A Guide to Protein Isolation

Springer Science & Business Media It is a truism of science that the more fundamental the subject, the more universally applicable it is. Nevertheless, it is important to strike a level of "fundamentalness" appropriate to the task in hand. For example, an in-depth study of the mechanics of motor cars would tell one nothing about the dynamics of traffic. Traffic exists on a different "level" - it is dependent upon the existence of motor vehicles but the physics and mathematics of traffic can be adequately addressed by considering motor vehicles as mobile "blobs", with no consideration of how they become mobile. To start a discourse on traffic with a consideration of the mechanics of motor vehicles would thus be inappropriate. In writing this volume, I have wrestled with the question of the appropriate level at which to address the physics underlying many of the techniques used in protein isolation. I have tried to strike a level as would be used by a mechanic (with perhaps a slight leaning towards an engineer) - i.e. a practical level, offering appropriate insight but with minimal mathematics. Some people involved in biochemical research have a minimal grounding in chemistry and physics and so I have tried to keep it as simple as possible.

Global Happiness: A Guide to the Most Contented (and Discontented) Places around the Globe

A Guide to the Most Contented (and Discontented) Places around the Globe

*ABC-CLIO An authoritative, comprehensive, and highly accessible assessment of the happiest and least happy countries and cities in the world, as well as of the happiest and least happy cities and states in the United States. Which are the happiest countries in the world and which nations are the least contented? Which cities in the world are considered the happiest and unhappiest? Which American cities and states are at the top of the list and which ones rank poorly? Presenting findings that are based on solid data and authoritative information, this book offers a bold take on the geography of happiness around the world—and presents results that are often unexpected. It enables readers to make informed cross-cultural comparisons between countries and world cities, and uniquely synthesizes global information in a way that allows us answer the important question: "What makes us happy?" A book like no other, *Global Happiness: A Guide to the Most Contented (and Discontented)**

Places around the Globe tackles the complex equation of determining what places offer the happiest living experiences by considering quality of life, prospects for the future, social relations, confidence in good government, and many other factors that together constitute critical differences in living experience. The author—a professor of geography and urban studies as well as a world traveler—also takes into account the current events, politics, and environmental situations of specific regions, states, and cities, and considers what residents of the cities and countries say about their own places to derive accurate and fair assessments. • Supplies insightful and interesting information about all of the most contented and least contented countries and cities around the globe—and the factors that make the people who live in these places notably happy or discontented • Examines and explains the complexity of happiness and contentment as they apply to specific places and regions in the world • Synthesizes and evaluates the maze of existing rankings of cities and countries in the world with fresh and original information to produce a novel assessment of the geography of global happiness • Presents information about cities and countries in all parts of the world fairly and in both positive and negative lights

A Beautiful Game

International Perspectives on Women's Football

Berg FIFA, the world governing body of association football, declared 'The Future is Feminine' in a 1995 press release. Since then, football has been claimed as the fastest growing participation sport for women globally. An estimated twenty million women play the game around the world, and that figure is on the rise. However, the history of women's participation goes back to at least 1895 and in our enthusiasm for the present, the memory of that longer history can be overlooked or forgotten. A Beautiful Game examines contemporary women's football internationally, with case studies from England, the United States, China and Australia. In each case study, Jean Williams considers the evolution of the women's game against a backdrop of issues, such as media representation, access to facilities, lack of resources, coaching, sponsorship, talent identification, training and professionalisation. The author examines contentious questions, such as why women are absent from the highest levels of professional football, combining source material from archives, oral history and artefacts. A Beautiful Game analyses the status and image of the women's game from the late nineteenth century to the shifting social values of the present.

Canonical Collections of the Early Middle Ages (ca. 400-1140)

A Bibliographical Guide to the Manuscripts and Literature

CUA Press Contains a bibliographical survey of the chronological and systematic canonical collections in the Latin West from the beginnings of Christianity to Gratian's Decretum (ca. 1140). Dr. Kéry not only has compiled a catalogue of early medieval canonistic manuscripts, but has included valuable information about them. For each collection she has described its type and contents, the time and place of compilation, and, when possible, its author. Full bibliographies have been provided for each collection, arranged in chronological order. Scholars will find her work particularly useful since she has also noted where scholars have differed and where their opinions may be found. Special attention has been paid to the numerous recensions of the collections. She has given a separate entry for important recensions and has lists of fragments and abbreviated forms of the collections.
