## Notes from the Hyena's Belly

### An Ethiopian Boyhood

**Picador** *In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.*

## Designing and Evaluating Usable Technology in Industrial Research

### Three Case Studies

**Morgan & Claypool Publishers** *This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research*

## Concepts from Tensor Analysis and Differential Geometry

**Elsevier** Concepts from Tensor Analysis and Differential Geometry discusses coordinate manifolds, scalars, vectors, and tensors. The book explains some interesting formal properties of a skew-symmetric tensor and the curl of a vector in a coordinate manifold of three dimensions. It also explains Riemann spaces, affinely connected spaces, normal coordinates, and the general theory of extension. The book explores differential invariants, transformation groups, Euclidean metric space, and the Frenet formulae. The text describes curves in space, surfaces in space, mixed surfaces, space tensors, including the formulae of Gauss and Weingarten. It presents the equations of two scalars  $K$  and  $Q$  which can be defined over a regular surface  $S$  in a three dimensional Riemannian space  $R$ . In the equation, the scalar  $K$ , which is an intrinsic differential invariant of the surface  $S$ , is known as the total or Gaussian curvature and the scalar  $U$  is the mean curvature of the surface. The book also tackles families of parallel surfaces, developable surfaces, asymptotic lines, and orthogonal ennuples. The text is intended for a one-semester course for graduate students of pure mathematics, of applied mathematics covering subjects such as the theory of relativity, fluid mechanics, elasticity, and plasticity theory.

## Complexity Demystified A Guide for Practitioners

**Triarchy Press Limited** Practitioners often say: 'We need to do something differently but are not sure what to do or how to do it' and 'Scientists explain complexity but don't tell you what to do in practical terms'. This book has been written to offer solutions for these practitioners - to provide an Approach for 'putting complexity to work'. Practice is, de facto, determined by changing contexts. In a specific instance, what needs doing will depend on the circumstances, and cannot be bounded or decided in advance. But when most auditors, donors or managers demand tangible, target-driven results within a fixed time frame, how can practitioners convince them that working with the open principles of complexity will lead to more successful and sustainable solutions? This book is not 'yet another' complexity book. What it offers is an in-depth, systematic, Framework that practitioners can use to focus on the dynamic phenomena already active in their working context, to be able to shape and influence these phenomena 'on the fly'. The authors present six case studies, including the UK Fuel Crisis (2000) and the 2010 Gulf of Mexico Oil Spill. Their Approach reveals a clear understanding of the stresses and strains that were felt throughout the crises and how these might have been handled differently had an appreciation of the underlying complexity been part of standard practice. Drawn from their own experiences and those of other practitioners, and to bridge the gap between theory, experience and practice, the authors have produced a clear and erudite 'bible' for realising the inherent benefits of 'putting complexity to work'.

## Sales Closing For Dummies

**John Wiley & Sons** Without the close, there is no sale. Pretty obvious, right? Yet, for many salespeople, closing is the most baffling and elusive part of the selling process. All too often, salespeople meet qualified clients and charm them with an eloquent presentation, only to see the sale mysteriously slip from between their fingers in the end. ## Comparative Osteology

## A Laboratory and Field Guide of Common North American Animals

**Academic Press** *In the forensic context it is quite common for nonhuman bones to be confused with human remains and end up in the medical examiner or coroner system. It is also quite common for skeletal remains (both human and nonhuman) to be discovered in archaeological contexts. While the difference between human and nonhuman bones is often very striking, it can also be quite subtle. Fragmentation only compounds the problem. The ability to differentiate between human and nonhuman bones is dependent on the training of the analyst and the available reference and/or comparative material. Comparative Osteology is a photographic atlas of common North American animal bones designed for use as a laboratory and field guide by the forensic scientist or archaeologist. The intent of*

## Feel-Bad Education

## And Other Contrarian Essays on Children and Schooling

**Beacon Press** *Mind-opening writing on what kids need from school, from one of education's most outspoken voices Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of parenting "unconditionally." Whether he's talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today's debates about kids and schools.*

### Glorified Fasting

### The ABC of Fasting

**Ravenio Books** "STAND FAST, AND hold the traditions which ye have been taught, whether by word, or our epistle .... Comfort your hearts; and stablish you in every good word and work .... Finally, brethren, pray for us, that the word; of the Lord may have free course, and be GLORIFIED, even as it is with you." II Thess. 2:15, 17; 3:1. FASTING, like PRAYER, is a part of the word of God. To dispute this would be as foolish as denying water is wet. Shall we "STAND FAST" on this IRREVOCABLE "TRADITION," which we have been taught in the WORD, since it is indisputably a part of the WORD of God? Let us pray that it will "have free course, AND BE GLORIFIED," in its proper place in order that JESUS may receive more glory and honor from His children. The purpose of this volume is to popularize, perhaps one of the most downtrodden of all Biblical subjects, and assist in the author's small way to reestablish this part of the Gospel, bringing it out in all its glorious aspects. We are dealing with a tremendous portion of the Word—able to open up an avenue to tremendous power and glory with JESUS for the mutual welfare of His body, and the bringing of a mighty last day revival. By the proper utilization of fasting, praying, crying and mourning for souls, and by going into the FASTING-PRAYER without a selfish motive, many pillars of the FAITH can pull together in this travail to such an extent that when tragedy, destruction, persecution, and the rest of the last-day signs approach us more closely, we will have at our disposal a most effective weapon to carry us through for the glory of Jesus. It is NOT the purpose of this book, or any of the other articles on the subject of fasting, to leave an impression that this practice is the Scriptural cure-all for spiritual, moral and bodily complaints. Emphasis is given the subject for the purpose of quickly enlightening God's people who seem to be "falling away" from the old-time faith, and to prevent the unhappy drift towards modernism that is so sweeping the land. We do not emphasize fasting for the purpose of bragging, or for such great merit that it would be boasting before our God, but we are pressing it forward with such tempo so that the children of the Bridegroom will become more quickly and fully prepared for the closing of this Holy Spirit dispensation. This work has grown to such an extent, we have had to give up the revival auditorium. The author is devoting his entire time to the work of fasting, even discontinuing most of the traveling speaking engagements, in order to assure it greater success and promotion over the world for the mutual welfare of Christendom and the Kingdom of God. To make it even easier to grasp, the author has gone to additional expense in constructing drawings, diagrams and charts for numerous cuts to bring forth quickly through the eye-gate, this precious vital truth of orthodox Christianity. May the reader be blessed by them. This was done solely for the purpose of glorifying our most lovable Jesus. In the name of Father, and of the Son, and of the Holy Ghost, we, therefore, dedicate this work to Jesus. May it bring praise and honor of Him. Revelation 22:17-21.

## Ceramic Integration and Joining Technologies

## From Macro to Nanoscale

**John Wiley & Sons** *This book joins and integrates ceramics and ceramic-based materials in various sectors of technology. A major imperative is to extract scientific information on joining and integration response of real, as well as model, material systems currently in a developmental stage. This book envisions integration in its broadest sense as a fundamental enabling technology at multiple length scales that span the macro, millimeter, micrometer and nanometer ranges. Consequently, the book addresses integration issues in such diverse areas as space power and propulsion, thermoelectric power generation, solar energy, micro-electro-mechanical systems (MEMS), solid oxide fuel cells (SOFC), multi-chip modules, prosthetic devices, and implanted biosensors and stimulators. The engineering challenge of designing and manufacturing complex structural, functional, and smart components and devices for the above applications from smaller, geometrically simpler units requires innovative development of new integration technology and skillful adaptation of existing technology.*

## Emergency First Responder Respirator Thermal Characteristics

## Workshop Proceedings

**Createspace Independent Publishing Platform** *The purpose of this workshop was to identify performance needs and establish research priorities to address the thermal characteristics of respiratory equipment used by emergency first responders. The workshop provided a forum for representatives from the first responder community, self contained breathing apparatus (SCBA) and component manufacturers, and research and testing experts to discuss issues, technologies, and research associated with SCBA high temperature performance. The goals of the workshop were defined in two parts: 1) Clarify baseline information, including the current state-of-the-art, applicable fire service events, and current related research, and 2) Research planning, including identification of performance needs and short and long term research priorities. Presentations were given to explain the current SCBA and certification process, understand experience from actual fire service incidents, and review the current state of respirator research. After the presentations, the workshop divided into three working group sessions to discuss performance needs and research priorities in smaller groups. Suggested topics for discussion included: a) Current Equipment, b) Current Practice and Usage, c) Future Trends, d) Short Term Research Needs, e) Long Term Research Needs, and f) other issues. The results of the three smaller groups' deliberations were discussed when the full workshop reconvened. The responses from each group were merged into a combination of issues that related to the use and performance of the lens of the SCBA. The primary concerns and research priorities were the characterization of the fire fighter environment, performance of current and new technology, development of representative and realistic testing, and improvements to fire fighter training on the limitations of protective equipment. A significant amount of discussion concentrated on the testing for NFPA certification, which currently contains limited thermal testing.*

## Betraying Our Troops

### The Destructive Results of Privatizing War

**St. Martin's Press** In this shocking exposé, two government fraud experts reveal how private contractors have put the lives of countless American soldiers on the line while damaging our strategic interests and our image abroad. From the shameful war profiteering of companies like Halliburton/KBR to the sinister influence that corporate lobbyists have on American foreign policy, Dina Rasor and Robert H. Bauman paint a disturbing picture. Here they give the inside story on troops forced to subsist on little food and contaminated water, on officers afraid to lodge complaints because of Halliburton's political clout, on millions of dollars in contractors' bogus claims that are funded by American taxpayers. Drawing on exclusive sources within government and the military, the authors show how money and power have conspired to undermine our fighting forces and threaten the security of our country.
