VOCABULARY ASSESSMENT TO SUPPORT INSTRUCTION

BUILDING RICH WORD-LEARNING EXPERIENCES

Guilford Publications Vocabulary development is essential for learning, but conventional vocabulary assessments lack the range and flexibility to support K-12 classroom teachers in making instructional decisions. Drawing on multiple disciplines--including linguistics, educational psychology, and educational measurement--this book offers a fresh perspective on word learning and describes powerful, precise assessment strategies. Guidelines are presented for selecting which words to teach, evaluating the depth and richness of students' word knowledge and their ability to apply it in complex contexts, designing effective instructional practices, and using technology to create adaptive and scalable assessments. User-friendly features include sample test items, classroom examples, a glossary, and suggested print and online resources.

THE FAILURE FREE READING METHODOLOGY

NEW HOPE FOR NON-READERS

Dog Ear Publishing 8 Million students in grades 4-12 cannot comprehend grade level reading material. 440 Thousand students sitting in American classrooms K-12 have a total reading vocabulary of less than fifty words. 3 Thousand students drop out of school each day. 40 Percent of African-American and Latino students will not graduate on time or with a regular high school diploma. 25 Times the likelihood that non-readers and high school students testing below the twentieth percentile will drop out of school. Every day students across the country are being labeled and put into "special" programs. The gap between those students and their peers reading at grade level simply continues to grow until the gap seems too large to overcome. Often these students begin acting out in class because they have learned that it is better to go one on one with the principal versus being embarrassed and frustrated in front of their peers. It is not the fault of the student, teacher, or parent. We must stop looking for the reason to justify the failure and find a way to over come it. Simply labeling students Dyslexic, Learning Disabled, and Autistic will not offer them a reading solution. These students do not need remediation; they need an accelerated compensatory approach to mastering language and reading skills. Dr. Joe Lockavitch has been in the trenches with non-readers, their families, and their teachers for over thirty years. Students in the bottom reading percentiles (0-15th %) are slipping through the cracks right before our eyes. Based on his experiences in the classroom with non-readers, Dr. Lockavitch (former college professor, school psychologist, special education director) researched and developed a new reading methodology targeting non-readers of all ages. Highly structured, repetitious, and non-phonetic, The Failure Free Reading Methodology is an accelerated language program designed to give students, parents, and teachers the hope and the results they deserve. Dr. Lockavitch has seen it all. Throughout his career he has given reading demonstrations in places that have ranged from the heart of the Mississippi Delta, inner city schools in Detroit and Chicago, maximum-security prisons in South Carolina, and after school programs in Los Angeles, California. He will only do a demonstration under one condition and make only one claim, "I'll only work with your worst students. If you don't see immediate improvement in their reading ability within 30 minutes, I'll walk out the door." He hasn't walked out yet. Dr. Joseph F. Lockavitch, a former classroom teacher, school psychologist, university professor, special education director, and applied researcher, is the author and developer of: The Failure Free Reading Program, Don't Close the Book on Your Not-Yet Readers, Joseph's Readers Talking Software for Non-Readers, Verbal Master-An Accelerated Vocabulary Program, and The Test of Lateral Awareness and Directionality. Dr. Lockavitch is also the author of numerous published research articles. Dr. Lockavitch has spent the past thirty years training thousands of teachers, parents and administrators across the nation on how to meet the unique needs of America's non-readers. Featured on the PBS NewsHour with Jim Lehrer and mentioned on national radio

shows such as: Tom Joyner, Dr. Laura, Mike Gallagher, and Michael Medved, Dr. Lockavitch holds a Doctorate of Education from Boston University and a Master of Science in Special Education from Southern Connecticut State. In addition, Failure Free Reading is one of the nation's most approved Supplemental Educational Service providers - directly serving over ten thousand students and clocking close to three hundred thousand tutoring hours.

SECONDARY SCHOOL READING, PROCESS, PROGRAM, PROCEDURE

Allyn & Bacon Secondary School Reading presents carefully thought out, practical strategies for promoting the development of reading skills at the post-elementary level. Practical applications are presented through their relationship to the theoretical conception of the total reading-learning process as they relate to the learner's needs. Reading instruction in the secondary school is essentially different than elementary instruction in the school. The older young people have different needs and interests and utilize different cognitive strategies. This volume presents strategies for older learners which reflects a thorough knowledge of both reading and teaching, as well as many years of experience in teaching this level. Secondary School Reading is a good blend of theoretical constructs and practical application. Its examples offer the teacher many ideas for learning activities. Its appendices direct the reader to many sources of information and teaching materials.

ACADEMIC LIBRARY OUTREACH: BEYOND THE CAMPUS WALLS

BEYOND THE CAMPUS WALLS

ABC-CLIO Traditionally, academic library outreach has meant reaching out to the campus community, providing services to faculty and students. Many universities and colleges, however, now have a new or renewed emphasis on outreach beyond the campus, seeking to ensure their institutions' relevance to the community at large. How can and do academic libraries participate in this type of outreach? What types of collaborations or partnerships are academic libraries forming with schools, public libraries, or community groups? How do academic librarians partner with faculty or campus departments on their community projects? What role does service-learning play? Nancy Courtney has assembled a sampling of approaches, from the innovative to the tried-and-true, each written in the voice of its strongest champion.

PRACTITIONER'S GUIDE TO ASSESSING INTELLIGENCE AND ACHIEVEMENT

John Wiley & Sons A complete guide to key intelligence and achievement tests and their effective use The tools used in the assessment process have changed dramatically in recent years. School and clinical psychologists need a comprehensive yet focused resource to which they can turn to learn the basics of key intelligence and achievement tests and how to use them in their assessments of children and adults. With its practical and straightforward presentation, Practitioner's Guide to Assessing Intelligence and Achievement provides that resource. Coedited by two well-known and respected scholars and researchers, Jack Naglieri and Sam Goldstein, the content in this timely book combines traditional and new conceptualizations of intelligence as well as ways to measure achievement. Truly readable and user-friendly, this book provides professionals with a single source from which to examine ability and achievement tests along the same general criteria. Each chapter is written by a leading scholar and test developer and is consistently structured for easy comparison of each test that is examined. Coverage includes: The theory underlying each test Description of each test Tips for administering and scoring each test Standardization, norms, and reliability of each scale Practical guidance for the use of each test Correspondence of each test to IDEA A practical tool designed to aid clinical psychologists in understanding the strengths and weaknesses of the various tests presented, Practitioner's Guide to Assessing Intelligence and Achievement provides students and practitioners with the information they need for their practice and testing efforts to be consistent with recent updates in the field and how those assessment instruments relate to changes in the laws that influence test use.
