SYNTACTIC GEOLECTAL VARIATION

TRADITIONAL APPROACHES, CURRENT CHALLENGES AND NEW TOOLS

John Benjamins Publishing Company This volume brings together studies that combine both traditional and contemporary tools in the study of syntactic geolectal variation, with a special focus on a subset of Iberian varieties. There is an increasing body of research on syntactic micro-variation, but the interaction between dialectology (which makes use of atlases, corpora, databases, questionnaires, interviews, etc.) and formal syntactic studies has traditionally been weak (or even nonexistent), which is precisely the gap the contributions in this book aim at filling in. From a broader perspective, this collection is meant as a contribution to the subfield of linguistic variation and to the more general field of Romance linguistics, with special interest in Spanish and in other Iberian languages. The volume is meant for both researchers and students interested in linguistic variation or dialectology and, specifically, in syntactic variation in Iberian languages.

DETERMINATION OF PH**THEORY AND PRACTICE**

In portraying the rise and fall, in eighteenth century Ireland and England, of Barry Lyndon - an adventurer-gambler, a cad and a romantic idealist - Kubrick departs from Thackeray's picaresque novel in

scope and tone. The first person narrator of the novel gives way in the film to the third person who assumes a good deal of the storytelling function, adding to the sense of detachment and abstraction typical of Kubrick. The way that this film polarised the critics suggests that it may hold a key to his oeuvre. Enervating pictorialism or a stately meditation upon the trappings of cultural ritual that we call civilisation? The painterly tableaux suggest the 'otherness' of a past era - a world as alien as that of 2001 - in a way matched by few other period films.

INTRODUCTION TO MODERNITY

Verso Books Originally published in 1962, when Lefebvre was beginning his career as a lecturer in sociology at the University of Strasbourg, it established his position in the vanguard of a movement which was to culminate in the events of May 1968. A classic analysis of the modern world using Marxist dialectic, it is a book which supersedes the conventional divisions between academic disciplines. With dazzling skill, Lefebvre moves from philosophy to sociology, from literature to history, to present a profound analysis of the social, political and cultural forces at work in France and the world in the aftermath of Stalin's death—an analysis in which the contours of our own “postmodernity” appear with startling clarity.

FUNDAMENTALS OF DATABASE SYSTEMS: PEARSON NEW INTERNATIONAL EDITION

A BRIEF HISTORY OF TIME

Bantam #1 NEW YORK TIMES BESTSELLER A landmark volume in science writing by one of the great minds of our time, Stephen Hawking's book explores such profound questions as: How did the universe begin—and what made its start possible? Does time always flow forward? Is the universe unending—or are there boundaries? Are there other dimensions in space? What will happen when it all ends? Told in language we all can understand, A Brief History of Time plunges into the exotic realms of black holes and quarks, of antimatter and "arrows of time," of the big bang and a bigger God—where the possibilities are wondrous and unexpected. With exciting images and profound imagination, Stephen Hawking brings us closer to the ultimate secrets at the very heart of creation.

THE ATTRACTION OF RELIGION

A NEW EVOLUTIONARY PSYCHOLOGY OF RELIGION

Bloomsbury Publishing Religion is an evolutionary puzzle. It involves beliefs in counterfactual worlds and engagement in costly rituals. Yet religion is widespread across all human cultures and eras. This begs the question, why are so many people attracted to religion? In The Attraction of Religion, essays by leading scholars in evolutionary psychology, anthropology, and religious studies demonstrate how religion may be related to evolutionary adaptations because religious commitments involve fitness-enhancing behaviours that promote reproduction, kinship, and social solidarity. Could it be that religion is wide-spread, at least in the modern world, because it helps to facilitate cooperative breeding? International contributors explore the philosophical and theoretical arguments for and against the use of costly signalling, sexual selection, and related theories to explain religion, and empirical findings that support or disconfirm such claims. The first book-length treatment that focuses specifically on costly signalling, sexual selection, and related evolutionary theories to explain religion, The Attraction of Religion will be an important contribution to the field and will be of interest to researchers in the fields of evolutionary psychology, religion and science, the psychology of religion, and anthropology of religion.

THE WORLD I LIVE IN

The Floating Press In her earlier works, Helen Keller described the details of the early illness that left her deaf and blind, and in the prevailing opinion of the day, unable to be educated, as well as the methods that were eventually used to teach her how to communicate. In the remarkable memoir *The World I Live In*, Keller offers a much more personal take on her situation, inviting readers inside her own personal experience.

AFTER PHILOSOPHY

END OR TRANSFORMATION?

MIT Press *After Philosophy* provides an excellent framework for understanding the most important strains of current philosophical work in North America, England, France, and Germany. The selections from the work of fourteen contemporary philosophers not only display the multiplicity of approaches being pursued since the breakup of any consensus on what philosophy is, but also help to clarify this proliferation of views and to spell out today's basic options for doing, or not doing, philosophy today. With a general introduction delineating what is in dispute between the different parties to the end-of-philosophy debates, brief introductions to the thought of each author, and suggestions for further reading following each selection, *After Philosophy* is ideally suited for use in any course that includes an overview of the bewildering variety of contemporary approaches to philosophy. The major sections and contributors are: I. The End of Philosophy. Richard Rorty, Jean-François Lyotard, Michel Foucault, Jacques Derrida. II. The Transformation of Philosophy: Systematic Proposals. Donald Davidson, Michael Dummett, Hilary Putnam, Karl-Otto Apel, Jürgen Habermas. III. The Transformation of Philosophy: Hermeneutics, Narrative, Rhetoric. Hans-Georg Gadamer, Paul Ricoeur, Alasdair MacIntyre, Hans Blumenberg, Charles Taylor. Kenneth Baynes is currently doing postgraduate research at the University of Frankfurt. James Bohman lectures in philosophy at Boston University, and Thomas McCarthy is a professor of philosophy at Northwestern University and the editor of the MIT Press series *Studies in Contemporary German Social Thought*.
