### Longitudinal Occupancy of Controlled Access Right-of-way by Utilities

*Transportation Research Board This synthesis will be of interest to highway administrators, design engineers, maintenance engineers and maintenance staff, traffic engineers, and safety officials. It will also provide useful information to the utilities and telecommunications industries. Information is presented on the state transportation agencies' policies, practices, and experience associated with occupancy of the rights-of-way on controlled (or limited) access highways. This report of the Transportation Research Board presents a brief history of accommodation of utilities in the right-of-way, including the policies developed over time by the American Association of State Highway and Transportation Officials (AASHTO) and the Federal Highway Administration (FHWA) and describes why there are issues associated with joint use of the highway right-of-way. A 1993/1994 survey of the state transportation agencies taken for this synthesis yielded 100% return, indicating the high interest in the*

subject. Issues included in the survey were policies and experiences regarding user and worker safety; controls placed on utilities; exceptions to right-of-way policies; and operational, legal, and equity issues.

## Making land work easements, covenants and profits á prendre

*The Stationery Office* In this report, the Law Commission makes recommendations to simplify, modernise and enhance the law of easements, covenants and profits á prendre. These rights are essential to the effective use of land and are relied upon by a significant proportion of property owners in England and Wales. Parts of the current law are ancient, contradictory and unfit for modern society. The report recommends reform where it is needed, while preserving those aspects of the law that function as they should. The recommendations would not affect the validity and enforceability of existing rights. The reforms would: make it possible for the benefit and burden of positive obligations to be enforced by and against subsequent owners; simplify and make clearer the rules relating to the acquisition of easements by prescription (or long use of land) and implication, as well as the termination of easements by abandonment; give greater flexibility to developers to establish the webs of rights and obligations that allow modern estates to function; facilitate the creation of easements that allow a substantial use of land by the benefiting owner (for example, rights to park a car); expand the jurisdiction of the Lands Chamber of the Upper Tribunal to allow for the discharge and modification of easements and profits created post-reform.
