CRITICS, RATINGS, AND SOCIETY

THE SOCIOLOGY OF REVIEWS

Rowman & Littlefield Publishers How do we make choices in an information-saturated world? Prior studies often assume that the problem is coping with the volume of information. They rarely ask how people judge the validity of new information. But we are all forced to depend on secondary sources that no one has the time or resources to verify. In Critics, Ratings, and Society Grant Blank confronts these issues through an investigation of independent evaluations and reviews. Reviews are widespread; they rank products ranging from books and films to automobiles and computers. They are important not just because they influence success and failure of products, they also make or break reputations and careers, and often play a critical role in stratification, power, and status. Reviews are shaped by the interaction of media editors, product makers, and consumers into credible cultural objects. These are processed into two types of rating systems: connoisseurial reviews that depend on the unique skills and experience of a single reviewer, a connoisseur; and procedural reviews that are based on the results of tests, well-defined procedures that allow reviewers to rank groups of similar products. Both rating systems construct hierarchies of products. Blank develops a new theory explaining the circumstances where economic concerns like price are overshadowed by review-constructed hierarchies. When this happens, culture constructs markets. He argues that review-constructed hierarchies are widespread as a consequence of inherent structural characteristics of contemporary capitalism and, as a result, reviews will become more important in the future.

RICHARD JAECKEL, HOLLYWOOD'S MAN OF CHARACTER

McFarland Character actor Richard Jaeckel worked five decades in Hollywood alongside the industry's biggest names. Noted for tough-guy portrayals, he appeared in such classic westerns and war films as Sands of Iwo Jima (1949), The Gunfighter (1950), 3:10 to Yuma (1957), and The Dirty Dozen (1967). Bringing strength and integrity to his roles, he was nominated for a Best Supporting Actor Oscar for Sometimes a Great Notion (1970). A World War II veteran and Merchant Marine, he was respected in the surfing and fitness communities for his ageless athleticism. His performance as Turk in Come Back, Little Sheba (1952) was groundbreaking for iron-pumping actors wanting to be taken seriously for their dramatic abilities. This revealing portrait of the life of a working character actor covers Jaeckel's noteworthy career through each of his film and television appearances, from Guadalcanal Diary (1943) to Baywatch (1994). Recollections and behind the scenes stories from those he knew and worked with offer an in-depth look at the dedication and professionalism it takes to make it in Hollywood.

DIANE KEATON

ARTIST AND ICON

McFarland In the past 30 years, Diane Keaton has been an actress, a director and a photographer. This work begins with her early years in California, but the primary focus is on her film career from the 1970s through the present. The author examines Keaton's image as star and public figure, drawing on information from interviews (including personal conversations with Keaton), feature pieces, press releases, books, photographs, posters, films, and reviews of films. Each chapter provides an overview of the significant events and influences in Keaton's life during a particular period, along with a thematic and stylistic analysis of that period's feature films, television movies, and photography. The film analyses include an examination of themes and technical elements such as cinematography, mise-en-scene, movement, editing, sound, acting, costumes, set, and narrative structures.

MEASURING PUBLIC SPACE: THE STAR MODEL

Routledge In the rapidly expanding public space debate of the past few years, a recurring theme is the 'loss of publicness' of contemporary urban public places. This book takes up the challenge to find an objective way to prove or disprove this phenomenon. By taking the reader through a systematic and multi-disciplinary literature review it asks the deceptively simple question: 'What is publicness?' It answers this by first developing a new theoretical approach - 'The dual nature of public space', and secondly a new analytical tool for measuring it - 'The Star Model of Publicness'. This pragmatic approach to analysing public space is tested then on three new public places recently created on the post-industrial waterfront of the River Clyde, in the city of Glasgow, UK. By seeing where and why certain public places fail, direct and informed interventions can be made to improve them, and through this contribute to the building of more attractive and sustainable cities. By adopting a multi-disciplinary approach to shed light on this 'slippery' concept, this book shows how urban design can complement other disciplines when tackling the complex task of understanding and improving the built environment's public realm. It also bridges the gap between theory and practice as it draws from empirical research to suggest more quantitative approaches towards auditing and improving public places.

These proceedings comprise the contributions from 18 invited lecturers, including both monographic presentations and a number of hands-on tutorials.

THE CLASSICAL HOLLYWOOD CINEMA

FILM STYLE AND MODE OF PRODUCTION TO 1960

Routledge 'A dense, challenging and important book.' Philip French Observer 'At the very least, this blockbuster is probably the best single volume history of Hollywood we're likely to get for a very long time.' Paul Kerr City Limits 'Persuasively argued, the book is also packed with facts, figures and photographs.' Nigel Andrews Financial Times Acclaimed for their breakthrough approach, Bordwell, Staiger and Thompson analyze the basic conditions of American film-making as a historical institution and consider to what extent Hollywood film production constitutes a systematic enterprise, in both its style and its business operations. Despite differences of director, genre or studio, most Hollywood films operate within a set of shared assumptions about how a film should look and sound. Such assumptions are neither natural nor inevitable; but because classical-style films have been the type most widely seen, they have come to be accepted as the 'norm' of film-making and viewing. The authors show how these classical conventions were formulated and standardized, and how they responded to the arrival of sound, colour, widescreen ratios and stereophonic sound. They argue that each new technological development has served a function within an existing narrational system. The authors also examine how the Hollywood cinema standardized the film-making process itself. They describe how, over the course of its history, Hollywood developed distinct modes of production in a constant search for maximum efficiency, predictability and novelty. Set apart by its combination of theoretical analysis and empirical evidence, this book is the standard work on the classical Hollywood cinema style of film-making from the silent era to the 1960s. Now available in paperback, it is a 'must' for film students, lecturers and all those seriously interested in the development of the film industry.

UNDERSTANDING THE UNIVERSE

AN INTRODUCTION TO PHYSICS AND ASTROPHYSICS

Springer Science & Business Media Intended for undergraduate non-science majors, satisfying a general education requirement or seeking an elective in natural science, this is a physics text, but with the emphasis on topics and applications in astronomy. The perspective is thus different from most undergraduate astronomy courses: rather than discussing what is known about the heavens, this text develops the principles of physics so as to illuminate what we see in the heavens. The fundamental principles governing the behaviour of matter and energy are thus used to study the solar system, the structure and evolution of stars, and the early universe. The first part of the book develops Newtonian mechanics towards an understanding of celestial mechanics, while chapters on electromagnetism and elementary quantum theory lay the foundation of the modern theory of the structure of matter and the role of radiation in the constitution of stars. Kinetic theory and nuclear physics provide the basis for a discussion of stellar structure and evolution, and an examination of red shifts and other observational data provide a basis for discussions of cosmology and cosmogony.

CREATE YOUR IDEAL LIFE

APPLIED PSYCHOLOGY OF PERSONAL ADJUSTMENT AND GROWTH

AuthorHouse Some pursue happiness — Others create it! — Anonymous The chief purpose of Create Your Ideal Life is to empower you to proactively (intentionally and consciously) and continually create your ideal life in a joyful and balanced fashion by following the holistic (emphasizing the importance of the whole and the interdependence of its parts) Life Creation Process described in it. Following the Life Creation Process will help you to gain the level of self-understanding required to optimize the quality of your life and achieve personal growth. As you read this book, you will be introduced to the key concepts of applied psychology of personal adjustment and growth. The term applied indicates that the material provided is practical and that you can readily use the concepts provided to create and control your self and your life. The words psychology of personal adjustment indicate that one focus of the book is upon "... the individual's response to the physical, psychological, and social demands of the self, other people, and the environment" (Napoli, Kilbridge & Tebbs, 1996, p. 4). The words psychology of personal growth indicate that another

focus is upon "... the process by which the individual changes his or her thoughts, feelings, or behaviors regarding the self, others, or the environment" (Napoli and others, 1996, p. 4). Additionally, you will learn effective strategies for exploring life choices and making decisions, managing life changes, changing self-defeating beliefs and habits, coping effectively with stress, and developing effective interpersonal relationships. You will also discover the important role that essential beliefs and core values play in the decision-making process and the problems that can arise out of value conflicts. I have provided true stories from my own life and from the lives of my family members, friends, and students to clarify and underscore key points. The stories are all true. However, some of the names were changed to protect each person's privacy, except in cases where permission was granted to use the person's real name. Throughout this book, I have used a cinematic (pertaining to the movie industry) analogy to explain the spiritual, psychological, physical, and social issues involved in personal adjustment and growth across the life span. I have used the cinematic analogy to both simplify and dramatize the key concepts in the holistic Life Creation Process in order to make them easier for you to understand, learn to use, and remember. In addition to the mnemonic (memory-enhancing) value of the cinematic analogy, I believe it makes the complex concepts involved in the holistic Life Creation Process easy to discuss with and teach other people. Most people are already familiar with the meaning of most of the movie industry terms used such as star, actor, screen image, script, cast, producer, director, and sequel, and they understand how all the key aspects of a movie can either contribute to its success or ruin the entire project. Therefore, using the cinematic terms makes it easier for people to comprehend how all the key aspects of their Ideal Future Life must be harmonious in order to achieve the desired results. As you complete the Life Creation Process Exercises, you will be directed to analyze the key aspects of your Present Life and create a script for your Ideal Future Life using techniques that are similar to those employed by successful movie stars, directors, producers, set designers, and script writers (e.g., DiTillio., 1995). You will also be guided to identify the Transitional Life goals that you will need to achieve in order to segue from living your Present Life to living your Ideal Future Life. The Ideal Future Life that you design at this present time is definitely not all there is or will ever be possible in your life. As you grow and change, you will update your vision of your ideal life. Learning the tools and techniques used in the Life Creation Process Exercises will empower you to continually recreate your Ideal Future Life through planned sequels in order to keep your life well balanced and overflowing with happiness and spiritual joy. The resources used for this book reflect my multidisciplinary approach to the Life Creation Process as well as my positive psychological orientation. I have included concepts from the traditional scholarly social-psychological literature, the popular self-help and self-improvement literature, and the media (plays, movies, tv, newspapers and magazines). The material includes both multidisciplinary academic resources and popular self-improvement resources that I have used, and found to be beneficial, during my own explorations in personal adjustment, growth, and Ideal Future Life creation. Most of the new material in this revised version of Create Your Ideal Life is from information that I have incorporated into my lectures, in-class exercises, and course assignments over the past 15 years.
