresponding improvements in environmental quality. The threats to our environment and, by extension, to our health have never been so numerous or serious. But paradoxically, the effectiveness of environmental law has been a long-neglected issue. This book offers a fruitful and stimulating dialogue between practitioners and academics, from varied countries and varied fields, combining empirical and theoretical approaches. The contributions go from classical -but still necessary- tools (control, criminal, administrative, civil sanctions, liability rules, strengthening of the regulatory structure and the role of judges?), to more innovative ones (public participation, effectiveness of instrument mixes, collaborative governance, hybrid governance and private environmental

enforcement"--Back cover.

---

## **ENVIRONMENTAL LAW**

---

### **TEXT, CASES AND MATERIALS**

---

*Oxford University Press, USA Environmental Law: Text, Cases, and Materials has been designed to provide students with everything they need to approach the subject with confidence. Experts in the area, the authors combine clear and insightful commentary with carefully chosen extracts from UK and international sources to offer students a well-rounded view of the subject area. Covering a broad range of topics, the authors introduce discussion on controversies and debates and encourage readers to engage in critical reflection by posing regular discussion questions throughout the text. Further reading suggestions point students towards useful resources, guiding their independent research. Online Resources This book is also accompanied by online updates collated by the authors, helping students to stay well-informed.*

---

## **ENVIRONMENTAL POLICY IN THE EU**

---

### **ACTORS, INSTITUTIONS AND PROCESSES**

---

*Routledge The European Union (EU) has a hugely important effect on the way in which environmental policies are framed and implemented in many different parts of the world, but especially Europe. The new and comprehensively revised edition of this well-known textbook provides a state-of-the-art analysis of all the EU's environmental policies. Comprising five parts, it covers the rapidly changing context in which EU environmental policies are made, the key actors who interact to co-produce policy and the most salient dynamics of policy making, ranging from decision making through to implementation and evaluation. Written by leading experts in the field, individual chapters examine how the EU is responding to a multitude of different problems including biodiversity loss, climate change, energy insecurity, and water and air pollution. They tease out the many important ways in which the EU's policies on these topics co-evolve with national and international environmental policies. In this third edition a mixture of learning features are employed to ensure that undergraduate and postgraduate students fully understand how EU policies in this vital area developed in the past and how they are now adapting to the rapidly evolving challenges of the twenty-first century.*

---

## **PROMOTING SOLIDARITY IN THE EUROPEAN UNION**

---

*Oxford University Press, USA "Based on a one-day seminar held at Sussex Law School in May 2008 entitled 'Seeking Solidarity in the European Union-Towards Social Citizenship and a European Welfare State?'"--Acknowledgments.*

---

## **COMPETITION LAW, CLIMATE CHANGE & ENVIRONMENTAL SUSTAINABILITY**

---

*The consensus is clear - climate change is the defining challenge of our time. Meeting this challenge requires a collaborative and inclusive response from all segments of society - including private businesses. What role then for competition law and policy? This important and timely book gathers academics, enforcers, economists, lawyers, and industry representatives to explore the applications and limitations of EU competition law in achieving environmental sustainability aims in line with the European Commission's Green Deal as well as the UN's Sustainable Development Goals. They identify the challenges of integrating environmental considerations into competition analysis presented by the existing framework, whether through cooperation by businesses, practices by dominant companies, or consideration of sustainability efficiencies in merger assessments. Practical examples across various sectors are also provided, alongside agency views from different jurisdictions, to illustrate how competition policy can facilitate a sustainable economy.*

---

## **HANDBOOK OF FIBER OPTIC DATA COMMUNICATION**

---

### **CHAPTER 7. MANUFACTURING ENVIRONMENTAL LAWS, DIRECTIVES, AND CHALLENGES**

---

*Elsevier Inc. Chapters The Design and Manufacturing of optoelectronics technology and related components used in fiber optics data communication products are significantly influenced by the emergence of new international environmental, ecodesign and chemical legislative directives. These dynamic laws and regulations propose to limit or eliminate heavy metals, chemicals, and other environmental pollutants used in the manufacture of various types of electronic and electric equipment, which have been linked to lasting environmental impacts and human health effects. This chapter discusses the leading environmental law and directives, including the European Union's (EU) Reduction of Hazardous Substances (RoHS), Waste Electrical and Electronic Equipment (WEEE), Ecodesign Directive for*

*Energy-related Products (ErP), Japanese J-Moss certification, and more. Detailed descriptions include both country-specific regulations (China, European Union) and specific regulations in various US states (such as New York and California).*

---

## **ESSENTIAL ENVIRONMENT**

---

---

### **THE GREENING OF EUROPEAN BUSINESS UNDER EU LAW**

---

---

#### **TAKING ARTICLE 11 TFEU SERIOUSLY**

---

*Routledge The relationship between environmentally sustainable development and company and business law has emerged in recent years as a matter of major concern for many scholars, policy-makers, businesses and nongovernmental organisations. This book offers a conceptual analysis of the principles of sustainable development and environmental integration in the EU legal system. It particularly focuses on Article 11 of the Treaty on the Functioning of the European Union (TFEU), which states that EU activities must integrate environmental protection requirements and emphasise the promotion of sustainable development. The book gives an overview of the role played by the environmental integration principle in EU law, both at the level of European legislation and at the level of Member State practice. Contributors to the volume identify and analyse the main legal issues related to the importance of Article 11 TFEU in various policy areas of EU law affecting European businesses, such as company law, insurance and state aid. In drawing together these strands the book sets out the requirements of environmental integration and examines its impact on the regulation of business in the EU. The book will be of great use and interest to students and researchers of business law, environment law, and EU law.*

---

#### **EU ENVIRONMENTAL AND PLANNING LAW ASPECTS OF LARGE-SCALE PROJECTS**

---

*European Environmental Law Forum "European Environmental Law Forum"--Back cover.*

---

#### **EUROPEAN ENVIRONMENTAL LAW**

---

*Cambridge University Press EU Environmental Law is a critical, comprehensive and engaging account of the essential and emerging issues in European environmental law and regulation today. Suitable for advanced undergraduate and postgraduate students, the book delivers a thematic and contextual treatment of the subject for those taking courses in environmental law, environmental studies, regulation and public policy, and government and international relations. Placing the key issues in context, EU Environmental Law takes an interdisciplinary and thematic approach to help students to better understand the implementation and enforcement of environmental law and policy across Europe. It offers an accessible overview, and links theory with practical applications that will allow students to contextualise the outcomes of legal rules and their impact on public and private behaviours. It provides a definitive account of the subject, examining traditional topics such as nature conservation law, waste law and water law, alongside increasingly important fields such as the law of climate change, environmental human rights law, and regulation of GMOs and nanotechnology.*

---

#### **THE EU ENVIRONMENTAL LIABILITY DIRECTIVE**

---

---

##### **A COMMENTARY**

---

*Oxford University Press The 2004 Environmental Liability Directive (ELD) created a legal regime for the restoration of environmental damage that was novel to all EU Member States. This is the first book to provide a comprehensive commentary on legal issues arising under the ELD as well as guidance on interpreting and applying the ELD.*

---

#### **THE BRUSSELS EFFECT**

---

---

#### **HOW THE EUROPEAN UNION RULES THE WORLD**

---

*Oxford University Press, USA The Brussels Effect offers a novel account of the EU by challenging the view that it is a declining world power. Anu Bradford explains how the EU exerts global influence through its ability to unilaterally regulate the global marketplace without the need to engage in neither international cooperation nor coercion.*

---

#### **EUROPEAN TAX LAW**

---

---

## **VOLUME II, INDIRECT TAXATION**

---

*Kluwer Law International B.V. European Tax Law Seventh Edition Volume II Marie Lamensch, Madeleine Merckx, Martijn Schippers, Ilona van den Eijnde Marie Lamensch is Professor of taxation at the UCLouvain and the Free University of Brussels and a lawyer at the Brussels' Bar. She is also a member of the VAT Expert Group of the European Commission. Madeleine Merckx is Professor of indirect taxes at Erasmus University Rotterdam and a partner at the Tax Research Center of BDO the Netherlands. Martijn Schippers is Assistant Professor in customs law and indirect taxation at the Erasmus School of Law, programme coordinator of EFS' Post-Master in EU Customs Law and member of EY's Global Trade & Customs team in the Netherlands. Ilona van den Eijnde is Academic Teacher in customs law and indirect taxation at the Erasmus School of Law and a lawyer at EY in Rotterdam, specialized in customs, environmental & lifestyle taxation. The seventh edition of this leading textbook brings its comprehensive and systematic survey of European Indirect Tax Law up to July 2021. With its critical discussion of the EU tax rules in force and of the relevant ECJ case law, it surpasses every other edition in its clarification and analysis of the EU regulatory framework applicable to indirect taxes. The in-depth coverage of this Volume II includes: The Union Customs legislation The harmonised Union VAT legislation The harmonised Union excise and environmental tax legislation The Union administrative cooperation regulatory framework applicable to indirect taxes. Volume I of this book covers general topics of EU law relevant for taxation and EU law on direct taxation. Ben J.M. Terra (University of Amsterdam, the Netherlands, and Lund University, Sweden) and Peter J. Wattel (University of Amsterdam) wrote the first six editions of this handbook*

---

## **WAITE AND JEWELL**

---

---

### **ENVIRONMENTAL LAW IN PROPERTY TRANSACTIONS**

---

*Bloomsbury Publishing Waite and Jewell: Environmental Law in Property Transactions provides a comprehensive practitioner guide to the environmental issues that arise in property transactions. It is divided into three key sections: 1. Commentary and guidance on the property transaction and identifies where the environmental issues might occur. 2. Broader discussion and explanation of specific environmental law issues that the practitioner needs to know about. 3. Provision of precedents to assist the busy property lawyer. This edition will give a general update following the last edition in 2009 and covers the Green Deal, Climate Change Regulations and the significant number of Environmental Permitting Regulations and Waste Regulations that have amassed since the last edition. Also includes a whole new chapter on climate change. Contents: Part I Approaching the Transaction: Chapter 1 Introduction to Parts I and II; Chapter 2 The need for information; Chapter 3 Preliminary enquiries; Chapter 4 Freedom of access to environmental information; Chapter 5 Local land charges search; Chapter 6 Local authority and Water Company enquiries; Chapter 7 Other sources of information; Chapter 8 Environmental survey; Chapter 9 Assessing and managing environmental risk: contractual provision and environmental insurance; Chapter 10 Particular transactions - leases and lending; Chapter 11 Development contracts; Chapter 12 Transferring permits; Part II The Broader Context: Chapter 13 Civil liability; Chapter 14 Statutory nuisance; Chapter 15 Contaminated land; Chapter 16 Waste; Chapter 17 Water; Chapter 18 Built environment; Chapter 19 Nature conservation; Chapter 20 Integrated pollution control and atmospheric pollution; Chapter 21 Climate Change; Part III Precedents. Previous edition ISBN: 9781845921064*

---

### **THE ROLE OF EU AGENCIES IN FIGHTING TRANSNATIONAL ENVIRONMENTAL CRIME**

---

---

#### **NEW CHALLENGES FOR EUROJUST AND EUROPOL**

---

*BRILL This study by Valsamis Mitsilegas and Fabio Giuffrida addresses the role of the EU criminal justice agencies -Europol and Eurojust- in tackling transnational environmental crime and it shows that their full potential is not yet adequately exploited in this field.*

---

## **EUROPEAN ENVIRONMENTAL LAW**

---

---

### **A COMPARATIVE PERSPECTIVE**

---

*Routledge European Environmental Law pulls together the most significant material on the subject from legal and other periodicals to form an essential compendium for those wishing to study the role of law in protecting and conserving the environment. The studies are arranged in three sections which examine the Europeanisation of law and policy, analyse the application and enforcement of law and discuss the improvement of standards in Europe.*

---

## **EU LAW ENFORCEMENT**

---

### **THE EVOLUTION OF SANCTIONING POWERS**

---

*Taylor & Francis* The existence of a structured enforcement system is an inherent feature of national legal orders and one of the core elements of State sovereignty. The very limited power to issue sanctions has often been deemed a gap in the EC legal order. Over the years, the situation has progressively changed. The Union's institutional setting is growing in complexity and a variety of agencies has been or is expected to be endowed with law enforcement responsibilities. In addition, the so-called competence creep has led the EU to play an increasingly prominent role in several areas of EU law enforcement, including the issuing of sanctions. This book examines these developments, focusing on both the general features of the EU legal order and the analysis of key-substantive areas, such as banking and monetary union, environmental law, and data protection. The work thus presents a general framework for understanding EU sanctioning based on structural features and general legal principles. Part I develops an analytical framework, tracking the most significant evolutive patterns of EU sanctioning powers. Part II adopts a more practical approach focusing on specific issues and policy areas. The book bridges a gap in existing literature and sheds new light on the relationship between the exercise of *jus puniendi* and the evolution of EU integration.

### **ENVIRONMENTAL PROTECTION IN MULTI-LAYERED SYSTEMS**

---

#### **COMPARATIVE LESSONS FROM THE WATER SECTOR**

---

*Martinus Nijhoff Publishers* The book aims at understanding the current distribution and use of powers over the environment among various layers of government and their consequences on environmental protection, comparing federal, regional and unitary State models and drawing theoretical and practical consequences.

### **WOLF AND STANLEY ON ENVIRONMENTAL LAW**

---

*Routledge* Written with real clarity by authors teaching and researching in the field, *Wolf and Stanley on Environmental Law* offers an excellent starting point for both law and non-law students encountering this diverse and controversial subject for the first time. Topics covered include administration and enforcement, waste management, EU environmental law, pollution control, environmental permitting, contaminated land, environmental torts and private regulation. The book is supported by a range of learning features designed to help students: Consolidate your learning: Chapter learning objectives and detailed summaries clarify and highlight key points Understand how the law works in practice: 'Law in Action' features demonstrate the application of pollution control law Plan your research: Detailed end of chapter further reading sections outline articles, books and online resources that provide next steps for your research This sixth edition has been updated and revised to take into account recent developments in the subject, including coverage of the Environmental Permitting (England and Wales) Regulations 2010; developments in the Environment Agency enforcement and sanctions policy documents; and updates relating to the defence of statutory authority in the tort of private nuisance. Suitable for students of environmental law and the wider environmental studies, *Wolf and Stanley on Environmental Law* is a valuable guide to this wide-ranging subject. Susan Wolf is Principal Lecturer in Law at the University of Northumbria. Neil Stanley is Lecturer in Law at the University of Leeds.

### **THE EU AND THE PROLIFERATION OF INTEGRATION PRINCIPLES UNDER THE LISBON TREATY**

---

*Routledge* The entry into force of the Lisbon Treaty has brought about a proliferation of "integration principles". In addition to the environmental integration principle, which has been part of the EU legal framework for some time, the Lisbon Treaty introduced the principles of gender equality integration, social policy integration, non-discrimination integration, consumer protection integration as well as animal welfare integration. Furthermore, a general principle of integration policy objectives is contained in Article 7 TFEU, requiring that the Union must ensure consistency between its policies and activities, taking all relevant policy requirements listed under the TFEU into account in the adoption of any legislative measure. These integration principles must be pursued, or at least taken into account, when decisions are being taken in almost any area of EU policy-making. However, there is considerable uncertainty regarding the normative implications of the various integration principles as well as their legal value and practical relevance for EU policymaking. This book addresses the implications of the proliferation of sectorial integration principles and the introduction of a universal requirement of policy consistency in terms of the division of competences between the Union and the Member States as well as the scope for judicial review of the EU legislative process. In particular, it explores whether the introduction of various integration principles has led to an extension of Union competences and whether it has limited the scope for judicial review by extending the discretionary power of the Union institutions.

---

---

**GREENING OF EUROPEAN BUSINESS UNDER EU LAW**

---

---

**DEFICITS IN EU AND US MANDATORY ENVIRONMENTAL INFORMATION DISCLOSURE**

---

---

**LEGAL, COMPARATIVE LEGAL AND ECONOMIC FACETS OF POLLUTANT RELEASE INVENTORIES**

---

---

*Springer Science & Business Media* It is the publicity about the Pollutant Release Inventory's data which creates an incentive for firms to achieve emission reductions. Accordingly, public access to environmental information constitutes a core characteristic of the aforementioned inventory. Here, in essence, two facets arise. First, with regard to the collection, it is disputed whether such information, which may comprise confidential commercial and industrial information in the EU as well as trade secrets in the US, can be protected under fundamental and constitutional property rights respectively. Second, in the context of dissemination and utilisation, it is arguable whether the information indeed impacts polluters and produces an outcome that secures a certain level of environmental protection. The author responds to the first issue by taking the EU and US jurisdictions into account and strives to analyse how this novel form of Internet disclosure liberates market mechanisms in the quest for effective and efficient emission reductions.
