This informative textbook provides concrete examples of different types of writing, offering a thorough introduction to music literature. Part 2 develops skills and strategies for library and Internet-based research, describing database structures and library catalogs, subject searching in catalogs and journal indexes, keyword searching techniques, related-record searching and citation databases, and the use of experts, the Internet, and thematic catalogs. In Part 3, Bayne describes music uniform titles and select resources that follow the organization of a music library, such as score collections, books and journals in music literature, and music teaching publications. Each chapter concludes with learning exercises to aid the students' concept application and skill development. Appendixes provide short cuts to specific topics in library organizational systems, including Library of Congress Subject Headings and Classification.
