Read Free Key Answer 5a Studies Social Singapore

If you ally habit such a referred **Key Answer 5a Studies Social Singapore** ebook that will meet the expense of you worth, get the extremely best seller from us currently from several preferred authors. If you desire to droll books, lots of novels, tale, jokes, and more fictions collections are next launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every books collections Key Answer 5a Studies Social Singapore that we will definitely offer. It is not nearly the costs. Its roughly what you craving currently. This Key Answer 5a Studies Social Singapore, as one of the most effective sellers here will entirely be in the course of the best options to review.

KEY=STUDIES - CAROLYN SUTTON

Social Studies Revision Gd N Lvl Pearson Education South Asia **Social Studies Revision Gd S4** Pearson Education South Asia **Analogies for Critical Thinking Grade 6** Teacher Created Resources **Approach analogies as puzzles. To solve them, students need to use cognitive processes and critical-thinking skills. These exercises present word and/or picture relationships in several different ways. The goal is to develop skills in visual imagery, reading comprehension, vocabulary development, reasoning and test-taking. History of Design and Design Law An International and Interdisciplinary Perspective** Springer Nature **For the first time, this book provides an up-to-date history of product design and product design law covering 17 countries — Japan, Korea, China, Singapore, the United Kingdom, Germany, France, Italy, the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden), Russia, the United States, Brazil and Australia — selected for their innovative or influential approach to design or design protection. Each country is the subject of two chapters — one on the history of design and the other on the history of design law — authored by experts in design and intellectual property (IP) law. This unique interdisciplinary approach explains why and how various national design protection systems (that can include design, copyright, trade mark, competition and civil laws) developed, making it an ideal book for students, researchers and lawyers. The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues allowing readers to consider their advantages and disadvantages — and so is also recommended for policy and law makers, as well as organizations that administer IP rights. Topics include the subject matter of design protection; procedural and substantive requirements; design registration; infringement; and the overlap of design rights and other IP rights. The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements, key designers and iconic designs and the current state of design. The chapters highlight the connected and often complementary relationship between the two histories, not only for each country, but at the regional and international level, often as a result of government policies, trade, colonialism, immigration and globalisation. Design and design practice continue to become more global and evolve with developments in technology. At the same time, design laws are not internationally harmonized and continue to develop at the national level, with a number of significant changes occurring in recent years. This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it. Resources in Education Handbook of Research on Advanced ICT Integration for Governance and Policy Modeling** IGI Global **As governments and policy makers take advantage of information and communication technologies, leaders must understand how to navigate the ever-shifting landscape of modern technologies in order to be most effective in enacting change and leading their constituents. The Handbook of Research on Advanced ICT Integration for Governance and Policy Modeling builds on the available literature, research, and recent advances in e-governance to explore advanced methods and applications of digital tools in government. This collection of the latest research in the field presents an essential reference for academics, researchers, and advanced-level students, as well as government leaders, policy makers, and experts in international relations. Asian Media Studies Politics of Subjectivities** John Wiley & Sons **This groundbreaking collection of original essays provides new perspectives in Asian media studies. The volume covers a diverse range of topics from media policy to globalization, using lively examples from various countries and media. Sport Science and Studies in Asia Supporting Learning Flow Through Integrative Technologies** IOS Press **"Supporting Learning Flow through Integrative Technologies contains a broad range of issues related to using information technology for learning. The title of this book indicates a move from local support of specific learning activities towards supporting learning and teaching processes in a broader context beyond single tools and individual users, considering user/learner groups on different levels of granularity as well as inter-operability mechanisms on the system level. The value of integration is primarily characterized by improving the richness and directness of educational interactions. The integration of interactive media and of learning processes can support a smooth and seamless information flow in and between different learning settings. Ubiquitous computing technologies with smart objects and non-standard peripherals allow for flexibly embedding support technologies in adequate physical settings and enable the integration of physical and digital support. Similarly, mobile technologies open up new possibilities for integrating learning activities between formal and informal settings. Featured themes of the book are: Computer-supported collaborative learning; Adaptive interaction; Teacher education; Specific learning technologies; Assessment and evaluation; Learning management and organization; Learning platforms and architectures; Scaffolding and reflection; Knowledge management; Specific learning technologies; Learning games; Writing skills; Authoring; Learning science; Media-enhanced interaction; Mobile and ubiquitous learning; Learning with hand-held devices; Programming; and Language learning." Formative Research in Social Marketing Innovative Methods to Gain Consumer Insights** Springer **This book brings together the state of the art and current debates in the field of formative research, and examines many of the innovative methods largely overlooked in the available literature. This book will help social marketing to move beyond surveys and focus groups. The book addresses the needs of social marketing academics and practitioners alike by providing a robust and critical academic discussion of cutting-edge research methods, while demonstrating at the same time how each respective method can help us arrive at a deeper understanding of the issues that social marketing interventions are seeking to remedy. Each chapter includes a scholarly discussion of key formative research methods, a list of relevant internet resources, and three key readings for those interested in extending their understanding of the method. Most chapters also feature a short case study demonstrating how the methods are used. Solutions and Innovations in Web-Based Technologies for Augmented Learning: Improved Platforms, Tools, and Applications Improved Platforms, Tools, and Applications** IGI Global **"This book covers a wide range of the most current research in the development of innovative web-based learning solutions, specifically facilitating and augmenting learning in diverse contemporary organizational settings"--Provided by publisher. International and Interdisciplinary Studies in Green Computing** IGI Global **With the growing awareness and popularity of environmental preservation, research on green computing has gained recognition around the world. Information technology must adopt initiatives in making computers as energy-efficient as possible, as well as design algorithms and systems for efficiency-related computer technologies. International and Interdisciplinary Studies in Green Computing provides coverage on strategic green issues and practices for competitive advantages and cost-cutting in modern organizations and business sectors in order to reach environmental goals. Social Studies Exercise Book** Steck-Vaughn Company **Economic and Social Survey of Asia and the Pacific 1999 Asia and the Pacific into the Twenty-first Century - Information Technology, Globalization, Economic Security and Development** United Nations **This year's issue of the survey reviews the economic progress in the ESCAP region over the past year and analyzes population dynamics and their related policy implications. It also provides a regional perspective on the subject of 'Financing for Development' looking at such issues as: domestic and external resources; trends in and current distribution of Official Development Assistance; and reform of the international financial architecture. Methods in Urban Analysis** Springer Nature **This book highlights major quantitative and qualitative methods and approaches used in the field of urban analysis. The respective chapters cover the background and relevance of various approaches to urban studies and offer guidance on implementing specific methodologies. Each chapter also provides links to real-world examples. The book is unique in its focus on Australian examples and subject matter, presented by recognized experts in the field. Handbook of Research on Social Impacts of E-Payment and Blockchain Technology** IGI Global **The social landscape is undergoing a global change with the emergence of e-payment and blockchain technology. This new technology changes the ways in which consumers and businesses interact with each other. This dynamic offers both opportunities and challenges to the socioeconomic landscape. It is important to understand the strategies, opportunities, and challenges contained in the e-payment and blockchain sector. The Handbook of Research on Social Impacts of E-Payment and Blockchain Technology is a comprehensive reference source that examines the strategies, opportunities, and challenges contained in the value creation of e-payment and blockchain technology, which lead to economic and social progression. Further delving into topics such as mobile financial services, technopreneurship, and cryptocurrencies, this dynamic resource is essential for students, academicians, entrepreneurs, corporate managers, business executives, researchers, blockchain professionals, technologists, systems engineers, policymakers, and government officials. Business Sustainability in Asia Compliance, Performance and Integrated Reporting and Assurance** Wiley **Get familiar with business sustainability in Asia Business Sustainability in Asia offers 12 chapters that cover different aspects of business sustainability with a keen focus on its implications in Asia. Anyone who is involved with business sustainability and corporate governance, the financial reporting process, investment decisions, legal and financial advising, assurance functions, and corporate governance education will be interested in this book. It examines business sustainability performance, reporting and assurance and their integration into strategy, governance, risk assessment, performance management, and the reporting process of disclosing governance, ethics, social, environmental, and economic sustainable performance. The book also highlights how people, businesses, and resources collaborate in a business sustainability and accountability model. • Develop an awareness and understanding of the main themes, perspectives, frameworks, and issues pertaining to corporate governance and business sustainability in Asia • Covers a variety of issues relevant to business sustainability in Asia • Authored by an expert who has written extensively on the subject • Understand why organizations worldwide recognize the importance of sustainability performance If you're a business leader, executive, auditor, or student looking to familiarize yourself with this emerging subject, Business Sustainability in Asia has you covered. Promoting Creative Tourism: Current Issues in Tourism Research Proceedings of the 4th International Seminar on Tourism (ISOT 2020), November 4-5, 2020, Bandung, Indonesia** Routledge **The papers presented in this work cover themes such as sustainable tourism; ICT and tourism; marine tourism; tourism and education; tourism, economics, and finance; tourism marketing; recreation and sport tourism; halal & sharia tourism; culture and indigenous tourism; destination management; tourism gastronomy; politic, social, and humanities in tourism; heritage tourism; medical & health tourism; film induced tourism; community based tourism; tourism planning and policy; meeting, incentive, convention, and exhibition; supply chain management; hospitality management; restaurant management and operation; safety and crisis management; corporate social responsibility (CSR); tourism geography; disruptive**

innovation in tourism; infrastructure and transportation in tourism development; urban and rural tourism planning and development; community resilience and social capital in tourism. The 4th ISOT 2020 aimed at (1) bringing together scientists, researchers, practitioners, professionals, and students in a scientific forum and (2) having discussions on theoretical and practical knowledge about current issues in tourism. The keynote speakers contributing to this conference are those with expertise in tourism, either in an academic or industrial context. Handbook of Policy Transfer, Diffusion and Circulation Edward Elgar Publishing This important Handbook brings together preeminent international scholars, sharing their comparative and international perspectives on the topic. Their original contributions cover the key issues and questions around policy transfer, diffusion and circulation research. Altogether, chapters illuminate how rich and provocative the current debate on the interpretation of how public policies travels is and the vibrancy of the area's research within the broad planet of public policy analysis. Advanced Studies in Classification and Data Science Springer Nature This edited volume focuses on the latest developments in classification and data science and covers a wide range of topics in the context of data analysis and related areas, e.g. the analysis of complex data, analysis of qualitative data, methods for high-dimensional data, dimensionality reduction, data visualization, multivariate statistical methods, and various applications to real data in the social sciences, medical sciences, and other disciplines. In addition to sharing theoretical and methodological findings, the book shows how to apply the proposed methods to a variety of problems -- e.g. in consumer behavior, decision-making, marketing data and social network structures. Both methodological aspects and applications to a wide range of areas such as economics, behavioral science, marketing science, management science and the social sciences are covered. The book is chiefly intended for researchers and practitioners who are interested in the latest developments and practical applications in these fields, as well as applied statisticians and data analysts. Its combination of methodological advances with a wide range of real-world applications gathered from several fields makes it of unique value in helping readers solve their research problems.-- The HIV Pandemic Local and global implications OUP Oxford As we approach the 25th anniversary of the first recognition of HIV/AIDS in 1981, this book reflects on the international impact of the disease. It has persistently remained a global issue, with more than 50 million people worldwide estimated to have been infected since that date. This ambitious book, written by 165 authors from 30 countries, offers a multi-country comparative study that examines how the response to the common, global threat of HIV is shaped by the history, culture, institutions and health systems of the individual countries affected. Increasingly the shift of health systems has been from prevention only as the main containment strategy, to a strategy that includes scaling up HIV treatment, and care and prevention services, including antiretroviral therapy. Thus, all parts of the health system must be involved; policy makers, healthcare professionals and users of the services have been forced to think differently about how services are financed, how resources are allocated, how systems are structured and organized, how services are delivered to patients, and how the resulting activity is monitored and evaluated in order to improve the effectiveness, efficiency, equity and acceptability of the response. This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system. Most chapters combine a health policy expert with an HIV specialist, allowing both a 'top down' health system approach and a 'bottom up' HIV-specific perspective. There are thematic and analytical sections, which provide an overview and some suggestions for solutions to the most serious outstanding issues, and chapters which analyse specific country and organisational responses. There is no perfect health system, but the evidence provided here allows the sharing of knowledge, and a opportunity to assess the impact and reactions, to an epidemic that must be considered a long term issue. UPSC IAS Prelims Paper 1 & 2 General Studies 10 Year-wise Solved Papers (2020 - 11) 2nd Edition Disha Publications Sustainable Development and Planning IX WIT Press Containing papers presented at the 9th International Conference on Sustainable Development and Planning this volume brings together the work of academics, policy makers, practitioners and other international stakeholders and discusses new academic findings and their application in planning and development strategies, assessment tools and decision making processes. Problems related to development and planning are present in all areas and regions of the world. Accelerated urbanisation has resulted in both the deterioration of the environment and quality of life. Taking into consideration the interaction between different regions and developing new methodologies for monitoring, planning and implementation, new strategies can offer solutions mitigating environmental pollution and non-sustainable use of available resources. Energy saving and eco-friendly buildings have become an important part of modern day progress with emphasis on resource optimisation. Planning is a key part in ensuring that these solutions along with new materials and processes are efficiently incorporated. Planners, environmentalists, architects, engineers and economists have to work collectively to ensure that present and future needs are met. The papers in the book cover a number of topics, including: City planning; Regional planning; Rural developments; Sustainability and the built environment; Sustainability supply chain; Resilience; Environmental management; Energy resources; Cultural heritage; Quality of life; Sustainable solutions in emerging countries; Sustainable tourism; Learning from nature; Transportation; Social and political issues; Community planning; UN Sustainable Development Goals and Timber Structures. Sustainable Energy Solutions for Remote Areas in the Tropics Springer Nature This book covers multifaceted aspects of sustainable energy solutions for remote areas in the tropics, particularly focusing on Southeast Asia. With insights from both the academic world and real-life implementation, readers will gain an overview of the range of energy problems currently facing the remote tropics, and what potential solutions are available. The book provides a detailed overview of various energy needs in the Southeast Asian tropics, a region where a significant portion of the population still lives without access to electricity. It not only addresses technical solutions to the energy problems but also tackles the social and wider implications, offering readers a more holistic understanding of the potential held by renewable energy. The chapters are structured to present first an overview of the problem at hand, and then a description of the technologies that could potentially solve it. Applications of the technologies; business models that are now available or being developed; the impact of the technologies; and future, more sustainable solutions are all discussed. Given its in-depth analysis, the book will be of interest to energy professionals in the tropics, energy policymakers, and students studying sustainable energy. BEST PRACTICE 5 A tool to improve museum education internationally Edizioni Nuova Cultura Emma Nardi, Cinzia Angelini, Introduction; Line Ali Chayder, Travelling with Art. A learning project for refugee children at Louisiana Museum of Modern Art; Sharon Chen, Kopi, Kueh and Culture; AI Ying Chin, Singapore's Little Treasures: Innovation in museum and classroom practice for and by kindergarten teachers; Mila Milene Chiovatto, Denyse Emerich, Rafaella Fusaro, The Pinafamília Project; Arusyak Ghazaryan, Marine Haroyan, In the World of National Musical Instruments; Helen Lamotte, Alexandre Therwath, Orsay facile. Inclure les personnes déficientes intellectuelles dans l'élaboration de documents adaptés; Tatevik Shakhkulyan, Nairi Khatchadourian, Lullabies Singing Workshop; María Antonieta Sibaja Hidalgo, X72/Punto de reunion. Big Data and Security First International Conference, ICBDS 2019, Nanjing, China, December 20–22, 2019, Revised Selected Papers Springer Nature This book constitutes the refereed proceedings of the First International Conference on Big Data and Security, ICBDS 2019, held in Nanjing, China, in December 2019. The 37 revised full papers and 12 short papers were carefully reviewed and selected out of 251 submissions. The papers included in this book cover topics in cybersecurity & privacy, big data, blockchain & internet of things, security in cloud and fog computing, and artificial intelligence/ machine learning security. Managing Socio-ecological Production Landscapes and Seascapes for Sustainable Communities in Asia Mapping and Navigating Stakeholders, Policy and Action Springer Nature This open access book presents up-to-date analyses of community-based approaches to sustainable resource management of SEPLS (socio-ecological production landscapes and seascapes) in areas where a harmonious relationship between the natural environment and the people who inhabit it is essential to ensure community and environmental well-being as well as to build resilience in the ecosystems that support this well-being. Understanding SEPLS and the forces of change that can weaken their resilience requires the integration of knowledge across a wide range of academic disciplines as well as from indigenous knowledge and experience. Moreover, given the wide variation in the socio-ecological makeup of SEPLS around the globe, as well as in their political and economic contexts, individual communities will be at the forefront of developing the measures appropriate for their unique circumstances. This in turn requires robust communication systems and broad participatory approaches. Sustainability science (SuS) research is highly integrated, participatory and solutions driven, and as such is well suited to the study of SEPLS. Through case studies, literature reviews and SuS analyses, the book explores various approaches to stakeholder participation, policy development and appropriate action for the future of SEPLS. It provides communities, researchers and decision-makers at various levels with new tools and strategies for exploring scenarios and creating future visions for sustainable societies. Research and Development in E-Business through Service-Oriented Solutions IGI Global As businesses are continuously developing new services, procedures, and standards, electronic business has emerged into an important aspect of the science field by providing various applications through efficiently and rapidly processing information among business partners. Research and Development in E-Business through Service-Oriented Solutions highlights the main concepts of e-business as well as the advanced methods, technologies, and aspects that focus on technical support. This book is an essential reference source of professors, students, researchers, developers, and other industry experts in order to provide a vast amount of specialized knowledge sources for promoting e-business. An Introduction To Family Therapy Systemic Theory and Practice McGraw-Hill Education (UK) Lists of key texts and diagrams, suggested reading organized by topic, and practical examples and exercises are also used in order to encourage the reader to explore and experiment with the ideas in their own practice. -- 50 Years Of Transportation In Singapore: Achievements And Challenges World Scientific This unique volume presents the achievements of the land, sea and air transport industry of Singapore in the last 50 years after Singapore gained its independence in 1965. It provides a comprehensive overview of Singapore's progress in transportation from a typical third world system in the 1960s to one that is currently in the top league globally in all aspects of passenger and freight transportation. Singapore's successes in land transport planning, urban traffic management, and public transport systems provide valuable experience for major cities worldwide. The emergence of the Singapore Port as the most efficient container port in the world is another success story that inspires both established and up-and-coming port operators alike. The ambitious goal of Singapore to develop itself into a maritime knowledge hub of the future is a bold and exciting undertaking catching worldwide attention. In air transport, Singapore is well known for its efficiency as a major regional hub.This book examines in detail the important milestones and background developments that have led to the highly advanced state of transportation systems in the land, sea and air transport of Singapore today. Each chapter is written by professionals who are themselves part of the success stories presented. The chapter authors are specially invited to provide a professional account of the topics of their expertise. The authors have been able to draw on extensive amounts of published and unpublished documents and reports to present a comprehensive picture for the subject of interest in each chapter. As a whole, the book offers a hollistic and informative professional reference book on the major happenings and achievements of Singapore in the transportation sector. Radical Solutions for Education in a Crisis Context COVID-19 as an Opportunity for Global Learning Springer Nature This book presents how to keep working on education in contexts of crisis, such as emergencies, zones of conflict, wars and health pandemics such as COVID-19. Specifically, this work shows a number of strategies to support global learning and teaching in online settings. Particularly, it first presents how to facilitate knowledge sharing and raising awareness about a specific crisis, to increase people's safety, including educators and learners. The book then discusses various techniques, mechanisms and services that could be implemented to provide effective learning support for learners, especially in learning environments that they do not daily use, such as physical classrooms. Further, the work presents how to teach and support online educators, no matter if they are school teachers, university lecturers, youth social workers, vocational training facilitators or of any other kind. Finally, it describes worldwide case studies that have applied practical steps to keep education running during a crisis. This book provides readers with insights and guidelines on how to maintain learning undisrupted during contexts of crisis. It also provides basic and practical recommendations to the various stakeholders in educational contexts (students, content providers, technology services, policy makers, school teachers, university lecturers, academic managers, and others) about flexible, personalised and effective

education in the context of crisis. Business, Government and Labor Essays on Economic Development in Singapore and Southeast Asia World Scientific Business, Government and Labor in the Economic Development of Singapore and Southeast Asia analyzes the inter-linked and evolving roles of private sector business, government public policy, and labor markets in the economic development of Singapore and its Southeast Asian neighborhood. It does this through 16 essays written by Prof. Linda Y C Lim, an early and long-established scholar of these subjects, and published over a 35-year period. For Singapore, often considered the world's most successful economy, the essays highlight the determining role of government's industrial and social policy through to the present day, when the growth model of the past faces many external market and domestic resource constraints. In the rest of Southeast Asia, in contrast, the essays explore how private sector business, dominated by the locally-domiciled ethnic Chinese minority, thrived and drove economic growth in underdeveloped markets with imperfect institutions, and consider if and how this might change with China's increasing presence in the regional economy. A final set of essays analyzes the forces underlying women's employment, from labor-intensive Southeast Asian export factories in the 1980s to Singapore's foreign-labor-dependent economy and its current productivity challenges. Taken together, the essays show how government, business and labor interact in the process of economic development. Proceedings of the First International Forum on Financial Mathematics and Financial Technology Springer Nature This book contains high-quality papers presented at the First International Forum on Financial Mathematics and Financial Technology. With the rapid development of FinTech, the in-depth integration between mathematics, finance and advanced technology is the general trend. This book focuses on selected aspects of the current and upcoming trends in FinTech. In detail, the included scientific papers focus on financial mathematics and FinTech, presenting the innovative mathematical models and state-of-the-art technologies such as deep learning, with the aim to improve our financial analysis and decision-making and enhance the quality of financial services and risk control. The variety of the papers delivers added value for both scholars and practitioners where they will find perfect integration of elegant mathematical models and up-to-date data mining technologies in financial market analysis. ICTs and Sustainable Solutions for the Digital Divide: Theory and Perspectives Theory and Perspectives IGI Global ICTs and Sustainable Solutions for the Digital Divide: Theory and Perspectives focuses on Information and Communication Technologies for Development (ICT4D), which includes any technology used for communication and information. This publication researches the social side of computing, the users, and the design of systems that meet the needs of "ordinary" users. Eating Chilli Crab in the Anthropocene Environmental Perspectives on Life in Singapore Ethos Books In this era of climate crisis, in which our very futures are at stake, sustainability is a global imperative. Yet we tend to associate sustainability, nature, and the environment with distant places, science, and policy. The truth is that everything is environmental, from transportation to taxes, work to love, cities to cuisine. This book is the first to examine contemporary Singapore from an ecocultural lens, looking at the ways that Singaporean life and culture is deeply entangled with the nonhuman lives that flourish all around us. The authors represent a new generation of cultural critics and environmental thinkers, who will inherit the future we are creating today. From chilli crab to Tiger Beer, Changi Airport to Pulau Semakau, O-levels to orang minyak films, these essays offer fresh perspectives on familiar subjects, prompting us to recognise the incredible urgency of climate change and the need to transform our ways of thinking, acting, learning, living, and governing so as to maintain a stable planet and a decent future. Research Handbook on E-Government Edward Elgar Publishing E-government is an increasingly well-established and wide-ranging field, in which there has been an explosion of new technologies, applications, and data resulting in new challenges and opportunities for e-government research and practice. This Research Handbook advances research in the field of e-government by first recognizing its roots and documenting its growth and progress. It investigates the advent and implications of new technologies, and structures the content around core topics of service, management, engagement and access. Two additional sections examine the role of e-government in developing countries and smart cities. Doctoral education in the entrepreneurial university enhanced employability? Linköping University Electronic Press This dissertation explores the issue of employability of doctorate holders through the theoretical lens of the model of the entrepreneurial university. It starts from the observation that there is a bottleneck in the academic labour market in many countries, making it increasingly difficult for recent doctoral graduates to engage in an academic career. Traditionally, doctoral education was designed for a career in academia; but the employment situations of doctorate holders call for more relevance of doctoral education and doctoral-level skills on the non-academic labour market. The main argument of this dissertation is that the openness and the interactions of the entrepreneurial university with its environment, in particular its region, makes it a relevant model to enhance the employability of doctorate holders outside academia. The thesis is based on five publications written either solely by the author or in collaboration with other scholars, mostly case studies compiling both qualitative and quantitative data and approaches. Three main findings can be highlighted from the research: (i) the entrepreneurial university increases its socioeconomic impact by building an alignment with regional stakeholders over the years and thanks to key individuals, by retaining human and social capital within itself and by broadening the scope of its activities and stakeholders; (ii) doctorate holders' employability is key in the entrepreneurial university's regional socioeconomic impact, as they are increasingly employed outside academia but are likely to experience job mismatches in this situation, mainly related to education and skills; (iii) regional stakeholders can take different types of initiatives to enhance the employability of doctorate holders, and increase the entrepreneurial university's socioeconomic impact: more specifically, doctorate holders and non-academic employers can get to know each other better; intermediaries such as Science Parks can support them through the creation of meeting places. The dissertation contributes to the literature on the entrepreneurial university by focusing on the population of doctoral students and doctorate holders, at the crossroads of its three missions (education, research and 'third mission'). It also suggests the following main recommendations: to universities, beyond adapting the content of doctoral education to the needs of non-academic employers, put emphasis on marketing it to them, so that they understand what it is worth; to doctorate holders, expand their knowledge of career possibilities, and behave entrepreneurially by initiating activities to complement what could be missing in their education; to non-academic employers, collaborate with universities and communicate their needs to them to influence the design of curricula. Avhandlingen undersöker anställningsbarheten för en disputerad person med teoretisk utgångspunkt i en modell av det entreprenöriella universitetet. I de flesta länder är det svårt för nyexaminerade doktorer att komma in på arbetsmarknaden, inte minst för dem som vill fortsätta inom akademin. Traditionellt är en doktorandutbildning utformad för en fortsatt karriär inom akademin, men på grund av de begränsade möjligheterna på arbetsmarknaden krävs doktorandutbildningar med större relevans och som även ger färdigheter inför en icke akademisk karriär. Huvudtesen i denna avhandling är att det entreprenöriella universitetets öppenhet och interaktionen med det omgivande samhället, inte minst med den närliggande regionen, ökar de nydisputerades anställningsbarhet utanför akademin. Avhandling baseras på fem publikationer skrivna antingen av en enskild författare eller i samarbete med kollegor och som grundar sig på såväl kvalitativa som kvantitativa studier. Tre huvudsakliga resultat kan lyftas från forskningen: (i) Det entreprenöriella universitetet ökar sitt socioekonomiska inflytande genom att skapa en plattform för samarbete med regionala aktörer, som utvecklas över åren och där mänskligt och ekonomiskt kapital i sig bidrar till att öka och bredda samarbetet ytterligare. (ii) De disputerades anställningsbarhet är en nyckel till det entreprenöriella universitetets möjlighet till socioekonomisk regional påverkan. Detta beror på att de disputerade i ökande utsträckning anställs utanför akademin och sannolikt upplever att det finns en miss-match i kunskaper och färdigheter. (iii) Regionala aktörer kan ta olika typer av initiativ för att öka anställningsbarheten för nyexaminerade doktorer och därmed också öka det entreprenöriella universitetets socioekonomiska inflytande. Mer specifikt bör doktorander och arbetsgivare utanför akademin lära känna varandra bättre. Intermediärer som närliggande forskningsbyar, Science parks, kan ge stöd genom att inrätta olika typer av mötesplatser. Avhandlingen bidrar till litteraturen inom området entreprenöriella universitet genom att sätta fokus på doktorander och nyblivna doktorer i skärningspunkten mellan utbildning, forskning och den 'tredje uppgiften'. I avhandlingen ges också rekommendationer: Till universiteten: Utöver att anpassa innehållet i doktorandutbildningen till behoven hos arbetsgivare utanför akademin behöver akademin också lägga tonvikt på marknadsföring så att företagare och organisationer i regionen inser värdet av en doktorsexamen. Till nyblivna doktorer: utvidga kunskaperna om vilka karriärmöjligheter som står till buds och agera entreprenöriellt för att komplettera de brister de upplever i sin utbildning. Till arbetsgivare utanför akademin: samarbeta med universiteten och kommunicera vilka behov de har för att påverka läroplaner och inriktningar. Economic and Social Survey of Asia and the Pacific Evidence in Education Linking Research and Policy Linking Research and Policy OECD Publishing Brings together papers from international experts on evidence-informed policy in education from a wide range of OECD countries to look at the issues facing educational policy makers, researchers, and stakeholders – teachers, media, parents – in using evidence to best effect. The 5-year Outlook on Science and Technology
