## Business Politics in the Middle East

Hurst Publishers *Although most Arab countries remain authoritarian, many have undergone a restructuring of state-society relations in which lower- and middle-class interest groups have lost ground while big business has benefited in terms of its integration into policy-making and the opening of economic sectors that used to be*

*state-dominated. Arab businesses have also started taking on aspects of public service provision in health, media and education that used to be the domain of the state; they have also become increasingly active in philanthropy. The 'Arab Spring,' which is likely to lead to a more pluralistic political order, makes it all the more important to understand business interests in the Middle East, a segment of society that on the one hand has often been close to the ancien regime, but on the other will play a pivotal role in a future social contract. Among the topics addressed by the authors are the role of business in recent regime change; the political outlook of businessmen; the consequences of economic liberalisation on the composition of business elites in the Middle East; the role of the private sector in orienting government policies; lobbying of government by business interests and the mechanisms by which governments seek to keep businesses dependent on them.*

## Political Leaders and Democracy in Turkey

*Since the founding of the modern Turkish republic in 1923, Turkey's political leaders have been decisive in shaping the development of their country's democratic patterns and processes. Beginning with Mustafa Kemal Ataturk, Political Leaders and Democracy in Turkey analyzes the origins, political careers, beliefs, and policies of eleven of modern-day Turkey's most influential leaders. The chapters offer a unique perspective into the complex and fascinating world of Turkish political leadership and the transition to, and consolidation of, democracy. This crucial addition to Turkish studies and comparative politics is the first book to undertake a systematic study of the role political leaders have played in shaping the successes, as well as the shortcomings, of Turkey's grand democratic experiment.*

## The Caspian Sea Chessboard Geo-Political, Geo-Strategic And Geo-Economic Analysis

*EGEA spa Stuck in the middle of different as well as relevant regional complexes, the Caspian Sea basin represents a critical geopolitical hub in the heart of Eurasia landmass. However, behind the fierce competition aimed at the exploitation and transportation of the basin's hydrocarbons lies a much more complex picture, consisting of interlinked legal, military and soft power issues and threats. Aim of the volume - result of a joint research project conducted by the Center for Strategic Studies under the President of the Republic of Azerbaijan (SAM, Baku) and the Institute for International Political Studies (ISPI, Milan) - is to address the relevance of the*

Chief Garry John, Chair and Spokesperson, St'at'imc Chiefs' Council 'an activist's call to action on behalf of people who have been made invisible in the merciless spread of globalization under corporate control.' Nina Rao, Southern Co Chair of the Tourism Caucus at the UN Commission on Sustainable Development, and Professor of Tourism 'A powerful and much-needed tool to fight the seemingly all-pervasive ignorance in the corporate and consumer-driven world that continues to hail ecotourism and other tourism 'alternatives' as beneficial to local people without looking at the root causes of problems.' Anita Pleumarom, Tourism Investigation and Monitoring Team, Bangkok Tourism is the fastest growing industry in the world. Ecotourism, often considered a more benign form of tourism, can in fact cause the most damage, as it targets more vulnerable environments and cultures. *Is the Sacred for Sale?* looks at our present crossroads in consumer society. ## Return to Nature?

### An Ecological Counterhistory

*University Press of Kentucky Sustainability has become a compelling topic of domestic and international debate as the world searches for effective solutions to accumulating ecological problems. In Return to Nature? An Ecological Counterhistory, Fred Dallmayr demonstrates how nature has been marginalized, colonized, and abused in the modern era. Although nature was regarded as a matrix that encompassed all beings in premodern and classical thought, modern Western thinkers tend to disregard this original unity, essentially exiling nature from human life. By means of a philosophical counterhistory leading from Spinoza to Dewey and beyond, the book traces successive efforts to correct this tendency. Grounding his writing in a holistic relationism that reconnects humanity with ecology, Dallmayr pleads for the reintroduction of nature into contemporary philosophical discussion and sociopolitical practice. Return to Nature? unites learning, intelligence, sensibility, and moral passion to offer a multifaceted history of philosophy with regard to our place in the natural world. Dallmayr's visionary writings provide an informed foundation for environmental policy and represent an impassioned call to reclaim nature in our everyday lives.*

## Politics on the Edges of Liberalism

### Difference, Populism, Revolution, Agitation

*Edinburgh University Press An innovative exploration of ways of thinking and doing politics that challenge liberal assumptions. 'Politics on the edges of liberalism' refers to a grey zone where phenomena such as difference, populism, revolution and agitation turn the distinction between the inside and the outside of liberalism into a matter of dispute. Each chapter takes on one of these ideas, discussing the intellectual background animating the politics of the culture wars and its celebration of particularism over the universalism of classical liberal thought. Populism becomes a spectral recurrence rather than an outside of democracy. Agitation reappears in emancipatory politics, and the idea of revolution is thought through outside the Jacobin view of insurrection, overthrow and total re-foundation. This is truly interdisciplinary inquiry at the cutting edge of contemporary debates in politics,*

## The Force of the Example

## Explorations in the Paradigm of Judgment

Columbia University Press *During the twentieth century, the view that assertions and norms are valid insofar as they respond to principles independent of all local and temporal contexts came under attack from two perspectives: the partiality of translation and the intersubjective constitution of the self, understood as responsive to recognition. Defenses of universalism have by and large taken the form of a thinning out of substantive universalism into various forms of proceduralism. Alessandro Ferrara instead launches an entirely different strategy for transcending the particularity of context without contradicting our pluralistic intuitions: a strategy centered on the exemplary universalism of judgment. Whereas exemplarity has long been thought to belong to the domain of aesthetics, this book explores the other uses to which it can be put in our philosophical predicament, especially in the field of politics. After defining exemplarity and describing how something unique can possess universal significance, Ferrara addresses the force exerted by exemplarity, the nature of the judgment that discloses exemplarity, and the way in which the force of the example can bridge the difference between various contexts. Drawing not only on Kant's Critique of the Power of Judgment but also on the work of Hannah Arendt, John Rawls, Ronald Dworkin, and Jürgen Habermas, Ferrara outlines a view of exemplary validity that is applicable to today's central philosophical issues, including public reason, human rights, radical evil, sovereignty, republicanism and liberalism, and religion in the public sphere.*

They argue that the Ottoman state and society showed considerable ability to reorganize and adapt to changing circumstances and make the case that, until the 19th century, standards of living in many parts of the empire differed little from those in much of continental Europe.*

## Turkish Woman"

*Along with the rest of the world, the country of Turkey is beset by efforts to push women into a particular prototype. Encompassing such diverse fields of study as political science, economics, business, ethnography, history, and literature, this work gathers experts from around the world to explore various images attributed to or imposed upon Turkish women. Written from the perspectives of the 1990s, the essays integrate around the unifying theme of changes and continuities in the images of Turkish women from the late 19th-century to the present. The essayists situate the representations of women in their historical and ideological contexts, exposing myths and clarifying the complexities which are connected to them.*

# The Foreign Policy of the United Arab Emirates

*Al Saqi* Foreign Policy has been crucial to the UAE, ever since its birth in 1971 following Britain's decision to withdraw from the Gulf. How is the federation's foreign policy formulated? What are the internal and external pressures which shape it? How can a small Gulf state survive in the modern world? Dr Hassan Hamdan al-Alkim, himself a UAE national, has not only studied the Emirates' policy-making process in depth, but has also interviewed some of those closely involved in it. His detailed and fully documented study outlines the origins of the UAE and describes the evolution of its policies towards its neighbours, the wider Arab world, and the big powers. Three illuminating case-studies examine relations with Saudi Arabia and Iran, and the UAE's attitudes towards the Palestinian question.

# Turkey's New World

## Changing Dynamics in Turkish Foreign Policy

Washington Inst for Near East Pol *During the long Cold War era, Turkish foreign policy was restricted to just a few basic, if difficult and crucial, questions: how to ward off the Soviet threat, how to protect Turkish interests vis-à-vis Greece and Cyprus, and how to maintain and strengthen ties with the United States and NATO. Slightly less pressing but still important were questions of how to further Turkey's integration with Western Europe and, during the latter part of the Cold War, how to defend against terrorism supported by neighbors like Syria, Iraq, and Iran. These issues were problematic, rendered more complicated in combination. As the U.S. arms embargo of Turkey in the mid-1970s bears witness, managing relations with Cyprus and Aegean rival Greece while building bilateral ties with Washington were goals not always easily reconciled. Turkey's foreign policy challenges during the Cold War were high-risk, posing existentially threatening dangers, even in addition to the threat of nuclear annihilation shared by all NATO allies. Thousands of Turks died in political violence and terrorism in the late 1970s, with Turkey apparently targeted for destabilization by the Soviets.*

It sees the conflict both at a historical and at an analytical crossroads, and brings together leading scholars from various disciplines to provide fresh perspectives on the long-standing issues surrounding Cyprus.
