Advanced Direct Injection Combustion Engine Technologies and Development

Diesel Engines

Elsevier Volume 2 of the two-volume set *Advanced direct injection combustion engine technologies and development* investigates diesel DI combustion engines, which despite their commercial success are facing ever more stringent emission legislation worldwide. Direct injection diesel engines are generally more efficient and cleaner than indirect injection engines and as fuel prices continue to rise DI engines are expected to gain in popularity for automotive applications. Two exclusive sections examine light-duty and heavy-duty diesel engines. Fuel injection systems and after treatment systems for DI diesel engines are discussed. The final section addresses exhaust emission control strategies, including combustion diagnostics and modelling, drawing on reputable diesel combustion system research and development. Investigates how HSDI and DI engines can meet ever more stringent emission legislation Examines technologies for both light-duty and heavy-duty diesel engines Discusses exhaust emission control strategies, combustion diagnostics and modelling

Computational Intelligence in Remanufacturing

IGI Global In attempts to reduce greenhouse gas emissions, many alternatives to manufacturing have been recommended from a number of international organizations. Although challenges will arise, remanufacturing has the ability to transform ecological and business value. Computational Intelligence in Remanufacturing introduces various computational intelligence techniques that are applied to remanufacturing-related issues, results, and lessons from specific applications while highlighting future development and research. This book is an essential reference for students, researchers, and practitioners in mechanical, industrial, and electrical engineering.

U.S. Automotive Industry

Policy Overview and Recent History

Nova Publishers Over one million Americans are employed in manufacturing motor vehicles, equipment and parts. But the industry has changed dramatically since the U.S. "Big Three" motor vehicle corporations (General Motors, Ford and Chrysler) produced the overwhelming majority of cars and light trucks sold in the United States, and directly employed many people themselves. By 2003, most passenger cars sold in the U.S. market were either imported or manufactured by foreign-based producers at new North American plants (so-called "transplant" facilities). The Big Three now dominate only in light trucks, and are also now being challenged there by the foreign brands. The Big Three have shed about 600,000 U.S. jobs since 1980, while about one-quarter of Americans employed in automotive manufacturing (nearly 300,000) work for the foreign-owned companies. It is clear that the U.S. automotive industry has undergone many drastic changes that have had a net adverse effect on American interests. This book examines the causes of these changes. Congressional acts, increasingly stringent emission laws, the effects of NAFTA, labour unions and globalisation are all within the scope of this book.

Which Fuels for Low CO2 Engines?

Proceedings of the International Conference Held in Rueil-Malmaison, France, September, 22-23, 2004

Editions TECHNIP Throughout the world, research and development in the field of vehicle transportation is increasingly focusing on engine and fuel combinations. The conventional and alternative fuels of the future are seen as fundamental to the development of a new generation of internal combustion engines that attain low well-to-wheel CO2 emissions along with near-zero pollutant emissions. These issues were debated during an international conference whose proceedings are presented in this book. This international conference attracted specialists in the field, including participants from universities, research centres and industry. Contents : Future of liquid fuels, Engine and fuel-related issues in HCCI & CAI combustion, Energy conversion in engines from natural gas, Use of hydrogen in IC engines, Which fuels for low CO2 engines?

Plunkett's Automobile Industry Almanac 2009

The Only Comprehensive Guide to Automotive Companies and Trends

Plunkett Research, Ltd. Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Japanese Multinationals in China

Routledge China is poised to gain global importance as a growth engine for the world economy on a par with Europe and the USA. Japanese multinational enterprises are increasingly active in relocating to China their R&D and capital- and knowledge-intensive production for both export-platform and target market reasons. It is at the juncture of the growing impact of China-related activities of Japanese corporations on the transformation of Japanese management philosophies, on the one hand, and the transformation of the Japanese economy more generally, on the other, that this book is situated. As Japanese corporations re-align activities to increasingly accommodate the growing importance of China as a business location, inter-regional expansion will integrate more deeply the Chinese economy within their global strategies, business structures and decision-taking. By presenting current research and thinking on the significance of corporate Japan's growing engagement with China, the book explores the following imminent questions: What is China's future position in the global corporate activities of Japanese firms? How has China's investment profile changed and how and with what purpose do Japanese firms enforce their Chinese presence? The book sheds light on the implications for European businesses and policy-makers of the consequences of deepening integration of these two economic powerhouses. This book was published as a special issue of Asia Pacific Business Review.
