ROBOT TALES

ELEVEN SHORT SCIENCE FICTION STORIES ABOUT ROBOTS

CreateSpace This is a collection of eleven short stories about robots that are compiled from various sources. The stories are: (1) Arm of the Law (How could a robot-a machine, after all-be involved in something like law application and violence?), (2) The Velvet Glove (New York was a bad town for robots this year. In fact, all over the country it was bad for robots....), (3) Survival Tactics (The robots were built to serve Man; to do his work, see to his comforts, make smooth his way. Then the robots figured out an additional service-putting Man out of his misery), (4) Beside Still Waters, (5) A Spaceship Named McGuire (The basic trouble with McGuire was that, though "he" was a robot spaceship, nevertheless "he" had a definite weakness that a man might understand....), (6) Service with a Smile (Herbert was truly a gentleman robot. The ladies' slightest wish was his command....), (7) The Helpful Robots (This is the story of Rankin, who prided himself on knowing how to handle robots, but did not realize that the robots of the Clearchan Confederacy were subject to a higher law than implicit obedience to man), (8) Robots of the World! Arise! (What would you do if your best robots-children of your own brain-walked up and said "We want union scale"?), (9) The Love of Frank Nineteen (What will happen to love in that far off Day after Tomorrow? The result is a unique love story from that same Tomorrow), (10) Benefactor (We can anticipate that robots will be fiercely resented, at first, in a society that will see them as the latest-and an indestructible-widespread threat to the workers whom they will replace. The men who will seek to alter the status quo will be called "robot lovers" and stoned. But what happens next?), and (11) The Stutterer (A man can be killed by a toy gun-he can die of fright, for heart attacks can kill. What, then, is the deadly thing that must be sealed away, forever locked in buried concrete-a thing or an idea?). It is a pleasure to publish this new, high quality, and affordable edition of these timeless stories.

CHEMISTRY AND PHYSICS FOR NURSE ANESTHESIA

A STUDENT CENTERED APPROACH

Springer Publishing Company "[A] welcome addition to the reference materials necessary for the study of nurse anesthesia....The textbook is divided into logical, easy to use sections that cover all areas necessary for the practice of nurse anesthesia....This is a text that is easy to read and able to be incorporated into any nurse anesthesia chemistry and physics course. I would recommend this textbook to any program director." --Anthony Chipas, PhD, CRNA Division Director Anesthesia for Nurses Program Medical University of South Carolina At last. . . a combined chemistry & physics nursing anesthesia text. This textbook offers combined coverage of chemistry and physics to help students learn the content needed to master the underlying principles of nursing anesthesia. Because many graduate nursing students are uncomfortable with chemistry and physics, this text presents only the specific content in chemistry and physics that relates to anesthesia. Written in a conversational, accessible style, the book teaches at a highly understandable level, so as to bridge the gap between what students recall from their undergraduate biochemistry and physics courses, and what they need to know as nurse anesthetists. The book contains many illustrations that demonstrate how the scientific concepts relate directly to clinical application in anesthesia. Chapters cover key topics relating to anesthesiology, including the basics of both chemistry and physics, fluids, a concentration on gas laws, states of matter, acids and bases, electrical circuits, radiation, and radioactivity. With this text, students will benefit from: A review of the math, chemistry, and physics basics that relate to clinical anesthesia A conversational presentation of just what students need to know, enabling a fast and complete mastery of clinically relevant scientific concepts Heavy use of illustrations throughout chapters to complement the text End-of-chapter review questions that help students assess their learning PowerPoint Slides available to qualified instructors.
