Research your property and be a step ahead. Be best prepared for viewing and offering. Understand and manage the conveyancing process step-by-step. Learn from others Almost two years ago, me and my partner had this brilliant idea: let's buy our own home! We were fed up with renting and thought we got this - a few months and we are sorted. Little did we know. When we embarked on the adventure, first thing we realised was that we didn't actually have a clue what we were doing, falling for the tricks of the trade at almost every step of the journey. We relied on online material and a few books explaining WHY you should buy, but not really HOW. We tumbled through the process from step to step, without being properly prepared for what was supposed to happen next and what was realistic. We had to let one house go after its survey revealed lots of issues that we could have spotted, then spent more than half a year trying to find another one and finally wound up in a chain that caused an additional 6-month delay. Thankfully, we are both scientists. In our best bid to get on top of everything, we started to do uncountable hours of research, calculations, reading up and talking to relevant people - agents, surveyors, mortgage brokers, other First Time Buyers. While we were suffering through the conveyancing process, I finally realised that I increasingly needed a therapeutic outlet. This is how this book was born: a catharsis, a plea that no matter what, something good must come out of this!! I thought - if nothing else, let's pass on everything that we have learned to make this a little easier for someone else. Because no-one deserves the unnecessary chaos, stress and financial losses that come with buying your own home. This book is our compiled wisdom to make the home buying process more transparent. We hope it will help you plan, make informed choices, be better in control of the process and, most importantly, know what is coming and what to expect. The purpose of this book is for you to be prepared and less at the mercy of 'the system'. **Contents Chapter 1. WHAT YOU SHOULD CONSIDER RIGHT NOW Chapter 2. CONSTRAINTS Chapter 3. Grants and mortgages are sources of funding that are meant to help you meet the costs of purchasing a home. Mortgage A mortgage is a loan borrowed from a bank or any financial institution by a property buyer. The loan is secured by the property being purchased. A mortgage is an essential source of funding that helps first time home buyers meet their dreams of owning a home. With a mortgage, you don't have to pay the whole amount at once in order to own a property. You make a certain deposit and the remaining amount can be cleared in installments. We do not as yet, he argues, live in a post-modern world. Rather the distinctive characteristics of our major social institutions in the closing period of the twentieth century express the emergence of a period of 'high modernity,' in which prior trends are radicalised rather than undermined. A post-modern social universe may eventually come into being, but this as yet lies 'on the other side' of the forms of social and cultural organization which currently dominate world history. In developing an account of the nature of modernity, Giddens concentrates upon analyzing the intersections between trust and risk, and security and danger, in the modern world. Both the trust mechanisms associated with modernity and the distinctive 'risk profile' it produces, he argues, are distinctively different from those characteristic of pre-modern social orders. This book build upon the author's previous theoretical writings, and will be of fundamental interest to anyone concerned with Giddens's overall project. However, the work covers issues which the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern. This book will be essential reading for second year undergraduates and above in sociology, politics, philosophy, and cultural studies.
