**Raccolta degli atti stampati per ordine della Camera documenti Dal n. 71 al 128 Spatial and Temporal Dimensions for Legal History Research Experiences and Itineraries** Max Planck Institute for European Legal History <http://dx.doi.org/10.12946/gplh6http://www.epubli.de/shop/buch/53894>"The spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law. Despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today, it still has not been the object of a focused inquiry. Against this background, the book's proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue. The aim of this volume, however, is not to offer abstract methodological considerations, but rather to rely both on concrete studies, out of which a reflection on this conjunction emerges, as well as on the reconstruction of certain research lines featuring a spatiotemporal component. This analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history. Indeed, contrary to those historiographical attitudes reflecting a monistic conception of space and time (as well as a Eurocentric approach), the book emphasises the need for a delocalized global perspective. In general terms, the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines, the flexibility of

those instruments that serve to create chronologies and scenarios, as well as certain processes of adaptation of law to different times and into different spaces. The spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes, but also to achieve new and compelling interpretations of legal history. As far as the relationship between space and law is concerned, the book analyses experiences in which space operates as a determining factor of law, e.g. in terms of a field of action for law. Moreover, it outlines the attempted scales of spatiality in order to develop legal historical research. With reference to the connection between time and law, the volume sketches the possibility of considering the factor of time, not just as a descriptive tool, but as an ascriptive moment (quasi an inner feature) of a legal problem, thus making it possible to appreciate the synchronic aspects of the 'juridical experience'. As a whole, the volume aims to present spatiotemporality as a challenge for legal history. Indeed, reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline." **Mathematical Lives Protagonists of the Twentieth Century From Hilbert to Wiles** Springer Science & Business Media Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications. This volume brings to the forefront some of the proponents of the mathematics of the twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who have impressive charisma and wide-ranging cultural interests, who are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers, Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle between 'soul and precision.' **Holy Resilience The Bible's Traumatic Origins** Yale University Press A leading biblical scholar offers a powerful reexamination of the Bible's origins and its connections to human suffering Human trauma gave birth to the Bible, suggests eminent religious scholar David Carr. The Bible's ability to speak to suffering is a major reason why the sacred texts of Judaism and Christianity have retained their relevance for thousands of years. In his fascinating and provocative reinterpretation of the Bible's origins, the author tells the story of how the Jewish people and Christian community had to adapt to survive multiple catastrophes and how their holy scriptures both reflected and reinforced each religion's resilient nature. Carr's thought-provoking analysis demonstrates how many of the central tenets of biblical religion, including monotheism and the idea of suffering as God's retribution, are factors that provided Judaism and Christianity with the strength and flexibility to endure in the face of disaster. In addition, the author explains how the Jewish Bible was deeply shaped by the Jewish exile in Babylon, an event that it rarely describes, and how the Christian Bible was likewise shaped by the unspeakable shame of having a crucified savior. **Epidemics and Society From the Black Death to the Present** Yale University Press A wide-ranging study that illuminates the connection between epidemic diseases and societal change,

from the Black Death to Ebola This sweeping exploration of the impact of epidemic diseases looks at how mass infectious outbreaks have shaped society, from the Black Death to today. In a clear and accessible style, Frank M. Snowden reveals the ways that diseases have not only influenced medical science and public health, but also transformed the arts, religion, intellectual history, and warfare. A multidisciplinary and comparative investigation of the medical and social history of the major epidemics, this volume touches on themes such as the evolution of medical therapy, plague literature, poverty, the environment, and mass hysteria. In addition to providing historical perspective on diseases such as smallpox, cholera, and tuberculosis, Snowden examines the fallout from recent epidemics such as HIV/AIDS, SARS, and Ebola and the question of the world's preparedness for the next generation of diseases.

**Gazzetta di Milano La fedeltà giornale quindicinale della Società romana dei reduci dalle battaglie in difesa del papato Gazzetta di Firenze "Il" Diavoletto Giornale Triestino Rendiconti del parlamento italiano discussioni del Senato del Regno 2. Sessione del 1861-62 8. Legislatura Gazzetta privilegiata di Milano Survival In Auschwitz** Simon and Schuster The author describes his twenty month ordeal in the Nazi death camp. **Atti parlamentari** Consists of separately numbered series of publications of the Parlamento as a whole, the Senato, and the Camera dei deputati. Each session is divided into Disegni di leggi; Documenti; and: Discussioni. **Gazzetta ufficiale del regno d'Italia Osservatore del lago Trasimeno Gazzetta medica di Milano Deviation** Pushkin Press The devastating account of one woman's infatuation – and subsequent disillusion – with Nazism, translated into English for the first time Lucie has been brought up by bourgeois parents as a passionate young fascist. At the age of eighteen, she decides to volunteer in the Nazi labour camps in Germany. Intending to disprove what she sees as the lies that are being told about Nazi-Fascism, she instead encounters the horrors of life there – and is changed completely. Shedding her identity, she joins a group of deportees being sent to Dachau concentration camp. She escapes the camp in October 1944 and wanders a Germany devastated by allied bombardments. Translated into English for the first time, Deviation is about the repression of memory, and one woman's attempt to make sense of the hell she has lived through. Luce d'Eramo (1925–2001) was born to Italian parents in Reims, France. Eventually settling in Rome, she earned degrees in Literature and Philosophy and wrote many works of fiction and non-fiction, including the novels Nucleo Zero and Partiranno. Deviation was first published in Italy in 1979 and became an international bestseller. **Espansione imperiale rassegna mensile di politica ed economia Laudato Si' On the care of the common home** Le vie della Cristianità Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours. **Il pungolo giornale della sera. 1862,7/12 Inquinamento Â Il Â mondo illustrato giornale universale From Columbus to ConAgra The Globalization of Agriculture and Food** This examination of the role of agriculture and food in the new international division of labor argues that the globalized economy creates new winners and losers. **Parametro**

**Bioreboot: The Architecture of R&sie{n}** Princeton Architectural Press "Bioreboot features nineteen projects - illustrated with extensive plans, photographs, and renderings - along with essays and an interview, providing the most comprehensive monograph to date of this elusive, intriguing firm, led by Francois Roche and Stephanie Lavaux. Despite working with oppositional relationships; machinery versus nature; purity versus corruption; paranoia versus rationality - theirs is an architecture whose primary aim is the ecological and social improvement of the place in which it exists. Bioreboot is a thought-provoking leap into the future and a clarion call for the development of a new relationship between contemporary architecture and the socionatural world." --Book Jacket.

**Handbook of Research on ePortfolios** IGI Global "This handbook investigates a variety of ePortfolio uses through case studies, the technology that supports the case studies, and it also explains the conceptual thinking behind current uses as well as potential uses"-- Provided by publisher.

**Traditions of Theology Studies in Hellenistic Theology, Its Background and Aftermath** BRILL Articles in this volume, originally presented at the 1998 Symposium Hellenisticum in Lille, discuss theological questions that were central to the doctrines of the dominant schools in the Hellenistic age, such as the existence of the gods, their nature, and their concern for humankind.

**Sustainable Development Report 2021** Cambridge University Press Contains insights on current issues in research on sustainable development, featuring the SDG Index and Dashboards.

**Le tre costituzioni pacifiste Il rifiuto della guerra nelle costituzioni di Giappone, Italia e Germania** Rubric Nation

**Critical Inquiries on the Impact of Rubrics in Education** IAP

What is a rubric and how are they being used in teacher education and evaluation? When did rubrics become ubiquitous in the field of education? What impact do rubrics have on students, teachers, teacher educators, and the educational enterprise? This book is an

edited volume of essays that critically examine the phenomenon of rubrics in teacher education, evaluation and education more broadly. Rubrics have seen a dramatic rise in use and presence over the past twenty-five years in colleges of education and districts

across the country. Although there is a wealth of literature about how to make rubrics, there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education. The chapters included

in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education. Since rubrics have become indelible in education, it is necessary for a fuller, nuanced discussion of the phenomenon. Creating a book

that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool. This book is not meant to be a series of chapters dedicated to best practices for creating rubrics, nor is this text meant to present all sides

of the rubric discussion. Rather, this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature.

**Mondoperaio Landscapes After the Battle**

Trapped in his apartment in an immigrant district of Paris, the narrator is far from the high life of museums, elegant restaurants and boutiques. Within this imprisonment, his thoughts oscillate between revolutionary terrorism and pre-pubescent sexuality - a concern

he shares with Lewis Carroll. Mirroring the conventions of Arabic texts, Landscapes After the Battle is to be understood from the

perspective of its end; an end where the relationship between writer, the reader and the written is revealed as playful and humorous. The appearance of the comic in a novel by Juan Goytisolo is unexpected; like Dracula at a haemophiliacs? convention. **Willis Faber and Dumas Headquarters** Prestel Pub The headquarters for Willis Faber & Dumas challenged accepted thinking about the office building and established Foster + Partners' reputation for democratic, flexibly planned workplaces. Primarily conceived with a spirit of equality, the architectural innovations of Willis Faber & Dumas included the use of escalators in a three-storey structure, as well as the social dimension offered by its swimming pool, roof-top restaurant and garden. Designed for long-term flexibility, the building pioneered the use of raised office floors, which anticipated the revolution in information technology. Externally, the building was equally distinguished for its state-of-the-art glass facade, and its free-form plan, which responded to the medieval street pattern. This monograph follows the building's evolution from concept through execution, including numerous illustrations and comprehensive essays, and will appeal to those interested in architecture and design. **Spontaneous Activity in Education** Montessori Helper The Montessori Method represents an explicit idealism and turn away from war and violence toward peace and reconstruction. It is built on coherent visions of how to improve human society by helping children realize their full potential as intelligent, creative, whole persons. In the Montessori Method, children are viewed as active authors of their own development, strongly influenced by natural, dynamic, self-righting forces within themselves, opening the way toward growth and learning. Teachers depend for their work with children on carefully prepared, aesthetically pleasing environments that serve as a pedagogical tool and provide strong messages about the curriculum and about respect for children. Partnering with parents is highly valued in the Montessori Method, and children are evaluated by means other than traditional tests and grades. **Moral Blindness The Loss of Sensitivity in Liquid Modernity** John Wiley & Sons Evil is not confined to war or to circumstances in which people are acting under extreme duress. Today it more frequently reveals itself in the everyday insensitivity to the suffering of others, in the inability or refusal to understand them and in the casual turning away of one's ethical gaze. Evil and moral blindness lurk in what we take as normality and in the triviality and banality of everyday life, and not just in the abnormal and exceptional cases. The distinctive kind of moral blindness that characterizes our societies is brilliantly analysed by Zygmunt Bauman and Leonidas Donskis through the concept of adiaphora: the placing of certain acts or categories of human beings outside of the universe of moral obligations and evaluations. Adiaphora implies an attitude of indifference to what is happening in the world - a moral numbness. In a life where rhythms are dictated by ratings wars and box-office returns, where people are preoccupied with the latest gadgets and forms of gossip, in our 'hurried life' where attention rarely has time to settle on any issue of importance, we are at serious risk of losing our sensitivity to the plight of the other. Only celebrities or media stars can expect to be noticed in a society stuffed with sensational, valueless information. This probing inquiry into the fate of our moral sensibilities will be of great interest to anyone concerned with the most profound changes that are silently shaping the lives of everyone in our contemporary liquid-modern world. **Zodiac Psycho-Oncology** American Psychiatric Pub Psycho-oncology integrates

research and clinical wisdom across multiple disciplines -- including oncology, psychiatry, psychology, surgery, radiotherapy and palliative care, among others -- in the service of educating oncologists, physicians, psychiatrists and other mental health care providers, and hospital chaplains about the psychological and psychosocial challenges faced by patients with neoplastic disorders. As cancer treatment has improved, the number of patients deemed "cancer survivors" has grown, along with their more complex, long-term mental health issues. This book assists care providers in meeting the challenge presented by this population. Written by international experts in psycho-oncology, the volume offers a compact overview of the clinical elements in this field, with a primary focus on the biopsychosocial aspects of individuals with cancer as well as their families and important people in their lives. Its "bench-to-bedside" approach ensures that the techniques presented are evidence-based, practical, and effective. The following are among the book's many helpful features: The chapters are designed to stand alone, to be shared or consulted as needed, but they also develop a coherent and sequential discussion about management of the patient with cancer, as well as concerns involving the patient's family. Thus, the book as a whole serves as a comprehensive textbook in the field. The book's structure is based on psychosocial staging, much as the disease itself is staged, and progresses from discovery to initial diagnosis, treatment intervention, remission, and so forth. Each phase has its own challenges -- for patient, family, and care provider -- and supportive strategies are offered. Because identifying those patients in need of support and treatment intervention is critical, the authors provide screening techniques, as well as an entire chapter devoted to quality of life assessment, to help clinicians recognize struggling patients and alleviate their distress. A final chapter addresses developing trends in psycho-oncology and suggests that international standards of care for the cancer patient must include competent and compassionate psychosocial assessment and treatment. Concise and clinically focused, yet addressing the broad issues as well, Psycho-oncology offers cutting-edge information and invaluable assistance to physicians and mental health professionals responsible for managing patients, and the families of patients, with neoplastic disorders. **A Guide to Social Return on Investment** *Young Writers Journals of a Landscape Painter in Albania, &c Relazioni internazionali*
